

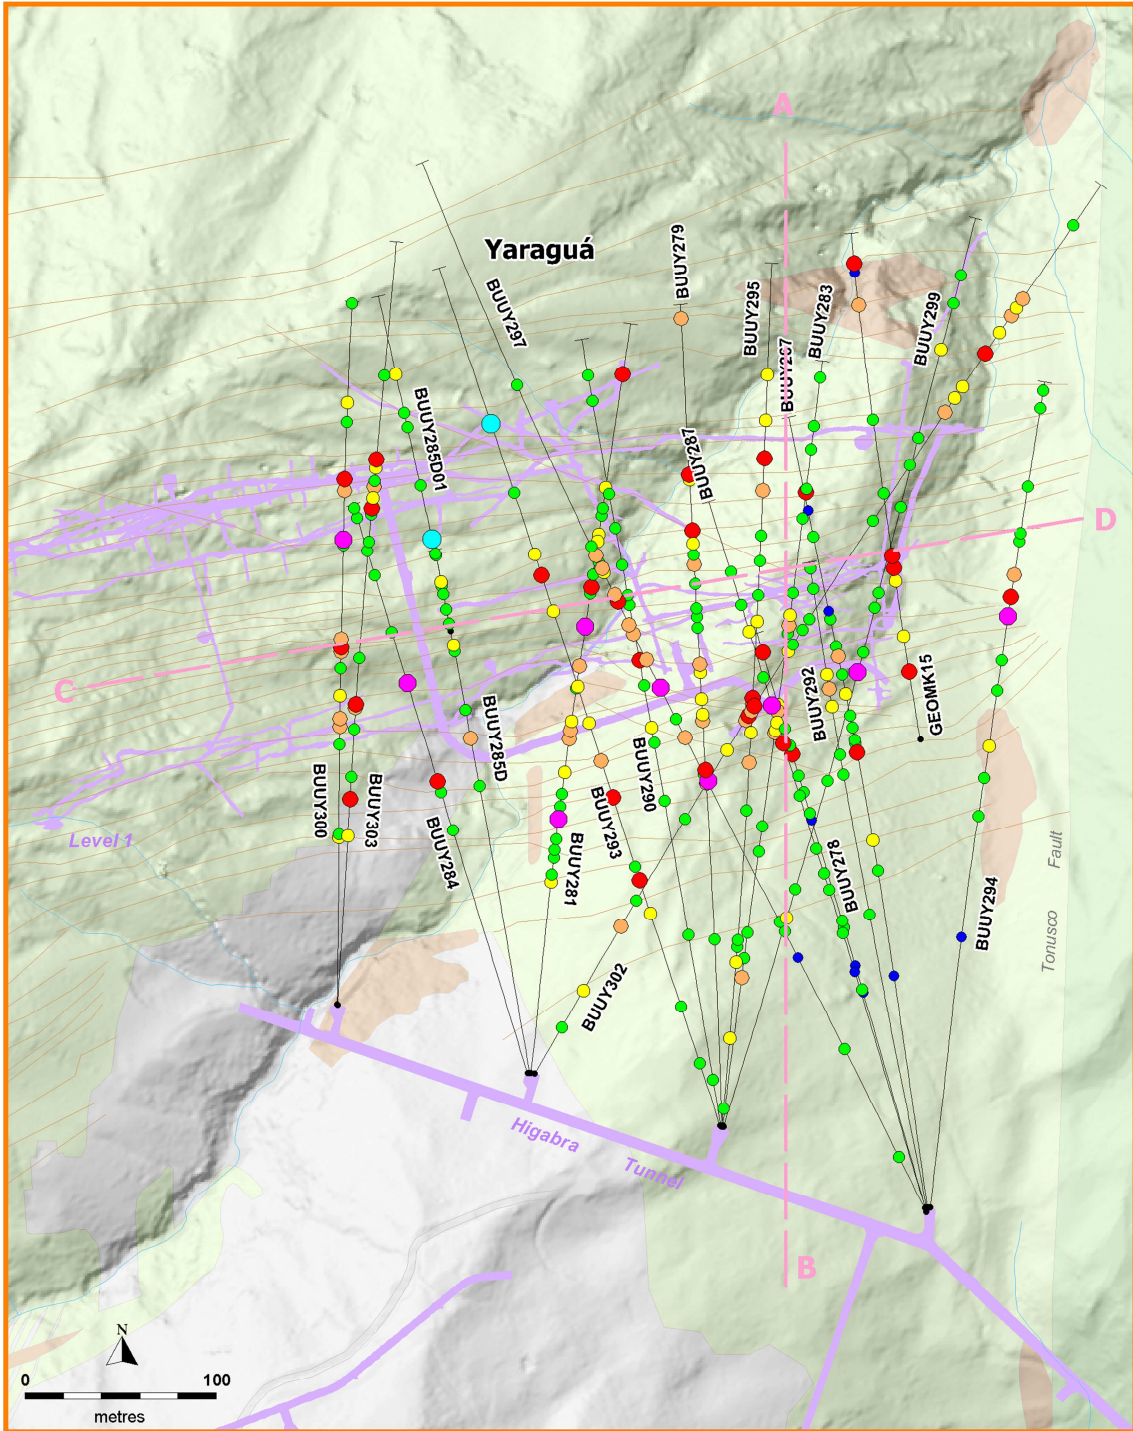

Figure 1 – Plan view of highlights of new drilling in eastern Yaraguá, showing the surface projection of veins in the current (2014) Yaraguá mineral resource model on geology-topography. Line A-B refers to the cross section line for Figure 2, and line C-D to the long section line (Figure 3).

Drilling		Geology		Gold (g/t)	
	Drill hole (this release)		Andesite		> 100
	Model Vein		Breccia 1		30 - 100
	Road		Breccia 2		10 - 30
	Drainage		Sediments		5 - 10
	Development		Volcanics		3 - 5
					1 - 3
