

TIMELINE OF EVENTS: DEATH OF TYSON MCKAY

- **June 23, 2015:**
 - **3:30pm** (approx.) – Tyson McKay attends to the nursing station in Cross Lake complaining of chest pain, cough, and fever;
 - **3:35pm** – Texts from Tyson McKay’s phone show that he went to the nursing station “just to be sure” as he had fever and chest pains at work;
 - **3:39pm** – Texts from Tyson McKay joke that the nursing station will likely just send him home with an ibuprofen;
 - **4:30pm** – Tyson McKay is seen by a LPN for approximately 12 minutes who diagnoses him with Gastroesophageal Reflux Disease (GERD) and provides him with an antacid and a Tylenol before sending him home. No EKG or other diagnostic tests were performed;
 - **4:45pm** (approx.) – Tyson McKay is picked up by his mother from the nursing station;
 - **5pm** – Physicians no longer available at the nursing station;
 - **5:30pm** – Tyson McKay should have been transported to Thompson for further diagnostics.
- **June 24, 2015:**
 - Tyson does not feel well enough to attend two community wakes that day;
 - **11:30pm** (approx.) – Tyson McKay is found collapsed on his sofa at home.
- **June 25, 2015:**
 - **12:29am** – EMS attend to the scene finding Tyson pale and cool with a weak pulse;
 - **12:30am** – EMS begin CPR;
 - **12:45am** – EMS bring Tyson McKay to the nursing station, and the nursing station takes over CPR and begins intubation;
 - **1:08am** – Defibrillation is commenced;
 - **1:10am** – Tyson McKay is pronounced dead.
