

**MMI Au+Cu+Zn Anomalies**

### 2008 Program Follow-up Recommendations

**Target 1:** Drill test the significant gold zone hosted within pyritic and sheared rhyolites along a splay to the Swain Lake Deformation Zone (SLDZ). (Gold Ag with Zinc Bz)

**Target 2:** Drill test the gold and gold with copper anomalies hosted within a splay to the SLDZ. (Gold Dg with Copper Ac)

**Target 3:** Drill test the Layered Gabbro target #3. (Gold Bg with Copper Bc and Zinc Cz) Also re-drill the historic drill intersection 700 meters to the south under Birch Lake that returned 5.8g/t gold, 4.4 g/t platinum, 3.4 g/t palladium, 9.4 g/t silver, 0.8% nickel and 0.9% copper over 1.5 meters. Winter ice conditions are required for this drilling.

**Target 4:** Drill test the significant gold anomaly coincident with IP geophysics. (Gold Cg)
