

Figure 1. Oblique longitudinal projection, looking west, and showing the relative position of the Offset Zone SLS (yellow polygon) and B2 Zone (cyan polygon) Mineral Reserve shells and the Offset Zone 1 g/t and 2 g/t palladium grade shells relative to current mining infrastructure and the outline of the Roby open pit. Underground Mineral Reserves in the Roby Zone and Upper Offset Zone are not shown. Initial Mystery Zone Mineral Resource shell is also shown.
