

*Fig. 1: Location of the Magambazi East (Blue rectangle) and Kwandege (Purple rectangle) targets within the four PL licenses of Douglas Lake Minerals in the Handeni district.*

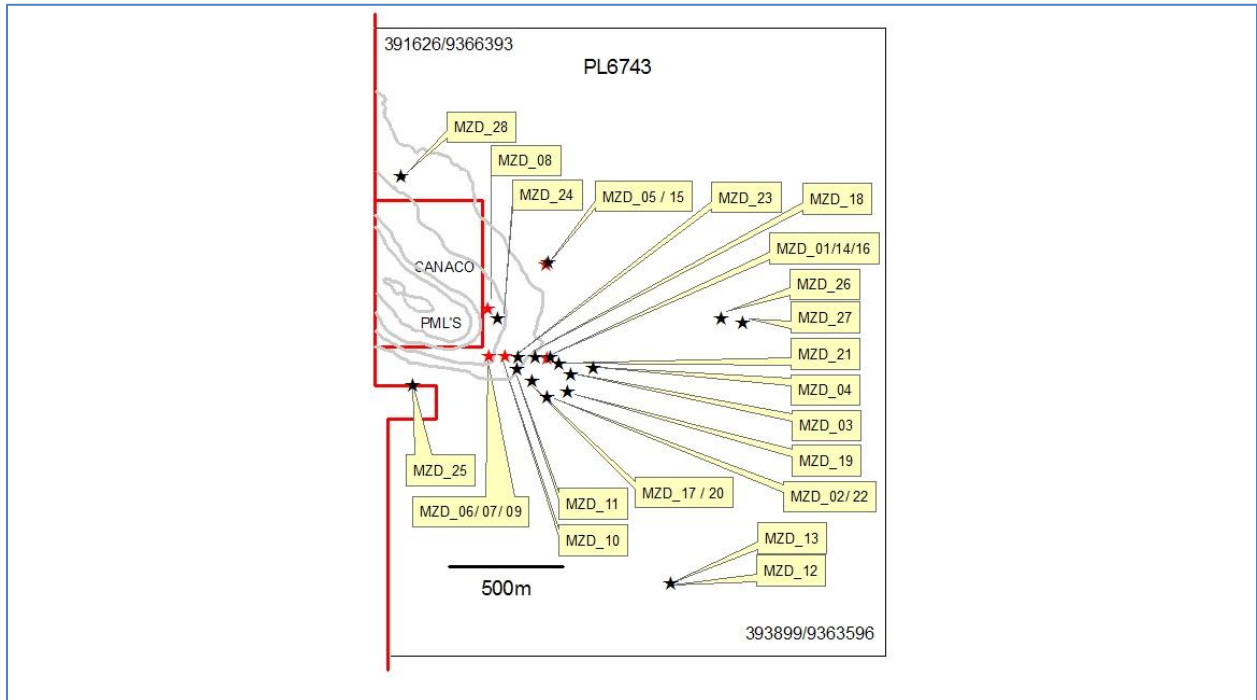

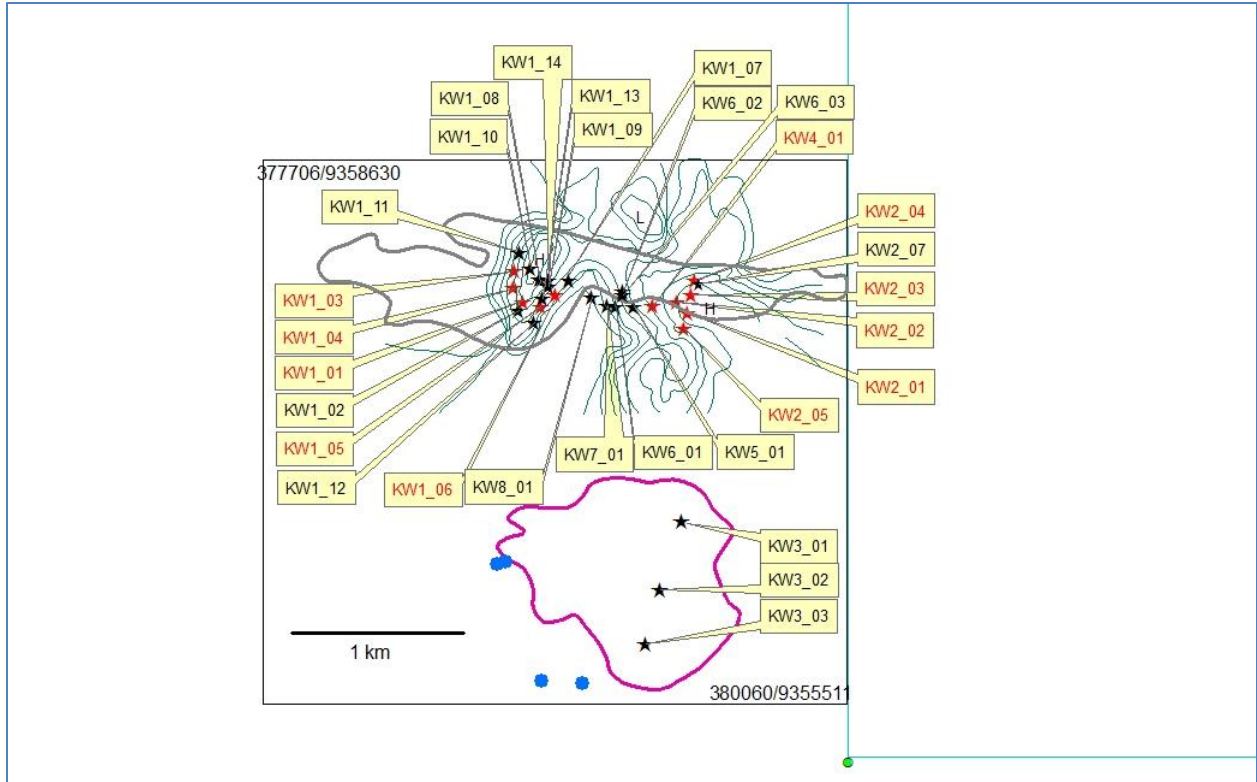

Fig. 2: Drill hole positions for the 28 drilled Magambazi holes. Holes with Au assay results are represented as red stars, holes for which assay results are pending as black stars.

*Fig. 3: Drill hole positions for the 32 Kwandege drill holes. Drill holes with assay values are indicated by red stars and those with gold assay results pending with black stars. The Kwandege geophysical/geochemical target is outlined in grey and a high chargeability anomaly in purple. Artisanal workings are presented as blue dots.*
