(1) Funds flow from operations and net debt are non-GAAP terms. Please refer to the advisory on Non-GAAP measures below.

(2) Excluding shares held in trust for the benefit of Trilogy's officers and employees under the Company's Share Incentive Plan. Includes Common Shares and Non-voting Shares. Refer to the notes to the interim consolidated financial statements for additional information.

Operations Update for the Third Quarter 2015

- Average production of 25,090 Boe/d
- \$17.2 million capital expenditures before proceeds of disposition
- Average operating costs \$9.28/Boe
- Operating netback \$14.79/Boe
- \$22.2 million funds flow from operations (\$0.18/share, fully diluted)
- 7 (1.8 net) wells were rig released during the quarter
- Completed sale of Dunvegan oil property in Kaybob area for net proceeds of \$45 million

Production and Capital Spending

Trilogy's third quarter 2015 production was 25,090 Boe/d (96.5 MMcf/d of natural gas, 5,227 Bbl/d of crude oil and 3,779 Boe/d of natural gas liquids), a decrease of 3,836 Boe/d or 13 percent from second quarter 2015 production of 28,926 Boe/d. New production additions in the third quarter partially offset the impact of natural production declines, third-party pipeline outages and restrictions during the quarter, the shut-in of a portion of Trilogy's production to take advantage of certain gas marketing opportunities in the current pricing environment, and the sale of its Kaybob Dunvegan production.

Trilogy deferred completion operations on six operated wells drilled in the first quarter of 2015 until June and July. Initial production from these wells added approximately 2,500 Boe/d to third quarter production and Trilogy estimates that it realized a cost reduction of approximately 25 percent by deferring these completion operations. Non-operated wells drilled during the second half of the year, primarily in the Duvernay, are not expected to be on production before year end however will benefit next year's production forecast.

Trilogy was exposed to numerous sales gas pipeline outages and restrictions through the third quarter that reduced quarterly production by approximately 2,600 Boe/d. Pipeline outages and curtailments on TCPL's NGTL system are expected to continue over the next several months but are anticipated to improve throughout 2016. Trilogy has also contracted for an additional 50 MMcfd/d of firm TCPL capacity which is expected to be in-service April 2016. This should decrease Trilogy's exposure to production downtime due to TCPL transportation restrictions.

Trilogy entered into natural gas sales contracts on Alliance for 2015, whereby Trilogy hedged the sales price relative to AECO for a significant portion of its gas volumes. As a result of the above mentioned pipeline outages, Alliance daily average spot natural gas prices were as low as AECO minus \$7.99/GJ (September 22, 2015) in the third quarter. To take advantage of those sales gas contracts and the pricing weakness mentioned above, Trilogy shut in approximately 800 Boe/d of natural gas and associated natural gas liquids for the quarter and, instead, purchased natural gas volumes which it then sold at the higher price associated with those contracts, thereby realizing higher net revenue of approximately \$1.2 million during the quarter while preserving Trilogy reserves. This swap opportunity is not expected to be ongoing; Trilogy anticipates resuming production of such reserves during the fourth quarter.

In the third quarter, Trilogy sold its interest in its Kaybob Dunvegan oil play that produced approximately 800 Boe/d in June 2015 (1.6 MMcf/d of natural gas and 550 Bbl/d of crude oil and natural gas liquids) and included approximately 12 net sections of undeveloped Dunvegan mineral rights for net proceeds of \$45 million. Trilogy retained its non-Dunvegan mineral rights and producing infrastructure as part of the transaction. This divestiture supports the Company's initiative to maintain its focus and capital spending plans on the Montney and Duvernay formations in the Kaybob area.

Trilogy spent approximately \$17.2 million on drilling, completions, production facilities and land acquisitions in the third quarter of 2015, which included participating in 7 (1.8 net) non-operated wells. Capital spending year-to-date reflects approximately 75 percent of Trilogy's current \$100 million annual capital budget. Capital

expenditures for the balance of the year will be directed primarily toward non-operated Duvernay projects that have strategic and economic value and preserve Trilogy's land position in the play.

If not for the approximately 3,400 Boe/d reduction in production that resulted from pipeline outages and restrictions and Trilogy's decision to purchase production versus producing its reserves, Trilogy's quarter over quarter production was forecast to have been relatively flat and taking into account the Dunvegan divestiture, quarterly production would have increased marginally. Given current production, recent oil divestitures, planned operations for the balance of the year and assuming no additional unexpected plant or pipeline outages in the Kaybob and Grand Prairie areas, Trilogy believes it will produce approximately 28,000 Boe/d in 2015 as compared to previous production guidance of 30,000 Boe/d and will operate within its originally forecast annual cash flow, which is forecast to be approximately \$105million in 2015.

Operating Costs

Operating costs in the third quarter of 2015 were \$9.28/Boe, down 6 percent from second quarter 2015 operating costs of \$9.86/Boe. Trilogy has been focused on reducing costs in all aspects of its operations and will continue to work with its employees, contractors and suppliers to reduce the full cycle cost structure associated with Trilogy's operations.

Within each of its major producing properties, Trilogy continues to evaluate, develop and execute on its long term operating and development plans to reduce costs, maximize production and provide stable production growth. Execution of these plans take time and planning to ensure these producing properties are developed and produced at stable and sustainable rates. In the current price environment, Trilogy shut in limited production which it deemed uneconomic due to higher associated lifting and operating costs. As commodity prices gain strength, Trilogy expects to continue profitably developing its current land base, focusing on plays that meet its investment return criteria and growing production over the long term.

Trilogy anticipates the benefits of its cost reduction initiatives will further reduce fixed and variable operating costs for the balance of the year; resulting in annual operating costs of approximately \$9.50/Boe, as compared to the original 2015 guidance of \$10.00/Boe.

Profitability

Trilogy's operating netback of \$14.79/Boe in the third quarter of 2015, on a per unit of production basis, was down 16 percent from \$17.46/Boe in the second quarter of 2015. This quarter-over-quarter decrease in operating netback was primarily attributed to the decrease in realized crude oil and natural gas liquids prices on reduced production volumes and was partially offset by an increase in realized natural gas prices derived from margins realized from purchasing lower price gas and selling into higher priced sales contracts as described above.

Trilogy's funds flow from operations for the third quarter of 2015 was \$22.2 million, compared to \$33.8 million in the second quarter.

Drilling Activity

During the third quarter of 2015, Trilogy participated in 7 (1.8 net) wells, all non-operated. Through the fourth quarter of this year, Trilogy expects that it will participate as to its working interest in non-operated projects targeting oil, condensate and liquids-rich gas in the Duvernay formation where considered strategic and economic at current prices. Trilogy has reduced the operated component of its capital spending program as much as possible and will continue to do so until there are signs that commodity prices are trending higher.

Operating Area Updates

Kaybob Montney Oil Development

During June and July, Trilogy completed 2 net wells that were drilled in the first quarter to further evaluate the western and northern portions of the Kaybob Montney oil pool. Production results to date continue to be encouraging and will provide useful data required to continue full field development when commodity prices improve.

Trilogy will continue to limit its capital spending in this pool as it believes that it is prudent to preserve these reserves until commodity prices provide returns commensurate with the cost of finding and developing the resource. Through the balance of 2015, Trilogy will be monitoring crude oil price forecasts and will begin to reinvest in this asset as prices improve and the Company can realize on the capital investments it has made in this area over the past four years.

Presley Montney Gas Development

In the Presley Montney gas pool, Trilogy drilled 3 (2.5 net) wells during the first quarter which were completed in June following spring break-up and brought on production in the third quarter. Production from this area was reduced due to the Alliance and TCPL sales gas pipeline outages and other restrictions noted above, which continue to impact production into the fourth quarter. Production transportation arrangements are being made to handle production from this area in 2016.

Trilogy believes that this area has the potential to provide significant production growth for the Company in the right commodity price environment and will continue to develop a plan to increase production when commodity prices increase. Trilogy will continue to monitor commodity prices and allocate future capital based on type well economics.

Duvernay Shale Oil/Gas Development

Trilogy allocated \$65 million towards non-operated Duvernay projects in 2015, with approximately \$25 million spent in the first half of the year, \$11 million in the third quarter with the balance expected to be allocated to fourth quarter operations.

In the first and second quarters, Trilogy participated in the drilling of 3 (1.0 net) horizontal Duvernay wells and the completion of 1 (0.5 net) horizontal Duvernay wells that were drilled in the fourth quarter of 2014. These wells were completed through the second and third quarters and brought on production in the third and fourth quarters. Initial production and flow test results from these four wells are encouraging and will support continued development in the future. The following table summarizes production information from these wells to September 30, 2015.

	Cumulative Condensate MBbl	Cumulative Gas MMcf	Average Condensate Rate Bbl/d	Average Gas Rate MMcf/d	Tubing Pressure MPa	Producing Time Months	On Production Date
4-31-60-20W5							Est. Nov 2015
13-7-61-20W5							Est. Nov 2015
02/14-8-61-20W5	40	432	350	3.8	4.3	4	May 13, 2015
15-15-62-23W5	26	202	285	2.2	6.8	3	July 9, 2015

During the third quarter, Trilogy participated for its 33 percent working interest in a non-operated well, drilled to a bottom hole location at 16-12-061-20W5M, in the gas condensate area of the Duvernay play. The well is expected to be completed in November and on production before the end of the year.

Drilling operations on 3 non-operated 6-well pads progressed through the third quarter, with completion operations expected to begin before year end. Trilogy participated for its 30 percent working interest in the first 5 of these wells, all of which were rig released during the quarter, with initial production expected in the second quarter of 2016. Trilogy will continue to manage its exposure to non-operated drilling notices on the multi-well pads and will be working with the operator to ensure timely development and production from the asset.

Trilogy continues to be encouraged with the progress that has been made by industry in the past four years with respect to the understanding and development of the Duvernay play. The continued evolution of drilling, completion and production techniques has led to some very positive results in 2015. Continued advancements in Duvernay shale completion techniques over this period have provided for improved initial production rates and what is expected to be greater ultimate recoverable reserves. Trilogy believes that the Duvernay will prove to be a high quality shale play with attractive economics, as ultimate recoverable reserves increase through the evolving completion techniques and reduced well costs. The past year has provided Trilogy the opportunity to generate Duvernay type curves for its land position to better value the land base and thereby allocate development funds into what it believes to be the highest rate of return projects when commodity prices improve. Trilogy plans to continue to advance its Duvernay land base towards full scale commercial development and will be considering all options to accelerate the development of the play.

Grande Prairie

Trilogy did not drill or complete any wells in the Grande Prairie area during the third quarter of 2015. Third quarter production from the Company's properties in this area averaged 1,629 Boe/d as compared to 1,667 Boe/d in the second quarter and 1,634 Boe/d in the first quarter of the year. Production in the area continues to be impacted by plant downtime at Sexsmith and Wembley. It is anticipated that production will decline relatively slowly through the balance of the year as shut-in production restrictions, Trilogy has forecast 2015 production from these assets to be approximately 1,600 Boe/d.

Trilogy remains optimistic regarding the development potential of the Grande Prairie area and will continue to develop its prospect inventory on its current land base to ensure economic projects are developed as commodity prices and access to processing infrastructure improves. At the same time, the Company will continue to evaluate opportunities to generate additional value from these assets, which may include asset dispositions.

Risk Management

Trilogy's Management and Board of Directors believe that hedging a portion of production is prudent to support the Company's capital spending program. Trilogy currently has 3,000 Bbl/d of crude oil hedged for the 2016 calendar year at \$77.18 Cdn/Bbl WTI. Trilogy will continue to evaluate opportunities to hedge oil and natural gas production to help realize sufficient cash flow to execute its capital spending program and grow its assets. A summary of Trilogy's hedging contracts are available in notes 18 and 19 of the Interim Consolidated Financial Statements.

Outlook

Trilogy has continued to develop its land position and technical expertise in large, unconventional liquids-rich gas and oil resource plays in the Canadian Deep Basin. The Company believes that it has accumulated a large inventory of high quality prospects that should provide the opportunity, in the long term, to grow annual production and replace produced reserves.

Given the impact of property divestitures, sales gas pipeline outages and restrictions and the anticipated constraints through the balance of the year, Trilogy is adjusting its 2015 annual guidance as follows:

- Average production 28,000 Boe/d (~30% oil and NGLs)
- Average operating costs \$9.50 /Boe
- Capital expenditures
 \$100 million

In the current natural gas and crude oil commodity price environment, Trilogy expects to manage its balance sheet through continued production, asset rationalization and disciplined capital spending. As a growth-oriented corporation, Trilogy must remain flexible in order to respond to changes in commodity prices and believes it can manage its assets prudently through the year as its production base declines. Trilogy will continue to evaluate alternatives to generate additional value from its Duvernay assets which may include a sale or joint venture of some or all of its Duvernay assets in the Kaybob area. Trilogy remains confident in its strategy, its high quality assets and the proven expertise of its employees.

Certain statements in this Review of Operations constitute forward-looking statements under applicable securities legislation. Please refer to the attached Management's Discussion and Analysis for advisories on forward-looking statements and the assumptions, risk and uncertainties related to forward-looking information.

MANAGEMENT'S DISCUSSION AND ANALYSIS

This Management's Discussion and Analysis ("MD&A") provides the details of the financial condition and results of operations of Trilogy Energy Corp. ("Trilogy" or the "Company") for the three and nine months ended September 30, 2015, and should be read in conjunction with the Company's interim consolidated financial statements and related notes for the same three and nine months ended, (the "Interim Financial Statements") and its December 31, 2014 annual consolidated financial statements ("Annual Financial Statements") and related MD&A. The Interim Financial Statements have been prepared in Canadian dollars in accordance with International Financial Reporting Standards ("IFRS").

Readers are cautioned of the advisories on forward-looking statements, estimates, non-GAAP measures and numerical references which can be found at the end of this MD&A. This MD&A is dated and was prepared using available information as of November 5, 2015.

Financial and Operating Highlights

- Reported sales volumes for the third quarter of 2015 were lower at 25,090 Boe/d as compared to 28,926 Boe/d for the previous quarter. Asset dispositions, shut-in of volumes for sales pipeline outages, natural declines, net of new production additions, and adverse volatility in the market price for gas contributed to the reduced production levels in the quarter.
- Trilogy completed the sale of its Dunvegan oil assets in the Kaybob area for net proceeds of \$45 million.
- Capital expenditures in the quarter, excluding acquisitions and dispositions, totaled \$17.2 million.
- In total 7 (1.8 net) wells were drilled in the quarter as compared to zero wells in the prior quarter.
- Operating expenditures decreased to \$21.4 million or \$9.28 /Boe in the quarter compared to \$25.9 million or \$9.86 /Boe for the previous quarter.
- Funds flow from operations ⁽¹⁾ was lower at \$22.2 million in the quarter compared to \$33.8 million in the prior quarter.
- Net debt ⁽¹⁾ decreased by approximately \$63 million to \$674 million at the end of the quarter, from \$737 million at the end of the previous quarter.
- Capacity under Trilogy's Credit Facility as at September 30, 2015 was \$273 million, consisting of \$125 million under Trilogy's development facility and \$148 million under its revolving and working capital tranches.

Capital and operating expenditure levels and asset dispositions throughout the quarter reflect Trilogy's commitment to preserve shareholder value and promote financial sustainability during the low liquids and gas commodity price environment.

(1) Refer to Non-GAAP measures in the MD&A

Business Environment and Economic Conditions

World oil over-supply concerns surfacing in the latter half of 2014 through 2015 continued to weigh on realized oil and liquids prices received in Canada. In the United States ("U.S."), crude oil stocks reached record inventories and strong domestic oil production levels were somewhat unchanged to date in 2015. These factors, combined with continued supply pressure from countries including the Organization of the Petroleum Exporting Countries (OPEC) and Russia continued to reinforce over-supply concerns. Financial instability in Europe and China further contributed to a reduction in the price for oil and liquids. Strength in the U.S. dollar relative to the Canadian dollar provided a partial offset to the reduction in oil prices, increasing the price realized in Canada. Significant market volatility in the price for oil through the year reinforced the diversity and uncertainty in the market as to the timing and extent of a meaningful and sustained recovery in oil and liquids prices.

Similarly, gas prices continued to weaken in 2014 through to the current quarter as moderate temperatures experienced throughout most of North America in 2014 and 2015 failed to draw significantly on gas storage levels. This factor, combined with strong supply from industry continued to place downward pressure on the price of natural gas through 2015.

The aforementioned softness in commodity prices continues to have a direct and profound impact on Canadian oil and gas producers. Producers have had to quickly respond to the depressed commodity price environment in an effort to preserve shareholder value and their existence as a going concern. Financing initiatives, decreases in distribution levels, asset rationalization programs, capital allocation decisions, labour reductions and other cost reduction strategies have been crucial measures that industry has had to adopt in an effort to mitigate the low commodity price environment and successfully compete as an industry in Canada. As commodity prices regain strength, Trilogy expects to continue profitably exploiting its current land base, focusing on plays that meet its investment return criteria and growing production over the long-term. Trilogy is confident in the success of its business model and its ability to generate long-term shareholder value.

The following table summarizes the key commodity price benchmarks for the following periods:

	Q3 2015	Q2 2015	Q3 2014	YTD 2015	YTD 2014
Crude Oil					
West Texas Intermediate monthly average (U.S.\$/Bbl)	46.43	57.94	97.17	51.00	99.60
Canadian Light Sweet monthly average (Cdn\$/Bbl)	55.10	68.88	93.65	59.07	92.80
Natural Gas					
NYMEX (Henry Hub close) monthly average (U.S.\$/MMBtu)	2.73	2.74	3.95	2.76	4.42
AECO monthly average (Cdn\$/GJ)	2.92	2.67	4.03	2.78	4.78
Canada - U.S. dollar closing exchange rate (Cdn\$/U.S.\$1)	1.33	1.25	1.12	1.33	1.12

Business Overview and Strategy

Trilogy is a growing petroleum and natural gas-focused Canadian energy corporation that actively develops, produces and sells natural gas, crude oil and natural gas liquids. Trilogy's geographically concentrated assets are primarily high working interest properties that provide abundant low risk infill drilling opportunities and good access to infrastructure and processing facilities, many of which are operated and controlled by Trilogy. The Company continues to focus its exploitation efforts on play types with better economics, including those that contain oil and natural gas liquids and which utilize horizontal drilling and multi-stage fracture completion techniques.

Trilogy's successful operations are dependent upon several factors, including but not limited to, the price of energy commodity products, the effectiveness of the Company's approach to managing commodity price volatility, capital spending allocations, Trilogy's ability to maintain desired levels of production, control over its infrastructure, its efficiency in developing and operating properties and its ability to manage costs. As at the date hereof, significant uncertainty exists as to the extent and timing of any meaningful and sustained increase in the realized price for oil, gas and natural gas

liquids in North America. Trilogy is encouraged by industry's efforts to progress finding a balance to the commodity oversupply concern; however, the impact of these efforts may take an extended period to materialize into improved commodity prices.

In response to the aforementioned decrease in commodity prices, Trilogy quickly adopted several meaningful measures aimed at sustaining its financial health and to preserve shareholder value which included:

- The discontinuance of its monthly dividend for periods subsequent to November 2014;
- Reducing its capital expenditure budget for 2015 to levels in-line with expected cash flows from operations;
- Performing ongoing detailed reviews of its asset base to identify opportunities to increase operational efficiencies and reduce costs;
- The shut-in of production volumes deemed uneconomic at depressed commodity price levels;
- Negotiating with third party contractors and service providers to reduce Trilogy's cost of their goods and services;
- Implementing salary and other benefit reductions for its officers, directors and employees base; and
- The continued rationalization of assets. Throughout 2015, Trilogy has been able to further strengthen its balance sheet via the sale of certain assets for proceeds of approximately \$49 million.

Comparison of Third Quarter 2015 over Second Quarter 2015

Petroleum and Natural Gas Sales before Financial Instruments and Transportation – Oil sales decreased by \$7.0 million due to lower realized prices (\$5.7 million) and lower sales volumes (\$1.3 million). NGL sales decreased by \$7.3 million due to lower realized prices (\$5.4 million) and reduced sales volumes (\$1.9 million). Natural gas sales decreased by \$1.8 million due to reduced sales volumes (\$4.8 million), offset in part by higher realized prices (\$3.0 million). The lower production was attributed to natural production declines, net of new production additions, an oil asset disposition at the end of July, and suspensions in the quarter on the Alliance and TransCanada sales pipelines. Finally, to preserve value, Trilogy periodically shut-in significant gas and NGL production where pipeline disruptions influenced supply/demand forces, significantly reducing the realized market price for gas on Alliance's Canadian Receipt location (APC-CREC). Trilogy was able to realize a profit throughout this time, purchasing third party gas volumes and reselling into its higher priced sales contracts, which contributed to the increase in its realized price for gas.

Royalties – Royalties were lower over the prior quarter on reduced commodity prices.

Operating Costs – Operating costs were lower in the quarter primarily on the decrease in production and on reduced well workover and maintenance projects. Transportation costs also decreased on the lower production.

Third Quarter 2015 vs. Third Quarter 2014			Increase (De	ecrease)
(In thousand dollars except as otherwise indicated)	Q3 2015	Q3 2014	Value	%
Average sales volumes:				
Natural gas (Mcf/d)	96,506	127,679	(31,173)	(24)
Oil (Bbl/d)	5,227	8,051	(2,824)	(35)
Natural gas liquids (Boe/d)	3,779	5,794	(2,015)	(35)
Total (Boe/d)	25,090	35,125	(10,035)	(29)

⁽²⁾ Refer to the advisories on non-GAAP measures at the end of this MD&A.

Comparison of Third Quarter 2015 over Third Quarter 2014

Petroleum and Natural Gas Sales before Financial Instruments and Transportation – Oil sales decreased by \$43.9 million due to lower volumes (\$13.6 million) and on lower realized prices (\$30.3 million). NGL sales decreased by \$21.4 million due to lower realized NGL prices (\$15.8 million) and on lower sales volumes (\$5.6 million). Natural gas sales decreased by \$22.9 million due to lower realized prices (\$13.1 million) and on lower volumes (\$9.8 million). The lower production was attributed to significantly reduced capital spending through the latter part of 2014 and into 2015, which reduced the contribution of new well production in 2015 that normally replaces natural production declines.

Royalties – Royalties decreased on lower production and commodity prices. Royalty rates are, in part, sensitive to commodity prices and generally decrease as commodity prices fall. A lower liquids composition also contributed to a reduction in royalties in the quarter, as liquids generally attract a higher royalty rate.

Operating and Transportation Costs – Operating costs decreased on the lower production and liquids composition. Fewer well and facility workovers in the third quarter and the implementation of general cost reductions also lowered operating costs, partially offset by increased third party processing fees at non-operated plants. Finally, lower supply and service costs negotiated with counterparties also contributed to reduced costs in 2015. Transportation costs increased in the quarter in conjunction with the strengthening of the U.S. dollar for U.S. destined gas, increased tariffs coming into effect through 2015 and on higher costs incurred to secure short-term gas transportation contracts in response to continued third party sales gas pipeline disruptions in the quarter.

Year-to-date 2015 vs Year-to-date 2014			Increase (De	ecrease)
(In thousand dollars except as otherwise indicated)	YTD 2015	YTD 2014	Value	%
Average sales volumes:				
Natural gas (Mcf/d)	111,274	125,303	(14,029)	(11)
Oil (Bbl/d)	5,881	8,351	(2,470)	(30)
Natural gas liquids (Boe/d)	4,563	5,588	(1,025)	(18)

⁽¹⁾ Includes only realized financial instrument gains and losses on oil and gas commodity hedges

⁽²⁾ Refer to the advisories on non-GAAP measures at the end of this MD&A.

Comparison of Year-to-date 2015 over Year-to-date 2014

Petroleum and Natural Gas Sales before Financial Instruments and Transportation – Oil sales decreased by \$129.8 million due to lower realized prices (\$93.2 million) and on lower volumes (\$36.6 million). NGL sales decreased by \$46.9 million due to lower realized NGL prices (\$37.0 million) and on lower sales volumes (\$9.9 million). Natural gas sales decreased by \$83.2 million due to lower realized prices (\$70.8 million) and on lower volumes (\$12.4 million). The lower production was attributed primarily to lower capital spending from the latter part of 2014 through 2015, which reduced the contribution of new well production in 2015 that normally replaces natural production declines.

Royalties – The decrease in Trilogy's effective royalty rate was attributed to the significant drop in all commodity prices. Royalty rates are, in part, sensitive to commodity prices and generally decrease as commodity prices fall. Lower production and a lower liquids composition also contributed to a reduction in royalties in 2015, as liquids generally attract higher royalty rates.

Operating and Transportation Costs – Operating costs decreased on the lower production and liquids composition. Fewer well and facility workovers and the implementation of general cost reductions also lowered operating costs, partially offset by increased third party processing fees at non-operated plants. Finally, lower supply and service costs negotiated with counterparties also contributed to reduced costs in 2015. Transportation costs increased in the quarter in conjunction with the strengthening of the U.S. dollar for U.S. destined gas, increased tariffs coming into effect through 2015 and on higher costs incurred to secure short-term gas transportation contracts in response to continued third party sales gas pipeline disruptions through the year.

Depletion and Depreciation Expense

	Thre	e Months E	Nine Months Ended		
(In thousand dollars except as otherwise indicated)	September 30, 2015	June 30, 2015	September 30, 2014	September 30, 2015	September 30, 2014
Reported amount	42,764	49,547	53,439	149,818	159,762
Expense per sales volume (\$/Boe)	18.53	18.82	16.54	18.93	16.81

The change in depletion and depreciation expense over the above periods was primarily a function of the production levels in the respective periods relative to the Company's estimated oil and gas reserves on a proved developed producing basis. Lower production in the third quarter of 2015 over the prior quarter contributed to a reduction in the related depletion expense. Year over year, depletion decreased on the lower production volumes offset, in part, by an increase on a unit of production basis as downward technical reserve revisions, primarily on the Kaybob Montney oil pool, and reserve reductions associated with price changes under Trilogy's Aux Sable NGL Recovery agreement, reduced reserve estimates on which depletion is calculated.

Exploration and Evaluation Expenditures

	Thre	e Months E	Nine Months Ended		
(In thousand dollars except as otherwise indicated)	September 30, 2015	June 30, 2015	September 30, 2014	September 30, 2015	September 30, 2014
Expired mineral leases	772	634	620	2,889	2,420
Impairments	-	3,417	-	3,417	-
Geological and geophysical	2	1	539	(14)	1,506
Exploration and evaluation expenses	774	4,052	1,159	6,292	3,926
Expense per sales volume (\$/Boe)	0.34	1.54	0.36	0.80	0.41

Exploration and evaluation expenditures consist of the costs of expired leases, impairments on exploratory wells and geological and geophysical costs. Exploratory wells, by their nature, have increased risks and uncertainties that could translate into cost over-runs and reduced production and reserve additions. Impairments are a reflection of these challenges and represent costs incurred in excess of the benefit Trilogy expects to obtain from the well. Early-stage exploration activities and their associated costs progress Trilogy's knowledge base in the play, with an ultimate goal of extracting, developing and producing oil and gas reserves at attractive returns. Refer to Note 7 and 8 of the Interim Financial Statements for more information on exploration and evaluation activities and impairments thereon. The change in exploration and evaluation expenditures between the above periods was due mainly to impairments recorded on two exploratory wells in the second quarter of 2015 and on varying levels of seismic expenditures incurred.

General and Administrative Expenses

	Thre	e Months E	nded	Nine Mon	ths Ended
(In thousand dollars except as otherwise indicated)	September 30, 2015	June 30, 2015	September 30, 2014	September 30, 2015	September 30, 2014
Salaries and other benefits	6,136	6,479	7,054	19,986	21,091
Office and communications	1,098	1,141	1,170	3,390	3,404
Corporate and other	472	824	613	2,092	2,521
Overhead recoveries and reclassifications to operating costs	(4,360)	(4,891)	(4,943)	(14,642)	(17,731)
Reported amount	3,346	3,554	3,896	10,825	9,285
Expense per sales volume (\$/Boe)	1.45	1.35	1.21	1.37	0.98

General and administrative expenses were lower over the prior quarters, primarily on a decrease in certain salaries and benefits costs and through negotiated reductions for consulting services. The decreases were offset, in part, by lower overhead recoveries on reduced Company operated capital spending. On a per unit of production basis, general and administrative expenses increased, in part, on reduced production through 2015. Year over year, general and administrative expenses were higher mainly due to lower overhead recoveries on significantly reduced Company operated capital expenditures and repair and maintenance projects, partially offset by the impact of certain salary and benefit cost reduction measures, negotiated reductions for consulting services and reduced corporate and legal costs.

Share Based Compensation

	Thre	e Months E	Nine Months Ended		
	September 30, 2015	June 30, 2015	September 30, 2014	September 30, 2015	September 30, 2014
(In thousand dollars except as otherwise indicated)					
Share Incentive Plan	(162)	(619)	1,078	(249)	2,584
Share Option Plan	2,987	3,989	3,601	9,689	10,479
Reported Amount	2,825	3,370	4,679	9,440	13,063
Expense per sales volume (\$/Boe)	1.22	1.28	1.45	1.19	1.37

Share based compensation expense in 2015 was significantly lower than in prior years as the Company reduced actual grants under the Share Incentive Plan for 2014 as compared to previous periods' estimates, in addition to reducing, in the third quarter, its estimated 2015 grant. Regarding the Company's Share Option Plan, lower fair values granted in 2015 and the related amortization thereon also contributed to the decrease over the prior year. Changes in the share price, risk free interest rates, volatility assumptions, dividend yields, and expected life of the options on grant date will impact the associated fair value attributed to an option. Refer to Note 12 of the Interim Financial Statements for more information on share based compensation expense.

Interest, Financing, and Accretion Charges

	Thre	e Months E	Nine Months Ended		
(In thousand dollars except as otherwise indicated)	September 30, 2015	June 30, 2015	September 30, 2014	September 30, 2015	September 30, 2014
Accretion on decommissioning and restoration liability	1,251	1,235	1,561	3,710	4,600
Interest and other finance costs ⁽¹⁾	9,328	9,204	10,246	27,466	29,118
Expense per sales volume (\$/Boe)	4.04	3.50	3.17	3.47	3.06

⁽¹⁾ Includes the amortization of financing fees

Accretion charges represent the increase in the decommissioning and restoration liability associated with the passage of time. Accretion on the Company's decommissioning and restoration liability for three months ended September 30, 2015 was consistent with the prior quarter. Year over year, accretion was lower primarily as a result of a reduction in the long-term interest rate used to present value the related liability in 2015 over 2014.

Interest expense for the third quarter of 2015 was higher over the prior quarter primarily on increased amortization of lender financing charges under the Company's credit facility, partially offset by lower interest on reduced borrowings upon the application of asset disposition proceeds after July 2015. Interest was lower in 2015 as compared to 2014 on reduced lender margins and bankers' acceptance interest rates, partially offset by an increase in average debt levels in 2015 over 2014. For additional information on Trilogy's long-term debt, refer below under the "Long-term Debt" section of this MD&A and to Note 10 of the Interim Financial Statements.

Impairments

	Thre	Nine Months Ended			
	September 30, 2015	June 30, 2015	September 30, 2014	September 30, 2015	September 30, 2014
(In thousand dollars except as otherwise indicated)					
Property, plant, and equipment	102,049	13,549	-	115,598	-

Trilogy recorded impairments in the second and third quarters of 2015 to its property, plant, and equipment. The impairments were pervasive to most of Trilogy's Cash Generating Units in the Kaybob and Grande Prairie areas of Alberta and were attributable to a significant reduction in the forecast price for gas, natural gas liquids and oil. Reductions in the forecasted price of oil and gas significantly reduced the revenue stream and related profit margin of the reserves. Lower profitability will also generally result in a reduction to the estimated recoverable reserves of a well, all of which reduce the present value of the reserves which are measured against the related net book value of assets. Refer to Note 8 of the Interim Financial Statements for further disclosures.

Risk Management

Financial Risks

Trilogy's main financial risks include credit risk, liquidity risk, commodity price risk, interest rate risk and foreign exchange risk, and are discussed in detail in the notes to Trilogy's 2014 Annual Financial Statements, the advisories and other sections of this MD&A, as well as the Company's Annual Information Form.

The financial instruments outstanding on the applicable balance sheet dates are recognized at fair value on Trilogy's balance sheet. The change in the fair value of outstanding financial instruments, which are classified as financial assets and liabilities at fair value through profit or loss, are presented as an unrealized gain (loss) on financial instruments in the

Consolidated Statement of Comprehensive Income (Loss). Gains or losses arising from monthly settlement with counterparties are presented as a realized gain (loss) on financial instruments.

The amounts of unrealized and realized gain (loss) on financial instruments during the periods were as follows:

	Three Months Ended Nine Months Er					
(In thousand dollars except as otherwise indicated)	September 30, 2015	June 30, 2015	September 30, 2014	September 30, 2015	September 30, 2014	
Realized gain (loss) on financial instruments	(322)	89	(708)	(511)	(8,575)	
Unrealized gains (loss) on financial instruments	13,227	544	9,613	13,044	6,678	
Total gain (loss) on financial instruments	12,905	633	8,905	12,533	(1,897)	
Realized gain (loss) on financial instruments (\$/Boe)	(0.14)	0.03	(0.22)	(0.06)	(0.90)	

Trilogy may enter into oil, gas, power, interest, and foreign exchange contracts to manage its exposure to fluctuations in the price of oil, gas, electricity, interest, and foreign exchange rates. Trilogy also enters into drilling and other service contracts to secure access to these services and to manage exposure to pricing fluctuations thereon. Refer to Note 18 and 19 of the Interim Financial Statements for more information on realized and unrealized financial instruments gains and losses.

The fair value accounting of financial instruments causes significant fluctuations in the unrealized gain (loss) on financial instruments due to the volatility of energy commodity prices, interest and foreign exchange rates during the period. The fair value of financial instruments as at the balance sheet date will change in the future as a result of changes in these economic benchmarks upon which the fair value is primarily based, and therefore, the amount actually realized from financial instruments will vary from such fair value.

The following is a summary of the derivative contracts in place as at the date of this report:

Power

Financial Forward Sale					
Term	MW/h	Average CAD Price/MW/h			
2015 through 2016	6	\$50.44

As at September 30, 2015, the market value of the crude derivative contracts were estimated at \$12.5 million.

Operational and Other Risks

Trilogy is subject to various risks and uncertainties including those relating to its operations, environment, and other risks as discussed in the Advisories and other sections of this MD&A, as well as the Company's Annual Information Form.

Liquidity and Capital Resources

	September	December
(In thousand dollars except as otherwise indicated)	30, 2015	31,2014
Current liabilities net of current assets	24,157	50,463
Long-term debt	650,090	701,140
Net debt ⁽¹⁾	674,247	751,603
Shareholders' equity	464,872	572,135
Total	1,139,119	1,323,738

⁽¹⁾ Refer to the advisories on non-GAAP measures at the end of this MD&A.

Refer to Note 17 of the Interim Financial Statements and Note 22 of the Annual Financial Statements for further disclosures on liquidity and capital management.

Working Capital

The working capital deficiency is funded by cash flow from operations and draw-downs from the Company's Revolving Credit Facility. Fluctuations in Trilogy's working capital deficit arises primarily on production levels, commodity price changes, capital expenditure levels and valuation changes in its derivative financial instruments.

Long-term Debt

Long-term debt represents the outstanding draws from Trilogy's Revolving Credit Facility in addition to borrowings under its Senior Unsecured Notes as described below and in Note 10 of Trilogy's Interim Financial Statements. Timing differences between capital expenditures made and any related operational benefit thereon will create substantial volatility in Trilogy's debt levels. Asset dispositions and acquisitions will also significantly impact debt levels at any given time.

Revolving Credit Facility

Trilogy's bank debt outstanding under its Revolving Credit Facility was \$354.8 million (before prepaid interest and unamortized financing costs) as at September 30, 2015. The credit facility is with a syndicate of Canadian banks. Borrowing under the facility bears interest at the lenders' prime rate, bankers' acceptance rate or London Interbank Offered Rate, plus an applicable margin. Trilogy's total commitments of \$663, as at September 30, 2015, consisted of:

- A working capital tranche of \$35 million;
- A revolving tranche of \$503 million, and;
- A development facility in the amount of \$125 million.

Amounts drawn on the working capital and revolving tranches are due upon their maturity on April 30, 2017, while amounts drawn on the development facility, if any, are due upon its maturity on June 30, 2016, unless subsequently renewed. Initial and on-going borrowings from the development facility are only available for the development of its oil and Duvernay reserves to the extent that:

- The closing crude spot price exceeds an average of US\$70 a barrel (WTI) for a preceding sixty day period; and
- The Company maintains its 60 day average historical production volumes in excess of 95 percent of forecasted production (normalized to exclude third party and weather related production delays).

No amounts have been drawn under the development facility as of September 30, 2015.

The Company's quarterly financial covenants are as follows:

A ratio of "Senior Debt" to "Adjusted EBITDA" for the twelve month period of not greater than 3.00 for all fiscal quartersended except as provided:

- 3.50 at December 31, 2015, March 31, 2016, and June 30, 2016; and
- 3.25 at September 30, 2016, December 31, 2016, and March 31, 2017.

A ratio of "Consolidated Debt" to "Adjusted EBITDA" for the twelve month period of not greater than 4.00 for all fiscal quarters-ended except as provided:

- 6.00 at December 31, 2015, March 31, 2016, and June 30, 2016; and
- 5.50 at September 30, 2016, December 31, 2016, and March 31, 2017.

The credit facility has the following significant terms:

- The Revolving Credit Facility is subject to semi-annual borrowing base reviews, beginning approximately in April and September of each year. Dispositions and acquisitions of assets may also immediately increase or decrease the borrowing base, respectively. In the event that the lending syndicate reduces the borrowing base below the amount drawn at the time of the redetermination, Trilogy has 60 days to eliminate any shortfall by providing additional security or guarantees satisfactory to the lenders or by repaying amounts in excess of the redetermined borrowing base;
- Advances drawn on the credit facility are secured by a fixed and floating debenture charge over the assets of the Company.

As at September 30, 2015, the Company is in compliance with all debt covenants. The effective interest rate on Trilogy's Revolving Credit Facility for the nine month period (excluding other financing costs) was 2.78 percent. (September 30, 2014 – 3.80 percent). The Company has letters of credit totalling \$12.1 million as at September 30, 2015 (December 31, 2014: \$9.6 million) which reduce the amount available for draw.

Senior Unsecured Notes

In December 2012 the Company issued \$300 million principal amount of 7.25 percent Senior Unsecured Notes due December 13, 2019 (the "Notes"). Proceeds from the issuance were used to reduce existing indebtedness under Trilogy's Revolving Credit Facility. Transaction costs of \$5.8 million were capitalized and will be amortized into income over the life of the debt using the effective interest rate method. Refer to Note 15 of the Annual Financial Statements.

Interest is payable semi-annually in arrears on June 13 and December 13 of each year. The Notes rank pari passu with all of Trilogy's senior indebtedness and are subordinated to all secured indebtedness, which includes Trilogy's Revolving Credit Facility indebtedness.

The Company has the option, prior to December 13, 2015, to redeem the Notes as follows:

- up to an aggregate of 35 percent of the principal amount may be redeemed at 107.25 percent, plus applicable interest with the net cash proceeds of any equity offerings.
- some or the entire principal amount may be redeemed, generally, at a make-whole price to the holders of the Notes, plus applicable interest, subject to certain conditions.

The Company also has the option to redeem the Notes at a price of 103.625 percent, beginning December 13, 2015, decreasing down to 100 percent after December 13, 2018.

To the extent the Company experiences a change of control, each holder of the Notes will have the right to require the Company to repurchase, at 101 percent, all or part of such holder's Notes. The notes were initially recognized at fair value net of transactions costs and are subsequently measured at amortized cost using an effective interest rate of 7.53 percent (September 30, 2014 – 7.53 percent).

The Note indenture contains covenants that, among other things, limit the ability of the Company to:

- incur additional indebtedness;
- make restricted payments, including certain investments and the payment of dividends;
- grant certain liens;
- enter into certain transactions with affiliates; and
- effect asset sales, mergers and consolidations.

Contractual Obligations

For a detailed account of Trilogy's commitments, refer to Note 25 of the 2014 Annual Consolidated Financial Statements and related Management Discussion and Analysis. No material change occurred as at September 30, 2015 in respect of Trilogy's estimated contractual obligations from those disclosed at December 31, 2014.

Shares, Options and Rights

The following provides a continuity of outstanding share capital:

	Common Shares ⁽¹⁾	Non-Voting Shares	Total	Amount
Shares as at December 31, 2013	99,338,484	25,835,862	125,174,346 \$	1,092,727
Issued - Share Option Plan	717,500	-	717,500	8,670
Share issuance	5,000,000	(5,000,000)	-	-

Excess of cash flow from operations over dividends declared	28,894	20,388	90,641	96,570	229,541	
Excess (deficiency) of net earnings (loss) over dividends	(70,929)	(26,881)	13,479	(118,412)	32,719	

⁽¹⁾ Refer to the advisories on non-GAAP measures at the end of this MD&A.

Trilogy's dividends to its Shareholders, to the extent declared, are funded by cash flow from operating activities with the remaining cash flow directed towards capital spending and, if applicable, the repayment of debt. To the extent that the excess of cash flow from operations over dividends is not sufficient to cover capital spending, the shortfall is generally funded by drawdowns from Trilogy's credit facilities. In conjunction with the low commodity price environment (refer to the Business Overview and Strategy in this MD&A), Trilogy discontinued its monthly dividend subsequent to November 2014.

Capital Expenditures

	Three	Months En	ded	Nine Months Ended		
	September	June	September	September	September	
(In thousand dollars except where stated otherwise)	30, 2015	30, 2015	30, 2014	30, 2015	30, 2014	
Land	24	5	18	82	238	
Geological and geophysical	3	-	540	(14)	1,506	
Drilling, completions, and tie-ins	15,095	9,320	68,342	67,595	314,931	
Production equipment and facilities	2,011	1,609	12,039	7,665	45,795	
	17,132	10,933	80,939	75,328	362,470	
Proceeds from property dispositions	(44,922)	(4,000)	(1)	(48,922)	(22)	
Property acquisitions	33	(287)	3	170	4,241	
Corporate assets	22	(2)	176	62	683	
Net capital expenditures	(27,735)	6,644	81,117	26,638	367,372	

Capital expenditures in 2015 decreased significantly over the prior year pursuant to the Company's reduced 2015 capital program and commitment to preserve shareholder value and promote financial sustainability during the current low commodity price environment. Trilogy disposed of, in the third quarter, a working interest in assets for net proceeds of \$45 million. In addition, undeveloped acreage was disposed of in the second quarter for proceeds of \$4 million. The dispositions were in support of the Company's debt reduction strategy and its continued focus on its Montney and Duvernay plays.

Wells Drilled

	Three Months Ended						Nine Mon	ths Ended		
(Number of wells)	September	30, 2015	June 30	, 2015	September	r 30, 2014	September	30, 2015	Septembe	r 30, 2014
	Gross ⁽¹⁾	Net ⁽²⁾								
Natural gas	7	1.8	-	-	3.0	1.9	15	6.0	26	16.0
Oil	-	-	-	-	14.0	9.9	5	3.1	38	32.0
Total	7	1.8	-	-	17.0	11.8	20	9.0	64	48.0

⁽¹⁾ "Gross" wells means the number of wells in which Trilogy has a working interest or a royalty interest.

⁽²⁾ "Net" wells means the aggregate number of wells obtained by multiplying each gross well by Trilogy's percentage of working interest.

Income Taxes

In January 2014, the Company received a letter from the Canada Revenue Agency ("CRA") advising Company that, subject to submissions by Trilogy, it was proposing to reassess Company's income tax filings related to its 2010 conversion from an income trust to a corporation. The proposed reassessments sought to disallow certain tax pools in the amount of \$728 million. In 2015, Trilogy and the CRA ultimately resolved the dispute through an agreement which resulted in:

- no cash tax outlay by Trilogy for the taxation years 2010 through 2014;
- a provision to Trilogy's Statement of Comprehensive Income for the year ended December 31, 2014 to write down a portion of Trilogy's deferred tax asset;
- the elimination of potentially costly and time consuming court proceedings; and
- management being able to focus more fully on Trilogy's operations to enhance shareholder value.

In 2015, Trilogy's corporate tax rate was increased by 2 percent pursuant to legislative announcements made by the Alberta government. The Company recorded a future income tax recovery (year to date 2015) of \$40.9 million (future income tax expense of \$26.4 million over the same period in 2014). The Company's statutory tax rate of 27 percent was decreased to an effective tax rate of 26 percent as a result of amounts included in financial statement income that are not applicable for tax purposes. Such amounts primarily include share based compensation expense. Refer to Note 9 of the Interim Financial Statements for additional tax disclosures.

Trilogy's management estimates that it will not be cash taxable for the foreseeable future given existing tax pool balances and expectations of, among other things, future capital expenditure levels and funds flow from operations.

Related Party Transactions

Trilogy had certain transactions with Paramount Resources ("Paramount"), a wholly-owned subsidiary of Paramount Resources Ltd. which owns approximately 15.2 percent of the equity in the Company. The amount of expenses billed and accrued in respect of services provided by Paramount to the Company under a services agreement was \$0.3 million for the nine months ended September 30, 2015. The Company and Paramount also had transactions with each other arising from normal business activities. These transactions were recorded at the fair value of the transacted amount.

Outlook information

Trilogy has continued to develop its land position and technical expertise in large, unconventional liquids-rich gas and oil resource plays in the Deep Basin. The Company believes that it has accumulated a large inventory of high quality vertical and horizontal drilling prospects that should provide the opportunity, in the long term, to grow annual production and replace produced reserves.

Given the impact of property divestitures, sales gas pipeline outages and restrictions, and the anticipated constraints through the balance of the year, Trilogy is adjusting its 2015 annual guidance as follows:

Average production	28,000 Boe/d (~30 percent oil and natural gas liquids)
Average operating costs	\$9.50 /Boe
Capital expenditures	\$100 million

In the current natural gas and crude oil commodity price environment, Trilogy expects to manage its balance sheet through continued production, asset rationalization and disciplined capital spending. As a growth-oriented corporation, Trilogy must remain flexible in order to respond to changes in commodity prices and believes it can manage its assets prudently through the year as its production base declines. Trilogy will continue to evaluate alternatives to generate additional value from its Duvernay assets which may include a sale or joint venture of some or all of its Duvernay assets in the Kaybob area. Trilogy remains confident in its strategy, its high quality assets and the proven expertise of its employees.

Quarterly Financial Information

(In thousand dollars except per share amounts)	Q3 2015	Q2 2015	Q1 2015	Q4 2014
Revenue after financial instruments, royalties and other income	74,874	77,652	80,686	125,683
Earnings (loss) before tax	(95,826)	(35,146)	(28,447)	(54,464)

Earnings (loss) per Share (in full amounts):				
Basic	(0.56)	(0.21)	(0.16)	(1.06)
Diluted	(0.56)	(0.21)	(0.16)	(1.06)
	Q3 2014	Q2 2014	Q1 2014	Q4 2013
Revenue after financial instruments, royalties and other income	147,685	147,690	134,581	110,992
Earnings (loss) before tax	36,714	37,612	24,396	(10,531)
Net earnings (loss)	26,700	28,234	17,386	(8,740)
Earnings (loss) per Share (in full amounts):				
Basic	0.21	0.22	0.14	(0.07)
Basic	•.= .			

The fluctuations in Trilogy's revenue and net earnings from quarter to quarter are primarily caused by variations in production volumes, realized oil and natural gas prices and the related impact on royalties, realized and unrealized gains/losses on financial instruments. Impairments and other charges to deferred tax assets, exploratory and evaluation assets, property, plant, and equipment, goodwill and expiry of mineral land leases can also create significant volatility in Trilogy's net earnings. Please refer to the Results of Operations and other sections of this MD&A for detailed financial and operational variances between reporting periods and to Trilogy's previously issued annual MD&A for changes in prior periods.

Critical Accounting Estimates

The historical information in this MD&A is based primarily on the Company's consolidated financial statements, which have been prepared in Canadian Dollars in accordance with IFRS. The application of IFRS requires management to make estimates, judgments and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities, if any, at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Trilogy bases its estimates on historical experience and various other assumptions that are believed to be reasonable under the circumstances. Actual results could differ materially from these estimates

under different assumptions or conditions. The following are the estimates and judgments applied by management that most significantly affect the Company's financial statements:

Reserves Estimation

The capitalized costs of oil and gas properties are amortized to expense on a unit-of-production basis at a rate calculated by reference to proved developed producing reserves determined in accordance with National Instrument 51-101 and the Canadian Oil and Gas Evaluation Handbook. Commercial reserves are determined using best estimates of oil and gas in place, recovery factors, future development and extraction costs and future oil and gas prices. Proved reserves are those reserves that have a high degree of certainty (at least 90% confidence at the aggregate corporate level) of being recoverable under existing economic and political conditions, with existing technology. Probable reserves are based on geological and/or engineering data similar to that used in estimates of proved reserves, but technical, contractual, or regulatory uncertainties preclude such reserves from being classified as proved. Aggregate corporate proved plus probable reserves are attributed to known accumulations and it is equally likely that the actual remaining quantities to be recovered will be greater or less than the reserves estimated.

Exploration and Evaluation Expenditures

Exploration and evaluation costs are initially capitalized with the intent to establish commercially viable reserves. Exploration and evaluation assets include undeveloped land and costs related to exploratory wells. Exploration costs related to geophysical and geological activities are immediately charged to income as incurred. The Company is required to make estimates and judgments about future events and circumstances regarding the economic viability of extracting the underlying resources. The costs are subject to technical, commercial and management review to confirm the continued intent to develop and extract the underlying resources. Changes to project economics, resource quantities, expected production techniques, unsuccessful drilling, expired mineral leases, production costs and required capital expenditures are important factors when making this determination. If an exploration and evaluation project is determined to be unsuccessful, all associated costs in excess of the expected future benefit are charged to net income. If commercial reserves are established, the relevant costs are transferred from exploration and evaluation to development and production assets which are classified as property, plant, and equipment. Assets are reviewed for impairment prior to any such transfer. Refer to Note 7 of the Interim Financial Statements for further details.

Impairment of Non-financial Assets

Impairment is evaluated at the cash-generating unit ("CGU") level. The determination of CGU's requires judgment in defining the smallest identifiable group of assets that generate cash inflows that are largely independent of the cash inflows from other assets or groups of assets. CGU's have been determined based on similar geological structure, shared infrastructure, geographical proximity, commodity type and similar exposures to market risks. The recoverable amounts of Trilogy's cash-generating units and individual assets have been determined based on fair values less costs of disposal. This calculation requires the use of estimates and assumptions. Oil and gas prices and other assumptions will change in the future, which may impact Trilogy's recoverable amount calculated and may therefore require a material adjustment to the carrying value of property, plant and equipment and goodwill. Trilogy monitors internal and external indicators of impairment relating to its exploration and evaluation assets, property, plant and equipment and goodwill. Refer to Note 10 and 11 of the 2014 Annual Financial Statements for further details about methods and assumptions used in estimating net recoverable amounts.

Decommissioning and Restoration Costs

Decommissioning and restoration costs will be incurred by Trilogy at the end of the operating lives of Trilogy's oil and gas properties. The ultimate decommissioning and restoration costs are uncertain and cost estimates can vary in response to many factors including assumptions of inflation, present value discount rates on future liabilities, changes to relevant legal requirements and the emergence of new restoration techniques or experience at other production sites. The expected timing and amount of expenditures can also change, for example, in response to changes in reserves or changes in laws and regulations or their interpretation. Refer to Note 11 of the Interim Financial Statements for further details.

Share-based Payments

Trilogy measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date they are granted. Estimating fair value requires the determination of the most appropriate valuation model for a grant of equity instruments, which is dependent on the terms and conditions of the grant. This also requires the determination of the most appropriate inputs to the valuation model including the expected life of the option, risk free interest rates, volatility and dividend yield and making assumptions about them. Refer to Note 12 of the Interim Financial Statements for further details.

Deferred Income Tax Assets

Trilogy recognizes a benefit related to deferred income tax assets. Assessing the recoverability of deferred income tax assets requires Trilogy to make significant estimates related to expectations of future taxable income based on forecasted cash flows from operations. Trilogy also makes interpretations and judgements on uncertain tax positions of applicable tax laws. Such judgements include determining the likelihood of Trilogy's tax positions being successfully challenged by tax authorities based on information from relevant tax interpretations and tax laws. To the extent such interpretations are challenged by the tax authorities or future cash flows and taxable income differ significantly from estimates, the ability of Trilogy to realize its deferred tax assets recorded at the balance sheet date may be compromised. Refer to Note 9 of the Interim Financial Statements for further details.

Financial Instruments

The estimated fair values of financial assets and liabilities, by their very nature, are subject to measurement uncertainty due to their exposure to credit, liquidity and market risks. Furthermore, the Company may use derivative instruments to manage oil and gas commodity price, foreign currency, power, and interest rate exposures. The fair values of these derivatives are determined using valuation models which require assumptions concerning the amount and timing of future cash flows and discount rates. Management's assumptions rely on external observable market data including quoted commodity prices and volatility, interest rate yield curves and foreign exchange rates. The resulting fair value estimates may not be indicative of the amounts realized or settled in current market transactions and as such are subject to measurement uncertainty. Refer to Note 17, 18 and 19 of the Interim Financial Statements for further details.

New Accounting Pronouncements

There were no new accounting standards that were effective January 1, 2015. Future accounting pronouncements with a potential impact on the Company are summarized in Note 5 of the 2014 Annual Consolidated Financial Statements.

Internal Control over Financial Reporting

There were no changes in Trilogy's internal controls over financial reporting that occurred during the period covered by this MD&A that has materially affected, or is reasonably likely to materially affect, its internal controls over financial reporting.

Advisories

Certain statements included in this document (including this MD&A and the Review of Operations) constitute forward-looking statements under applicable securities legislation. Forward-looking statements or information typically contain statements with words such as "anticipate", "believe", "expect", "plan", "intend", "estimate", "propose", "budget", "goal", "objective", "possible", "probable", "projected", "scheduled", or state that certain actions, events or results "may", "could", "should", "would", "might" or "will" be taken, occur or be achieved, or similar words suggesting future outcomes or statements regarding an outlook. Forward-looking statements or information in this document include but are not limited to statements regarding:

• business strategy and objectives for 2015 and

beyond (including the development of the Kaybob

Montney oil and gas pools, the Duvernay shale play and Trilogy's Grande Prairie assets);

- expectations regarding future commodity prices for crude oil, natural gas, NGLs and related products;
- forecast capital expenditures and the amount, timing and allocation thereof (including budgeted expenditures for the Duvernay shale play, the Montney oil and gas pools, and Grande Prairie assets);
- estimates of future production volumes and growth, the sources and timing thereof and the relative content of crude oil, natural gas and NGLs therein;
- Management's intention to reduce costs, control capital spending, preserve capital, maintain financial health and live within cash flow;
- statements regarding management's intention to rationalize assets;
- Trilogy's intention to generate additional value from its Duvernay assets including through potential sales and/or joint ventures;
- estimated reserves, reserve replacement, and the undiscounted and discounted present value of future net revenues therefrom (including the forecasted prices and costs and timing of expected production volumes and future development capital);
- development plans and operational plans and strategies (including plans for drilling and completion programs) and the anticipated timing, cost, sources of funding, and expected benefits thereof;
- the potential for development of Trilogy's assets (including the Kaybob Montney oil and gas pools and the Duvernay shale gas development I, among others); estimates of drilling inventories; tenure, prospectivity of Trilogy's current and future land holdings; and the nature and timing of Trilogy's plans to further maintain, delineate and exploit these and

other assets;

- projected capacity availability at Trilogy-operated and third party facilities and pipelines, run-times, expected facility downtime and timing and extent of associated impact on production;
- operating, finding and development, decommissioning, restoration and other costs and the anticipated results of Trilogy's cost cutting measures;
- royalty rates and applicability of government incentive and royalty programs affecting Trilogy;
- approach to declaring dividends;
- future expenditures and future allowances relating to environmental matters and Trilogy's ability to comply with same;
- projections as to cash flow, funds flow from operations, future earnings and other measures of profit;
- Trilogy's expectations regarding the size and term of its bank credit facility, access to capital and the cost of borrowing;
- pro-forma debt levels and reduction of net debt;
- projected results of hedging contracts and other financial instruments;
- income taxation of Trilogy; estimates of tax assets, tax pools and Trilogy's future taxability; and the effect of the resolution of the tax dispute with the CRA on remaining tax pools and deferred tax assets;
- the expected impact of new accounting pronouncements; and
- other expectations, beliefs, plans, goals, objectives, assumptions, information and statements about possible future events, conditions, and results of operations or performance.

Such forward-looking statements or information are based on a number of assumptions which may prove to be incorrect. In addition to other assumptions identified in this document, assumptions have been made regarding, among other things:

- future crude oil, natural gas, condensate, natural gas liquids and other commodity pricing and supply;
- foreign currency, exchange and interest rates;
- royalty rates, taxes and capital, operating, general & administrative and other costs;
- general business, economic, industry and market conditions;
- geology applicable to Trilogy's land holdings;
- current production forecasts and the relative content of crude oil, natural gas and NGLs therein;
- the ability of Trilogy and its industry partners to obtain drilling and operational results,

improvements and efficiencies consistent with expectations;

- well economics;
- decline rates;
- projected capital investment levels and the successful and timely implementation of capital projects;
- anticipated timelines and budgets being met in respect of drilling programs and other operations;
- the ability of Trilogy to obtain on acceptable terms the required capital to finance its exploration, development and other operations;
- credit facility and terms and anticipated

amendments to financial covenant limits thereunder;

- the ability of Trilogy to repay its debt when due;
- the ability of Trilogy to obtain equipment, services, supplies and personnel in a timely manner and at an acceptable cost to carry out its evaluations and activities;
- the ability of Trilogy to secure adequate product processing, transportation, fractionation and storage capacity on acceptable terms or at all and assumptions regarding the timing and costs of other outages and turnarounds;
- the ability of Trilogy to market its oil, natural gas, condensate, other natural gas liquids and other products successfully to current and new customers;
- cash flow consistent with expectations;
- continuity of government royalty and regulatory

regimes, including drilling and royalty incentive programs and their application to Trilogy's operations;

- the timely receipt of required regulatory approvals;
- continuity of the mutually beneficial NGL Recovery Agreement with Aux Sable Canada LP and pricing thereunder until November 2015 and Trilogy's ability to thereafter enter into one or more other arrangements having, in the aggregate, less favorable terms relative to the existing Aux Sable Agreement;
- the continuation of assumed tax regimes, estimates and projections in respect of the application of tax laws and estimates of deferred tax amounts, tax assets and tax pools;
- the extent of Trilogy's liabilities; and
- other assumptions inherent in current guidance.

Although Trilogy believes that the expectations reflected in such forward-looking statements or information are reasonable, undue reliance should not be placed on forward-looking statements because Trilogy can give no assurance that such expectations will prove to be correct. Forward-looking statements or information are based on current expectations, estimates and projections that involve a number of risks and uncertainties which could cause actual results to differ materially from those anticipated by Trilogy and described in the forward-looking statements or information. These risks and uncertainties include but are not limited to:

- fluctuations in crude oil, natural gas, condensate and other natural gas liquids and commodity prices;
- fluctuations in foreign currency exchange rates and interest rates;
- the uncertainty of estimates and projections relating to future revenue, future production, NGLs yields, taxes, costs and expenses;
- the risks of the oil and gas industry, such as operational risks in exploring for, developing and producing crude oil, natural gas, condensate and other natural gas liquids, and market demand;
- risks and uncertainties involving the geology of oil and gas;
- the uncertainty of reserves and resource estimates;
- the ability of Trilogy to add production and reserves through development and exploration activities;
- Trilogy's ability to secure adequate product processing, transmission, transportation, fractionation and storage capacity on a timely basis or at all;
- potential disruptions or unexpected technical difficulties in designing, developing, or operating new, expanded, or existing facilities (including third party operated facilities);
- risks inherent in Trilogy's marketing operations, including credit and other financing risks and the risk that Trilogy may not be able to enter into

arrangements for the sale of its crude oil natural gas and/or natural gas liquids on acceptable terms or at all;

- the ability to generate sufficient cash flow from operations and obtain financing on acceptable terms to fund planned exploration, development, construction and operational activities and to meet current and future obligations, including costs of anticipated projects and repayment of debt;
- the possibility that Trilogy will not commence or complete a process to evaluate opportunities to advance its Duvernay shale assets in the near future or at all;
- uncertainties as to the availability and cost of financing, including Trilogy's ability to extend its credit facility on an ongoing basis;
- Trilogy's ability to maintain targeted or required ratios within its credit and debt arrangements, and the risks of not maintaining such required ratios, including early debt repayment and/or other penalties;
- volatile business, economic and market conditions;
- general risks related to strategic and capital allocation decisions, including potential delays or changes in plans with respect to exploration or development projects or capital expenditures and Trilogy's ability to react to same;

- availability of equipment, goods, services and personnel in a timely manner and at an acceptable cost;
- health, safety, security and environmental risks;
- The timing and cost of future abandonment and reclamation obligations and potential liabilities for environmental damage and contamination;
- environmental, regulatory and compliance risks including those potentially associated with greenhouse gases and hydraulic fracturing;
- weather conditions;
- the possibility that government policies, regulations or laws may change, including risks related to the imposition of moratoriums;
- the ability to obtain required governmental or regulatory approvals in a timely manner, and to enter into and maintain leases and licenses;
- uncertainty in amounts and timing of royalty payments and applicability of and change to royalty regimes and incentive programs including, without limitation, the Natural Gas Deep Drilling Program and the Drilling Royalty Credit Program;
- imprecision in estimates of product sales,

commodity prices, capital expenditures, tax pools, tax shelter, tax deductions available to Trilogy, changes to and the interpretation of tax legislation and regulations;

- uncertainty regarding results of objections to Trilogy's exploration and development plans by third party industry participants, aboriginal and local populations and other stakeholders;
- risks associated with existing and potential lawsuits, regulatory actions, audits and assessments;
- changes in land values paid by industry;
- risks associated with Trilogy's mitigation strategies including insurance and hedging activities;
- risks related to the actions and financial circumstances of Trilogy agents and contractors, counterparties and joint venture partners, including renegotiation of contracts;
- the ability of management to execute its business plan; and
- other risks and uncertainties described elsewhere in this document and in Trilogy's other filings with Canadian securities authorities, including its Annual Information Form.

The foregoing lists are not exhaustive. Additional information on these and other factors which could affect the Company's operations or financial results are included in the Company's most recent Annual Information Form and in other documents on file with the Canadian Securities regulatory authorities. The forward-looking statements or information contained in this document are made as of the date hereof and Trilogy undertakes no obligation to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable securities laws.

Non-GAAP Measures

Certain measures used in this document, including "adjusted EBITDA", "consolidated debt", "finding and development costs", "funds flow from operations", "operating income", "net debt", "operating netback", "payout ratio", "recycle ratio" and "senior debt" collectively the "Non-GAAP measures" do not have any standardized meaning as prescribed by IFRS and previous GAAP and, therefore, are considered Non-GAAP measures. Non-GAAP measures are commonly used in the oil and gas industry and by Trilogy to provide Shareholders and potential investors with additional information regarding the Company's liquidity and its ability to generate funds to finance its operations. However, given their lack of standardized meaning, such measurements are unlikely to be comparable to similar measures presented by other issuers.

"Adjusted EBITDA" refers to "Funds flow from operations" plus cash interest and tax expenses and certain other items that do not appear individually in the line items of the Company's financial statements.

"Consolidated debt" generally includes all long-term debt plus any issued and undrawn letters of credit, less any cash held.

"Finding and development costs" refers to all current year net capital expenditures, excluding property acquisitions and dispositions with associated reserves, and including changes in future development capital on a proved or proved plus probable basis. "Finding and development costs per Barrel of oil equivalent" ("F&D \$/Boe") is calculated by dividing finding and development costs by the current year's reserve extensions, discoveries and revisions on a proved or proved plus probable reserve basis. Management uses finding and development costs as a measure to assess the performance of the Company's resources required to locate and extract new hydrocarbon reservoirs.

"Funds flow from operations" refers to the cash flow from operating activities before net changes in operating working capital as shown in the consolidated statements of cash flows. Management utilizes funds flow from operations as a key measure to assess the ability of the Company to finance dividends, operating activities, capital expenditures and debt repayments.

"Operating income" is equal to petroleum and natural gas sales before financial instruments and bad debt expenses minus royalties, operating costs, and transportation costs. "Operating netback" refers to Operating income plus realized financial instrument gains and losses and other income minus actual decommissioning and restoration costs incurred. Operating income and operating netback are used by management to measure operating results of discrete oil and gas properties' performance without reference to capital and organizational structure and corporate and general administrative costs.

"Net debt" is calculated as current liabilities minus current assets plus long-term debt. Management utilizes net debt as a key measure to assess the liquidity of the Company.

"Payout ratio" refers to dividends divided by cash flow from operations. This measure assists in providing a more complete understanding of the Company's ability to fund future dividends to Shareholders from cash flow from operations.

"Recycle ratio" is equal to "Operating netback" on a production barrel of oil equivalent for the year divided by "F&D \$/Boe" (computed on a proved or proved plus probable reserve basis as applicable). Management uses this metric to measure the profitability of the Company in turning a barrel of reserves into a barrel of production.

"Senior debt" is generally defined as "Consolidated debt" but excluding any indebtedness under the Senior Unsecured Notes.

Investors are cautioned that the Non-GAAP measures should not be considered in isolation or construed as alternatives to their most directly comparable measure calculated in accordance with IFRS, as set forth above, or other measures of financial performance calculated in accordance with IFRS.

Numerical References

All references in this document and Trilogy's functional currency are in Canadian Dollars unless otherwise indicated. The columns on some tables in this document may not add due to rounding.

Oil and Gas Advisory

This document contains disclosure expressed as "Boe", "MBoe", "Boe/d", "Mcf/d", "MMcf/d", "MMcf/d", "Bcf", "Bbl", and "Bbl/d". All oil and natural gas equivalency volumes have been derived using the ratio of six thousand cubic feet of natural gas to one barrel of oil (6:1). Equivalency measures may be misleading, particularly if used in isolation. A conversion ratio of six thousand cubic feet of natural gas to one barrel of oil is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the well head. For Q3 2015, the ratio between Trilogy's average realized oil price and the average realized natural gas price was approximately 15:1 ("Value Ratio"). The Value Ratio is obtained using the Q3 2015 average realized oil price of \$52.23 (CAD\$/Bbl) and the Q3 2015 average realized natural gas price of \$3.41 (CAD\$/mcf). This Value Ratio is significantly different from the energy equivalency ratio of 6:1 and using a 6:1 ratio would be misleading as an indication of value.

The (i) reserves, (ii) future net revenue and related forecast prices and costs and (iii) production history and estimates disclosed herein and reported in Trilogy's independent reserves report for the year ended December 31, 2014 include certain of those NGL within Trilogy's natural gas stream that are currently, and are in the future expected to be, quantified or extracted and for which Trilogy is paid based on market rates. For such purposes, it has been assumed that (a) the NGL Volumes Recovery Agreement with Aux Sable Canada LP ("NGL Volumes Recovery Agreement") will be in place until November 30, 2015 and (b) after November 30, 2015, annual volumes of Trilogy's NGL sold under the NGL Volumes Recovery Agreement will be instead sold under one or more other arrangements having, in the aggregate, less favorable

terms relative to the existing agreement. As a result of such change in Trilogy's arrangements for selling its NGL, future net revenues from Trilogy's NGL are currently expected to be lower in the foreseeable future as it is anticipated that Trilogy will receive a smaller share of the market price for its NGL. As at December 31, 2014, the NGL sold under the NGL Volumes Recovery Agreement represented approximately 13.6% of Trilogy's proved plus probable NGL reserve volumes, approximately 2.8% of Trilogy's total proved plus probable reserve volumes, approximately 3.0% of the net present value of Trilogy's future net revenue before taxes discounted at 10% using forecast prices and costs and approximately 5.2% of Trilogy's production. If these NGL were instead reported as part of Trilogy's natural gas, it would increase Trilogy's natural gas reserves (since these are notionally reduced for shrinkage attributable to the extraction of these NGL) and decrease Trilogy's NGL reserves and production accordingly, but would have no effect on Trilogy's future net revenues.

Well Test Data: Well flow test data is not necessarily indicative of long-term performance or of ultimate recovery of reserves.

Additional Information

Trilogy's common shares are listed on the Toronto Stock Exchange under the symbol "TET". Additional information about Trilogy, including Trilogy's Annual Information Form, is available at www.sedar.com or at Trilogy's website www.trilogyenergy.com.

1. General

Trilogy Energy Corp. ("Trilogy" or the "Company") is a petroleum and natural gas-focused Canadian energy corporation that actively acquires, develops, produces and sells natural gas, crude oil and natural gas liquids. Trilogy's registered office is located at 1400, 332 – 6th Avenue SW, Calgary, Alberta and its petroleum and natural gas extractive operations are situated primarily in the Province of Alberta.

References are made to ("Shares"), consisting of common shares ("Common Shares") and non-voting shares ("Non-Voting Shares").

2. Basis of Preparation

The Company prepares its financial statements in accordance with Canadian generally accepted accounting principles ("GAAP") as set out in section I of the Handbook of the Canadian Institute of Chartered Accountants ("CICA Handbook") which requires publicly accountable enterprises to prepare their financial statements using International Financial Reporting Standards ("IFRS").

These condensed consolidated interim financial statements ("Interim Financial Statements") have been prepared in accordance with IFRS applicable to the preparation of interim financial statements, IAS 34 – Interim financial reporting ("IAS 34").

The policies applied in these Interim Financial Statements are based on IFRS issued and outstanding as of November 5, 2015, the date the Interim Financial Statements were approved for release by Trilogy's Audit Committee on behalf of Trilogy's Board of Directors.

The Interim Financial Statements note disclosures do not include all of those required by IFRS for annual financial statements. These Interim Financial Statements should be read in conjunction with the Company's "2014 Annual Consolidated Financial Statements".

The Interim Financial Statements have been prepared on a historical cost basis, except for certain financial instruments that have been measured at fair value (Note 18 and 19).

The Interim Financial Statements include the accounts of the Company and its wholly-owned subsidiaries as the Company obtains all of the economic benefits of the operations of its operating subsidiaries. All intercompany transactions, balances and unrealized gains and losses from intercompany transactions are eliminated on consolidation. Subsidiaries include those entities (including special purpose entities), which Trilogy controls by having the power to govern the financial and operating policies. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing control over another entity. Subsidiaries are fully consolidated from the date on which control is obtained and are de-consolidated from the date that control ceases.

3. Significant Accounting Judgments, Estimates and Assumptions

The Company makes estimates and assumptions concerning the future that may, by definition, differ from actual results. The estimates and judgments applied by management that most significantly affect the Company's financial statements include: reserve estimation, exploration and evaluation expenditures, impairment of non-financial assets, decommissioning and restoration costs, share-based payments, deferred income taxes, and financial instruments. These estimates and judgments have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within reporting periods. Additional information on these estimates and judgments are disclosed in Note 3 of the 2014 Annual Consolidated Financial Statements.

4. Summary of Significant Accounting Policies

The Interim Financial Statements of the Company follow the same accounting policies and basis of presentation as described in Note 4 of the 2014 Annual Consolidated Financial Statements.

5. New Accounting Pronouncements

There were no new accounting standards that were effective January 1, 2015. Future accounting pronouncements with a potential impact on the Company are summarized in Note 5 of the 2014 Annual Consolidated Financial Statements.

6. Property, Plant and Equipment

	Oil and Gas Properties	Corporate Assets	Total

Net carrying value			

The cost of property, plant and equipment includes amounts in respect of the provision for decommissioning and restoration obligations of \$189.8 million as at September 30, 2015 (December 31, 2014: \$193.9). Property, plant and equipment with a carrying value of \$60.1 million as at September 30, 2015 (December 31, 2014: \$37.3 million) include development assets under construction that are not being depreciated. No borrowing costs were capitalized to property, plant and equipment in respect of the referenced periods.

At September 30, 2015, impairments indicators were identified for certain of the Company's CGUs. Please refer to Note 8 for further discussion.

During the third quarter, the Company completed the disposition of certain oil properties in the Kaybob area for net cash consideration of \$45.0 million, resulting in a gain of \$18.3 million.

Acquisitions in 2014 included oil and gas properties in the Kaybob area for cash consideration of \$16.3 million (\$16.7 million gross cost net of \$0.4 million for purchase price adjustments) and in the Grande Prairie area for cash consideration of \$4.2 million (\$5.5 million gross cost net of \$1.3 million for purchase price adjustments).

The cash consideration was allocated as follows:

	2014
Fair value of net assets acquired	
Property, plant, and equipment	15,066
Exploration and evaluation	8,820
Decomissioning liability	(3,363)
Total net assets acquired	20,523
Total Cash Consideration	20,523

7. Exploration and Evaluation Assets

Balance at September 30, 2015	62,211	5,316	67,528

The following table reflects exploration and evaluation expenditures that were charged to income for the following periods:

	Three months-ended September 30		Nine months-ended September 30	
	2015	2014	2015	2014
Expired mineral leases	772	620	2,889	2,420
Impairment charge			3,417	-
	772	620	6,306	2,420
Geological and geophysical costs	2	539	(14)	1,506
Exploration and evaluation expenditures	774	1,159	6,292	3,926

Exploration and evaluation expenditures include costs associated with geological and geophysical costs which are immediately expensed to the consolidated statement of comprehensive income.

8. Impairment Loss

		Three months-ended September 30		hs-ended ber 30
	2015	2014	2015	2014
Property, plant and equipment	102,049	-	115,598	-

In response to a continued decline in commodity prices at September 30, 2015, the Company assessed and concluded that the carrying value of its property, plant, and equipment within four CGUs in the Kaybob and Grande Prairie areas of Alberta exceeded their fair value less costs of disposal resulting in an impairment of \$102 million for the three month ending period. During the second quarter of 2015, the Company also impaired a Grande Prairie CGU by \$13.5 million.

The Company determined the recoverable amounts for its CGU's using the fair value less costs of disposal method based on internally generated cash flow projections, extending approximately over the next 40 years. In determining fair value less costs of disposal, the Company considered recent transactions within the industry, external views of commodity prices, and internal updates to prior year reserve volumes. The Company's independent qualified reserve engineers complete their annual reserve evaluation as at December 31, each year. The calculation of the recoverable amount is sensitive to the assumptions regarding production volumes, discount rates, operating costs and commodity prices. The inputs used in the valuation methodology are considered fair value Level 3 inputs (refer to Note 18) as certain key assumptions are not based on observable market data but, rather, management's best estimate. In computing the recoverable amount, future cash flows were adjusted for risks specific to the CGU and discounted using an after-tax discount rate ranging from 9 to 10 percent (2014: 10 percent). The discount rate is considered to approximate the rate of return that a market participant would require for assets of similar characteristics and risk. Undeveloped land valuation estimates of exploration and evaluation assets were also included in the recoverable amount.

The recoverable amount to PP&E is highly sensitive to the discount rate. If the discount rate applied to the forecasted net cash flows increased by 1 percent, the Company would have recognized an additional impairment of approximately \$102.6 million.

Selected key price forecasts and exchange rates used in the estimation of the value of commercial reserves as at September 30, 2015 and December 31, 2014 were as follows:

		2015	2016	2017	2018	2019
AECO Gas	Cdn\$/MMBtu	2.90	3.35	3.65	3.85	4.00
Edmonton Light Sweet Crude	Cdn\$/Bbl	60.80	67.40	73.40	78.10	80.90
Edmonton Condensate	Cdn\$/Bbl	64.80	71.40	77.50	82.30	85.10

	Cdn\$/MMBtu Cdn\$/Bbl			-		
AECO Gas Edmonton Light Sweet Crude Edmonton Condensate		3.58	4.15	4.43	4.71	4.99
Edmonton Light Sweet Crude	Cdn\$/Bbl	3.58 68.58	4.15 80.07	4.43 85.74	4.71 91.41	4.99 97.07

9. Income Tax

September 30, 2015

The movement in deferred income tax assets and (liabilities) is as follows:

Net Deferred Income Tax Asset/(Liability)	Property, Plant, & Equipment	Risk Management	Decommissioning Liabilities	Losses & Other	Total
At December 31, 2013	(127,772)	1,300	47,901	173,900	95,329
Recovery (expense)	56,037	(1,147)	9,135	(169,294)	(105,269)
At December 31, 2014	(71,735)	153	57,036	4,606	(9,940)
Recovery (expense)	3,285	(3,510)	4,095	37,077	40,946
At September 30, 2015	(68,450)	(3,357)	61,131	41,683	31,006

As at September 30, 2015, Trilogy has a deferred tax asset of \$31 million.

A \$40.9 million deferred income tax recovery (YTD 2015) was recognized to the consolidated interim statement of comprehensive income (YTD 2014 – \$26.4 million deferred income tax expense). The amount and timing of reversals of temporary differences will be dependent upon, among other things, the Company's future operating results, and acquisitions and dispositions of assets and liabilities. Legislative changes in tax rates or successful challenges by tax authorities of Trilogy's interpretation of tax legislation could materially affect the Company's estimate of current and deferred income taxes.

Trilogy has tax losses of \$212 million that are available for carry forward against future taxable income of the entities in which the losses arose. Of this amount, a deferred tax asset has been recognized for \$143.5 million of the losses, representing the Company's probable estimate of future taxable income that could be applied to the total losses.

During the second quarter, Trilogy's corporate tax rate was increased by 2 percent (total 27 percent) pursuant to legislative announcements made by the Alberta government.

In 2014, the Company received a letter from the Canada Revenue Agency ("CRA") advising the Company that, subject to submissions by Trilogy, it was proposing to reassess the Company's income tax filings related to its conversion from an income trust to a corporation in early 2010. The proposed reassessments sought to disallow certain tax pools in the amount of \$728 million. During the first quarter of 2015, the Company resolved this tax dispute. As a result, a provision was recorded in the fourth quarter of 2014 to write down the Company's deferred tax asset by \$82 million.

The Company has temporary differences in respect of its investments in Canadian subsidiaries for which no deferred taxes have been recorded. As no taxes are expected to be paid in respect of the temporary differences related to its investment in Canadian subsidiaries, the Company has not determined the amount of those temporary differences.

10. Long-Term Debt

Revolving Credit Facility

Trilogy has a revolving senior secured credit facility with a syndicate of Canadian banks. Borrowing under the facility bears interest at the lenders' prime rate, bankers' acceptance rate or London Interbank Offered Rate, plus an applicable margin. Trilogy's total commitments of \$663, as of September 30, 2015, consist of:

- A working capital tranche of \$35 million;
- A revolving tranche of \$503 million, and;
- A development facility in the amount of \$125 million.

Amounts drawn on the working capital and revolving tranches facility are due upon their maturity on April 30, 2017, while amounts drawn on the development facility, if any, are due upon its maturity on June 30, 2016, unless subsequently renewed. Initial and on-going borrowings from the development facility are only available for the development of its oil and Duvernay reserves to the extent that:

- The closing crude spot price exceeds an average of US\$70 a barrel (WTI) for a preceding sixty day period; and
- The Company maintains its 60 day average historical production volumes in excess of 95 percent of forecasted production (normalized to exclude third party and weather related production delays).

No amounts have been drawn under the development facility as of September 30, 2015.

The Company's quarterly financial covenants are as follows:

A ratio of "Senior Debt" to "Adjusted EBITDA" for the twelve month period of not greater than 3.00 for all fiscal quarters-ended except as provided:

- 3.50 at December 31, 2015, March 31, 2016, and June 30, 2016; and
- 3.25 at September 30, 2016, December 31, 2016, and March 31, 2017.

A ratio of "Consolidated Debt" to "Adjusted EBITDA" for the twelve month period of not greater than 4.00 for all fiscal quarters-ended except as provided:

- 6.00 at December 31, 2015, March 31, 2016, and June 30, 2016; and
- 5.50 at September 30, 2016, December 31, 2016, and March 31, 2017.

The credit facility also has the following significant terms:

- The Revolving Credit Facility is subject to semi-annual borrowing base reviews, beginning approximately in April
 and September of each year. Dispositions and acquisitions of assets may also increase or decrease the
 borrowing base respectively. In the event that the lending syndicate reduces the borrowing base below the
 amount drawn at the time of the redetermination, Trilogy has 60 days to eliminate any shortfall by providing
 additional security or guarantees satisfactory to the lenders or by repaying amounts in excess of the
 redetermined borrowing base;
- Advances drawn on the credit facility are secured by a fixed and floating debenture charge over the assets of the Company.

The following four measures are considered Non-GAAP measures:

"Adjusted EBITDA" refers to "Funds flow from operations" plus cash interest and tax expenses and certain other items that do not appear individually in the line items of the Company's financial statements.

"Funds flow from operations" refers to the cash flow from operating activities before net changes in operating working capital as shown in the consolidated statements of cash flows.

"Consolidated debt" generally includes all long-term debt plus any issued and undrawn letters of credit, less any cash held.

"Senior debt" is generally defined as "Consolidated debt" but excluding any indebtedness under the Senior Unsecured Notes.

As at September 30, 2015, the Company is in compliance with all debt covenants. The effective interest rate on Trilogy's Revolving Credit Facility for the nine month period (excluding other financing costs) was 2.78 percent. (September 30, 2014 – 3.8 percent). The Company has letters of credit totalling \$12.1 million as at September 30, 2015 (December 31, 2014: \$9.6 million) which reduce the amount available for draw.

Senior Unsecured Notes

On December 13, 2012, the Company issued \$300 million in Senior Unsecured Notes at par value. The notes bear interest semi-annually at 7.25 percent per annum and will mature on December 13, 2019. Interest payable was \$6.5 million at September 30, 2015 and \$1.1 million at December 31, 2014. The notes rank pari passu with all of Trilogy's existing indebtedness and are subordinated to all secured indebtedness which includes debt under Trilogy's Revolving Credit Facility.

The Company may, at its own option, redeem the notes at various premiums. To the extent the Company experiences a change in control, each note holder will have the right to require the Company to re-purchase, at 101 percent, all or part of each holders' notes. The notes were initially recognized at fair value net of transactions costs and are subsequently measured at amortized cost using an effective interest rate of 7.53 percent. (September 30, 2014 – 7.53 percent).

Long-term debt as at September 30, 2015 and December 31, 2014 is comprised of the following:

	Nine months-ended September 30, 2015	Twelve months-ended December 31, 2014
Revolving credit facility	354,787	406,329
Less prepaid interest and unamortized financing costs	(1,183)	(1,053)
Carrying value	353,604	405,276
Senior unsecured notes	300,000	300,000
Less unamortized financing costs	(3,514)	(4,136)
Carrying value	296,486	295,864
Total carrying value of long term debt	650,090	701,140

Interest expense for the three and nine months ended September 30, 2015 and 2014 is comprised of the following:

	Three months-ended September 30		Nine mont Septem	
	2015	2014	2015	2014
Senior unsecured notes	5,482	5,482	16,268	16,268
Credit facility interest, charges, and other interest	3,158	4,337	9,828	11,631
Amortization of finance fees	688	427	1,370	1,219
Total interest and finance costs	9,328	10,246	27,466	29,118

11. Decommissioning and Restoration Liability

	Nine months-ended	Twelve months-ended
	September 30, 2015	December 31, 2014
Balance - beginning of period	228,145	191,606
Liabilities incurred	940	13,091
Liabilities acquired	-	3,363
Liabilities disposed	(2,356)	(3,263)
Liabilities settled	(1,851)	(4,741)
Accretion	3,710	5,792
Revision to estimates	(2,176)	22,296
Balance – end of period	226,412	228,145

The Company has estimated the undiscounted value of the decommissioning and restoration obligation to be \$234.8 million as at September 30, 2015 (December 31, 2014: \$235.7 million).

Settlement of this obligation is expected to be paid from 10 to 30 years and will be funded from the general resources of the Company. The estimated future cash out flows as at September 30, 2015 and December 31, 2014, respectively, have been discounted using an average risk free rate of approximately 2.2 percent and an inflation rate of 2.0 percent.

12. Share-Based Payment Plans

The share-based payment expense recognized for employee services received for the three months ended are as follows:

	Three months-ended September 30		Nine months-ended September 30	
	2015	2014	2015	2014
Expense arising from:				
Share Incentive Plan	(162)	1,078	(249)	2,584
Share Option Plan	2,987	3,601	9,689	10,479
Total expense arising from share-based payment transactions	2,825	4,679	9,440	13,063

The Company has a share incentive plan ("SIP") for employees and officers that annually awards rights to receive Common Shares. Common Shares are purchased in the open market and held by an independent trustee until completion of the vesting period. The fair value of the Common Shares awarded is recognized in share-based compensation over the vesting period, with a corresponding charge to equity. The Common Shares, while held in trust, are recorded as a reduction of share capital.

The following table provides a continuity of the SIP Common Shares held in trust at the beginning and end of the following periods:

	Nine months-ended	Twelve months-ended
	September 30, 2015	December 31, 2014
Beginning	132,448	94,126
Purchases	-	190,000
Vested	(66,115)	(151,678)
Ending	66,333	132,448

The cost to the Company of the Common Shares held in trust was \$1.8 million as at September 30, 2015 and \$3.6 million at December 31, 2014 and was recorded as a reduction to Common Shares outstanding and Shareholder Capital. Conversely, the vesting of Share Incentive Plan awards increases Common Shares outstanding and Shareholder Capital.

The Company also has a long-term incentive plan that awards share options to eligible directors, officers and employees (the "Share Option Plan"). Under this plan, holders of vested share options are able to subscribe for the equivalent number of Common Shares at the exercise price within the contractual period prescribed in the governing option agreement. The exercise price of the options is equal to the average trading price five days prior to the grant. The contractual life of each option granted ranged from 2.0 to 5.5 years.

The following table provides a continuity of the share options outstanding at the beginning and end of the following periods:

		Nine months September 3		Twelve months-ended December 31, 2014		
	А	Weighted Average		Weighted Average		
	Exer	cise Price	No. of Options	Exercise Price	No. of Options	
Outstanding at January 1	\$	22.20	8,236,500	\$ 23.78	7,267,500	
Granted		7.39	1,063,600	11.90	1,940,000	
Exercised		8.38	(203,740)	7.83	(717,500)	
Forfeited		23.69	(183,300)	29.29	(253,500)	
Expired		8.51	(395,000)	-	-	
Outstanding at period end	\$	21.28	8,518,060	\$ 22.20	8,236,500	
Exercisable at period end	\$	22.63	3,269,640	\$ 22.94	3,306,000	

The weighted average fair value of options granted during the nine month period was \$1.83 per option (December 31, 2014: \$3.84). The significant inputs into the model were as follows:

	September 30, 2015	December 31, 2014	
Dividend yield (percent)	Nil	nil to 1.57	
Expected volatility (percent)	43 - 49	38	
Risk-free interest rate (percent)	0.55 to 0.81	1.39 to 1.73	
Expected life of options (years)	2 - 5	4 - 5	

The range of exercise prices of the outstanding options and exercisable options as at September 30, 2015 were as follows:

		Outstand	Outstanding Options		ble Options
Exercise Price Range	Weighted Average Contractual Life Remaining	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price
\$7.38 to \$11.27	3.5	2,801,060	\$9.24	611,140	\$7.38
\$11.28 to \$26.87	0.6	1,145,000	\$12.15	852,000	\$12.15
\$26.88 to \$28.05	3.5	1,485,000	\$26.93	310,000	\$26.96
\$28.06 to \$28.35	2.6	1,630,000	\$28.27	649,000	\$28.27
\$28.35 to \$38.74	1.7	1,457,000	\$38.05	847,500	\$38.26
Total	2.6	8,518,060	\$21.28	3,269,640	\$22.63

The weighted average share price at the date of exercise for share options exercised in 2015 was \$9.01 (2014: \$28.88).

13. Issued Capital

Authorized

Trilogy is authorized to issue an unlimited number of Common Shares and an unlimited number of Non-Voting Shares. The Non-Voting Shares are the same as the Common Shares except they do not carry any voting rights.

Issued and Outstanding

The following provides a continuity of outstanding share capital:

	Common Shares ⁽¹⁾	Non-Voting Shares	Total	Amount
Shares as at December 31, 2013	99,338,484	25,835,862	125,174,346 \$	1,092,727
Issued - Share Option Plan	717,500	-	717,500	8,670
Share issuance	5,000,000	(5,000,000)	-	-
Share Incentive Plan purchases	(190,000)	-	(190,000)	(5,107)
Vesting of Share Incentive Plan awards	151,678	-	151,678	4,327
Shares as at December 31, 2014	105,017,662	20,835,862	125,853,524 \$	1,100,616
Issued - Share Option Plan	203,740	-	203,740	2,288
Share Incentive Plan purchases	-	-	-	-
Vesting of Share Incentive Plan awards	66,115	-	66,115	1,777
Shares as at September 30, 2015	105,287,517	20,835,862	126,123,379 \$	1,104,681

⁽¹⁾Net of Common Shares held in trust for the benefit of employees and officers under Trilogy's Share Incentive Plan

In April of 2014, Trilogy elected to convert 5 million outstanding non-voting shares to common shares on the basis of one Common Share for each Non-Voting Share.

Also, in 2014, the Company received the necessary approvals to make a normal course issuer bid ("NCIB") through the facilities of the Toronto Stock Exchange. Trilogy may purchase up to 6,490,470 of its Common Shares. Purchases under the bid may be made during the period beginning on December 16, 2014 and ending on December 15, 2015, or on such earlier date as Trilogy may complete its purchases under the bid. No purchases have been made under the NCIB as at September 30, 2015.

14. Earnings (Loss) per share

The following table reflects the income (loss) and share data used in the basic and diluted earnings per share calculations:

	Three months-ended September 30		Nine months-ended September 30	
	2015	2014	2015	2014
Net earnings (loss) used in the calculation of total basic and diluted earnings per share	(70,929)	26,700	(118,412)	72,318
Weighted average number of shares for the purposes of basic earnings per share	126,123,379	125,782,209	126,033,800	125,547,796
Effect of dilution	NIL	1,292,130	NIL	1,477,690
Weighted average number of shares	126,123,379	127,074,339	126,033,800	127,025,486
Earnings (loss) per share – Basic Earnings (loss) per share – diluted	(0.56) (0.56)	0.21 0.21	(0.94) (0.94)	0.58 0.57

As at September 30, 2015, the Company had 66,333 of dilutive securities.

15. Reconciliation of Changes in Non-Cash Working Capital

	Three months-ended September 30		Nine months-ended September 30	
	2015	2014	2015	2014
Decrease (increase) in trade, other receivables and prepaids	9,106	17,005	23,701	1,298
Increase (decrease) in trade, other payables and interest payable	(4,927)	(11,543)	(36,962)	22,367
	4,179	5,462	(13,261)	23,665
Changes in non-cash operating working capital	6,740	15,929	6,715	(2,207)
Changes in non-cash investing working capital	(2,561)	(10,467)	(19,976)	25,873

16. Related Party Transactions

Trilogy had the following transactions with Paramount Resources Ltd. ("Paramount"):

- Pursuant to a services agreement, a Paramount subsidiary provides limited administrative services to the Company. The agreement may be terminated by either party with at least six months written notice. The amount of expenses billed and accrued under this agreement was \$0.3 million for the nine months ended September 30, 2015 (September 30, 2014 - \$0.3 million). Costs associated with this agreement are included as part of the general and administrative expenses in the Company's consolidated statement of comprehensive income.
- The Company and Paramount also transact with each other in the normal course of any joint operations.

The amounts due from (to) Paramount as at the balance sheet dates are as follows:

September 30, 2015		
Presented in the Balance Sheet as	Normal Business	Services Agreement
Trade and other receivables	162	-
Trade and other payables	(22)	(74)
December 31, 2014		
December 31, 2014 Presented in the Balance Sheet as	Normal Business	Services Agreement
	Normal Business 163	Services Agreement

The receivables and payables are unsecured in nature and bear no interest. No provisions were held against receivables or payables with Paramount through 2015 and 2014.

17. Financial Risk Management and Objectives

The main risks arising from Trilogy's financial instruments are credit risk, liquidity risk, commodity price risk, interest rate risk and foreign currency risk. A detailed discussion of these risks as they apply to the Company are listed in Note 22 of the 2014 Annual Consolidated Financial Statements.

Credit Risk

Accounts receivable from customers and joint venture partners in the Canadian petroleum and natural gas industry are subject to normal industry specific credit risk. The Company has not provided an allowance for any of its receivables as they are all considered collectible. The maximum exposure to credit risk at period-end is as follows:

	September 30, 2015	December 31, 2014
Trade and other receivables	30,301	56,130
Derivatives Financial Instruments ⁽¹⁾	12,544	-
	42,846	56,130

⁽¹⁾ Carried at the estimated fair value of the related financial instruments based on third party quotations.

Liquidity Risk

Trilogy's principal sources of liquidity are its cash flow from operations and amounts available for draw under its Revolving Credit Facility. The variability of market benchmarks as noted below provides uncertainty as to the level of Trilogy's cash flow from operations.

In light of the rapid decline in commodity prices through the fourth quarter of 2014 into 2015, Trilogy has undertaken measures designed to preserve the Company's financial health and sustainability in the low commodity price environment. These measures include:

- A significantly reduced capital expenditure program for 2015 estimated at \$100 million, representing a 77 percent reduction from 2014, with a marginal decrease in expected production compared to 2014;
- The discontinuance of its dividend;
- Enhanced focus by management on reducing capital, operating and general and administrative cost structures and enhancing operational efficiencies;

- The disposition of assets and repayment of debt; and
- Preserving Trilogy's undrawn capacity under its Revolving Credit Facility.

The above measures aim to balance Trilogy's capital expenditure levels within its cash flows from operations.

In conjunction with the current commodity price environment, a heightened risk exists that Trilogy may exceed its financial covenant limits in the latter part of 2015 through 2016. In addition to the aforementioned measures that Trilogy has taken to preserve the Company's financial health, Trilogy successfully negotiated amendments to increase covenant ratios on its Revolving Credit Facility agreement, among other things. Refer to Note 10 for more information on the amendments.

A contractual maturity analysis for Trilogy's financial liabilities as at September 30, 2015 is as follows:

	Within 1 Year	1 to 3 years	More than 3	Total
			years	
Accounts payable and accrued liabilities	62,813	-	-	62,813
Derivative financial instruments	111	-	-	111
Interest payable on senior notes	6,555	-	-	6,555
Long-term debt and estimated interest ⁽¹⁾	7,886	431,914	321,750	761,550
Total	77,365	431,914	321,750	831,029

⁽¹⁾ Estimated interest related to the Revolving Credit Facility for future periods was calculated using the weighted average interest rate for the year to date September 30, 2015 applied to the debt principal balance outstanding as at that date. Principal repayment on the Company's Revolving Credit Facility is assumed on April 30, 2017. Estimated interest related to the unsecured senior notes for future periods was calculated using the coupon interest rate of 7.25 percent applied to the principal balance and principal repayment is assumed on December 13, 2019.

A contractual maturity analysis for Trilogy's financial liabilities as at December 31, 2014 is as follows:

	Within 1 Year	1 to 3 years	More than 3	Total
			years	
Accounts payable and accrued liabilities	105,198	-	-	105,198
Derivative financial instruments	611	-	-	611
Interest payable on senior notes	1,132	-	-	1,132
Long-term debt and estimated interest ⁽¹⁾	36,624	489,119	321,750	847,493
Total	143,565	489,119	321,750	954,434

⁽¹⁾ Estimated interest related to the Revolving Credit Facility for future periods was calculated using the weighted average interest rate for the year ended December 31, 2014 applied to the debt principal balance outstanding as at that date. Principal repayment on the Company's Revolving Credit Facility was assumed on April 30, 2017. Estimated interest related to the unsecured senior notes for future periods was calculated using the coupon interest rate of 7.25 percent applied to the principal balance and principal repayment is assumed on December 13, 2019.

Capital Management

The Company's capital structure currently consists of borrowings under its senior notes, revolving credit facility, letters of credit issued as financial security to third parties and shareholders' equity.

The objectives in managing the capital structure are to:

- utilize an appropriate amount of leverage to maximize return on shareholder equity; and
- provide Trilogy borrowing capacity and financial flexibility for its operating and capital requirements.

Management and the Board of Directors review and assess the Company's capital structure and dividend declaration policy at each regularly scheduled board meeting and at other meetings called for that purpose. The financial strategy may be adjusted based on the current outlook of the underlying business, the capital required to fund the reserves program and the state of the debt and equity capital markets. In order to maintain or adjust the capital structure, the Company may (1) issue new shares, (2) issue new debt securities, (3) amend, revise, renew or extend the terms of the existing credit facility (4) enter into agreements establishing new credit facilities, (5) adjust the amount of dividends, if any, declared to shareholders, (6) adjust capital spending, and/or (7) disposition of assets.

A comparison of Trilogy's debt structure against the committed amount on its revolving credit facility at September 30, 2015 and December 31, 2014 is detailed below:

	September 30, 2015	December 31, 2014
Committed amount that can be drawn from the credit facility (Note 10)	663,000	725,000
Outstanding letters of credit	(12,141)	(9,574)
Amount that can be drawn after letters of credit	650,859	715,426
Revolving credit facility	(353,604)	(405,276)
Current liabilities net of current assets	(24,157)	(50,463)
Capacity under credit facilities	273,098	259,687
Capacity within:		
Development Facility	125,000	-
Revolving and Working Capital Tranches	148,098	259,687
	273,098	259,687

Trilogy's net debt, calculated as its long-term debt plus any net working capital deficiency, is as follows:

	September 30, 2015	December 31, 2014
Revolving credit facility (Note 10)	(353,604)	(405,276)
Senior notes (Note 10)	(296,486)	(295,864)
Current liabilities, net of current assets	(24,157)	(50,463)
Net debt ⁽¹⁾	(674,247)	(751,603)

(1) Net debt is a Non-GAAP measure

18. Financial Instruments

Carrying Values

Set out below are the carrying amounts, by category, of Trilogy's financial assets and liabilities as reflected in the financial statements.

	September 30, 2015	December 31, 2014
Financial assets		
Receivables ⁽¹⁾	30,301	56,130
Financial instruments fair valued through profit and loss ⁽²⁾	12,544	-
Financial liabilities		
Other liabilities - non-trading liabilities ^{(1) (3)}	(69,368)	(106,330)
Financial instruments fair valued through profit and loss ⁽²⁾	(111)	(611)
Other liabilities - long-term debt ⁽⁴⁾	(650,090)	(701,140)

(1) Carried at cost which approximates the fair value of the assets and liabilities due to the short-term nature of the accounts.

(2) Carried at the estimated fair value of the related financial instruments based on third party quotations.

(3) Consists of accounts payable, accrued liabilities, and interest payable.

(4) The Company's Revolving Credit Facility debt carries interest based on specified benchmark interest rates plus a spread for the Company's own credit risk. The fair values of the Revolving Credit Facility debt approximates its carrying amount due to the fact that interest is adjusted periodically based on changes in the relevant benchmark interest rates and there have been no significant changes in the Company's own credit risk. The fair value of the senior unsecured notes is estimated to be 85.50 percent, based on independent broker quotes, of face value or \$256.50 million (level 3 type – unobservable data inputs).

The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 - Input other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 - inputs that are not based on observable data

The following provides a classification summary of Trilogy's financial instruments within the fair value hierarchy as at:

September 30, 2015	Derivative financial assets (liabilities) – fair value			
	Level 1	Level 2	Level 3	Total
Foreign exchange derivative contract	-	15	-	15
Power derivative contract	-	-	(111)	(111)
Crude oil and natural gas derivative contracts	-	12,529	-	12,529
	-	12,544	(111)	12,433

December 31, 2014	Derivative financial assets (liabilities) – fair value			
	Level 1	Level 2	Level 3	Total
Power derivative contract	-	-	(611)	(611)
	-	-	(611)	(611)

Commodity Contracts

At September 30, 2015 the Company had the following outstanding crude oil derivative contracts:

Crude Oil

Financial Forward Sale				
Term	Volume (Bbl/d)	Average CAD WTI Price/Bbl		
2016	3,000	\$77.18		

Foreign Exchange

trading	Weekly ending FX rate trading range: (CAD per USD)		I per week on trading range:		USD sell per week on trading range:		Weekly premium receipt within trading range:	Expiry
Lower	Upper	Below lower	Between range	Above upper	trading range.			
1.1950	1.4275	NIL	Nil, receive weekly premium	\$750,000 notional at upper range	\$7,500	December 2016		

Power

	Financial Forward Sa	le
Term	MW/h	Average CAD Price/MW/h
2015 through 2016	6	\$50.44

The Company classified these financial instruments as fair valued through profit and loss and therefore has recognized the fair value of these financial instruments on the balance sheet. The estimated fair values of these financial instruments are based on quoted prices or, in their absence, third-party market indicators and forecasts.

The changes in the fair value associated with the above financial contracts are recorded as an unrealized gain or loss on financial instruments in the consolidated statement of comprehensive income. Gains or losses arising from monthly settlements with counterparties are recognized as a realized gain or loss in the consolidated interim statement of comprehensive income.

The following table summarizes the fair value as at September 30, 2015 and December 31, 2014, and the change in fair value for the referenced periods:

	Nine months-ended	Twelve months-ended
	September 30, 2015	December 31, 2014
Derivative asset, beginning of period	-	24
Unrealized change in fair value	12,544	(24)
Derivative asset, end of period	12,544	-
Derivative liability, beginning of period	(611)	(5,224)
Unrealized change in fair value	500	4,613
Derivative liability, end of period	(111)	(611)
Unrealized increase (decrease) in fair value for the period	13,044	4,589

19. Gain (Loss) on Derivative Financial Instruments

	Three months-ended September 30		Nine mont Septem	
	2015	2014	2015	2014
Realized gains (losses)				
Crude oil & natural gas	-	(917)	-	(8,807)
Power	(322)	209	(511)	232
Sub-total	(322)	(708)	(511)	(8,575)
Unrealized gains (losses)				
Crude oil & natural gas	13,099	9,677	12,529	6,662
Foreign exchange	15	-	15	-
Power	113	(64)	500	16
Sub-total	13,227	9,613	13,044	6,678
Gain (losses) on derivative financial instruments	12,905	8,905	12,533	(1,897)

20. Segment Reporting

The Company has only one segment for performance and evaluation purposes. The following schedule illustrates the types of products from which Trilogy earns its revenue.

	Three months-ended September 30		Nine months-ended September 30	
	2015	2014	2015	2014
Petroleum and natural gas sales:				
Natural gas	30,264	53,158	98,199	181,382
Oil	25,116	68,985	87,297	217,127
Natural gas liquids	10,354	31,718	43,936	90,884
Total petroleum and natural gas sales	65,734	153,860	229,432	489,393
