

Airborne Magnetic Intensity Surveys Combined Precipitate and GoldQuest

**Juan de Herrera Project
Dominican Republic**

September 04, 2015

Ginger Ridge

DDH 5: Massive Sulphide discovery hole
5.0m @ 13.4 g/t Au within
18.0m @ 4.5 g/t Au

98.1m diss., semi to massive sulphides
 ~1,000m Gold Exploration Potential

**Goldquest Romero Project
Magnetic Signature**

Romero
Romero South

Total Magnetic Intensity colour contours courtesy of GoldQuest Mining via its 2014 helicopter geophysical survey

Contour colour scales vary for each company surveys

* After GoldQuest Mining historical new release.
