ALTERATION

- Cover: Post mineral mafic volcanic rocks
- High sulphidation part of system
 - Steam heated
 - Residual silica & opaline silica
 - Massive silica
 - Sulphates (gypsum)
 - Quartz-alunite
 - Quartz-pyrophyllite
 - Illite
- Intrusion-related part of system
 - Specular hematite, quartz
 - Tourmaline, specular hematite, quartz
 - Silicification & quartz veining

STRUCTURE

- POST-mineral faults
- PRE-mineral faults

● Collars - 2014/2015 - current release
