Centerra Gold Inc.

Notes to the Condensed Consolidated Interim Financial Statements

(Unaudited)

(Expressed in thousands of United States Dollars, except where otherwise indicated)

1. Nature of operations

Centerra Gold Inc. (“Centerra” or the “Company”) was incorporated under the *Canada Business Corporations Act* on November 7, 2002. Centerra’s common shares are listed on the Toronto Stock Exchange. The Company is domiciled in Canada and its registered office is located at 1 University Avenue, Suite 1500, Toronto, Ontario, M5J 2P1. The Company is primarily focused on operating, developing, exploring and acquiring gold properties in North America, Asia and other markets worldwide.

2. Basis of presentation

These condensed consolidated interim financial statements (“interim financial statements”) of the Company and its subsidiaries have been prepared in accordance with International Accounting Standard 34, *Interim Financial Reporting* (“IAS 34”), as issued by the International Accounting Standards Board (“IASB”). These interim financial statements do not contain all of the required annual disclosures and should be read in conjunction with the Company’s December 31, 2016 annual consolidated financial statements.

Certain comparative figures have been reclassified to comply with the basis of presentation adopted in the current quarter. There has been no change to the Company’s subsidiaries during the current quarter.

These financial statements were authorized for issuance by the Board of Directors of the Company on October 31, 2017.

3. Changes in accounting policies

These interim financial statements have been prepared using accounting policies consistent with those used in the Company’s annual consolidated financial statements as at and for the year ended December 31, 2016 and those new standards adopted in the period as described below.

Recently adopted accounting policies are as follows:

Amendments to IAS 7, *Statements of Cash Flows* (“IAS 7”). The amendments require disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flow and non-cash changes. The Company adopted amendments to IAS 7 on a prospective basis in its interim financial statements on January 1, 2017. The adoption of these amendments did not have a material impact on the Company’s interim financial statements, but did result in additional supplemental cash flow disclosure (note 20(c)).

Amendments to IAS 12, *Income Taxes* (“IAS 12”). The amendments clarify that the existence of a deductible temporary difference is not affected by possible future changes in the carrying amount

Centerra Gold Inc.**Notes to the Condensed Consolidated Interim Financial Statements****(Unaudited)**(Expressed in thousands of United States Dollars, except where otherwise indicated)

or expected manner of recovery of the asset and also clarify the methodology to determine the future taxable profits used for assessing the utilization of deductible temporary differences. The Company adopted amendments to IAS 12 in its interim financial statements on January 1, 2017. The adoption of these amendments did not have a material impact on the Company's interim financial statements

Recently issued but not adopted accounting guidance is as follows:

In May 2014, the IASB issued IFRS 15, *Revenue from Contracts with Customers* ("IFRS 15"). IFRS 15 establishes principles for reporting the nature, amount, timing, and uncertainty of revenue and cash flows arising from an entity's contract with customers. This standard is effective for annual periods beginning on or after January 1, 2018, and permits early adoption. The Company is making progress in the assessment of the impact of adopting this standard on its financial statements. As at September 30, 2017, the Company believes the impact on the revenue recognized in relation to the sales of gold doré, concentrate and molybdenum will be immaterial.

In January 2016, the IASB issued IFRS 16, *Leases* ("IFRS 16"). IFRS 16 revises the definition of leases and requires companies to bring most leases on-balance sheet, recognizing new assets and liabilities. The objective of this change is to increase the transparency and comparability of a company's financial statements. IFRS 16 is effective for annual periods beginning on or after January 1, 2019, and permits early adoption provided IFRS 15 has been applied or is applied at the same date as IFRS 16. The Company has initiated a project to identify all leasing contracts that may be impacted by IFRS 16. The Company plans to quantify the impact of these leases under IFRS 16 by the end of 2017.

4. Cash and restricted cash and restricted short-term investments

The cash and cash equivalents balance at September 30, 2017 of \$352.0 million (December 31, 2016 - \$160.0 million) includes \$250.6 million held in Centerra (December 31, 2016 - \$99.8 million), \$58.4 million held in Centerra B.C Holdings Inc. ("Centerra B.C. Holdings") (December 31, 2016 - \$51.6 million) and the remaining \$43.0 million in other Company subsidiaries (December 31, 2016 - \$8.6 million).

Under the terms of the amended Centerra B.C. Holdings Credit Facility ("Credit Facility"), Centerra B.C. Holdings is permitted to distribute from Centerra B.C. Holdings to Centerra Gold Inc. up to \$50 million without a matching prepayment on a portion of the Credit Facility until June 30, 2019. Subsequent to June 30, 2019 or once distributions exceed \$50 million, Centerra B.C. Holdings is required to prepay a portion of the Credit Facility in an amount equal to any amounts paid to Centerra, with the exception of amounts outstanding under a general facility between the companies. As at September 30, 2017, Centerra B.C. Holdings owed \$8.6 million to Centerra under the general facility, which can be re-paid provided covenants in the Credit Facility are met.

Centerra B.C. Holdings Credit Facility

In connection with the 2016 acquisition of Thompson Creek Metals Inc., Centerra B.C. Holdings, entered into a five-year term facility with a lending syndicate with an aggregate principal amount of \$325 million consisting of a \$75 million senior secured revolving credit facility (the “Revolving Facility”) and a \$250 million senior secured term credit facility (the “Term Facility”, collectively, the “Credit Facility”). Finance fees for the facility are deferred and amortized over the term of the facility.

Centerra B.C. Holdings’ obligations under the Credit Facility are guaranteed by its material subsidiaries and secured by the material assets, which includes the Mount Milligan mine, the Endako mine and the Langeloth facility.

In July 2017, the Company entered into an amendment of the Credit Facility to increase the Revolving Facility from \$75 million to \$125 million until June 30, 2019, after which time it will revert back to \$75 million. The amendment also included terms permitting distributions from Centerra B.C. Holdings to Centerra Gold Inc. of up to \$50 million without a matching prepayment on the Term Facility up until June 30, 2019. The amendment was effective upon the satisfaction of a number of conditions precedent, including the execution of specific hedges for the next two years covering production at Mount Milligan from July 2017 to June 2019.

The Company was in compliance with the revised covenants for the three and nine months ended September 30, 2017.

On September 29, 2017, the Company repaid the entire outstanding principal amount of \$74.4 million on the Revolving Facility.

The principal amount of the Term Facility is to be repaid in \$12.5 million quarterly increments commencing March 31, 2017. During the three and nine months ended September 30, 2017 the Company repaid principal amounts of \$12.5 million and \$37.5 million on the Term Facility, respectively. In addition, on June 30, 2017, the Company made a mandatory pre-payment of \$10 million as a result of a distribution paid from Centerra B.C Holdings to Centerra Gold Inc.

EBRD Revolving Credit Facility

In 2016, the Company entered into a five-year \$150 million revolving credit facility with European Bank for Reconstruction and Development (the "EBRD Facility"). Of the EBRD Facility, \$50 million must be used for the purposes of funding direct and indirect costs associated with the Gatsurt Project.

Funds drawn under the EBRD Facility are available to be re-drawn on a semi-annual basis, at the Company's discretion, and repayment of the loaned funds may be extended until 2021. In February 2017, EBRD agreed to amend the collateral coverage ratio associated with the EBRD Facility in consideration of the KGC Interim Order (refer to note 13) and the Company was required to repay \$25 million of the facility in the first quarter of 2017, with the remaining \$25 million to be repaid

on February 3, 2018 if a definitive agreement for the Gatsuurt Project was not reached by that time. On September 29, 2017, the Company repaid the remaining \$25 million associated with the Gatsuurt Project. If a definitive agreement for the Gatsuurt Project is not reached by February 3, 2018, and no waiver is granted by EBRD, the EBRD Facility will be reduced to \$100 million.

The Company was in compliance with all covenants for the three and nine months ended September 30, 2017.

OMAS Facility

In 2016, Öksüt Madencilik A.S. (“OMAS”), a wholly-owned subsidiary of the Company, entered into a \$150 million five-year revolving credit facility (the “OMAS Facility”) that expires on December 31, 2021. The purpose of the OMAS Facility is to assist in financing the construction of the Company’s Öksüt Project.

Availability of the OMAS Facility is subject to customary conditions precedent, including receipt of all necessary permits and approvals. If the conditions are not satisfied, waived or amended by the deadline, the commitments under the OMAS Facility will be cancelled. On June 29, 2017, the previous deadline of June 30, 2017 was extended to December 31, 2017.

The Company continues to work on satisfying the conditions precedents by such deadline, however some conditions, such as the receipt of the pastureland permit for the Öksüt Project, are beyond the Company’s control. There are no assurances that all conditions will be satisfied by the deadline, or that the lenders will provide any waivers or extensions.

12. Impairment of Mongolia Segment

The Company assesses at the end of each reporting period whether there is any indication from external and internal sources of information, that an asset may be impaired.

During the second quarter, the Company received preliminary results from the ongoing technical and economic studies (incorporating updated capital and operating costs) related to the Gatsuert Project which were initiated in 2016 and the current Mongolian tax and royalty regime, the Company determined that it could no longer support the carrying value of the Mongolian segment cash generating unit (“CGU”) and that it would be appropriate to recognize an impairment charge. The amount of the charge was determined as the excess of the carrying value over the recoverable amount defined as the fair value less cost to sell the resources in place (estimated to be \$25 per

resource ounce) based on comparable market transactions.

Based on this estimate, management determined that the carrying amount of \$101.3 million exceeded the recoverable amount of \$60 million (net of costs to sell), resulting in an impairment charge of \$41.3 million. The impairment was allocated to buildings, plant and equipment, mineral properties and construction in progress within property, plant and equipment for the Mongolian segment.

The fair value of the Mongolian segment CGU and associated impairment charge was determined using significant unobservable inputs.

13. Kyrgyz Republic Settlement

On September 11, 2017, the Company reached a comprehensive settlement agreement (“Strategic Agreement”) with the Government of the Kyrgyz Republic to resolve all of the outstanding matters affecting to the Kumtor Project.

In connection with the Strategic Agreement, the arbitration previously commenced by Centerra, against the Kyrgyz Republic has been suspended until November 15, 2017. During the suspension, the parties will work towards completing the Strategic Agreement and the resolution of all outstanding matters affecting the Kumtor Project.

As at September 30, 2017, the Company recognized a provision of \$60.0 million (\$57.0 million payable on closing and \$3 million payable within 12 months of closing) in relation to the Strategic Agreement and accrued a liability of \$2.0 million within “Accounts payable and accrued liabilities” relating to an increase in the annual environmental fee.

17. Commitments and contingencies**Commitments****(a) Contracts**

As at September 30, 2017, the Company had entered into contracts to purchase capital equipment and operational supplies totalling \$111 million (Öksüt Project - \$50 million, Kumtor - \$45 million, Mount Milligan - \$15 million, and other - \$1 million). Öksüt Project commitments include \$36 million of contracts that will be settled over the next two to three years, while a majority of all other contracts are expected to be settled over the next twelve months.

(b) Greenstone Partnership

As partial consideration for the Company's initial 50% partnership interest in Greenstone Gold Mines LP, the Company agreed to commit up to an additional Cdn\$185 million to fund the project, subject to certain feasibility and project advancement criteria. In the event that the project is put under care and maintenance as a result of feasibility study or project criteria not being met, the Company will be required to make contributions towards the costs associated with the care and maintenance of the project for a period of two years or until the Cdn\$185 million is spent (if such event occurs first), after which time the partners would fund such costs on a pro rata basis. Any such costs will form part of the Cdn\$185 million development contributions commitment of the Company. As at September 30, 2017, the Company has funded a total of Cdn\$65 million (\$50 million) of its commitment since the inception of the partnership.

(c) Molybdenum Purchases

In the normal course of operations, the Company enters into agreements for the purchase of molybdenum. As at September 30, 2017, the Company had commitments to purchase approximately 2.6 million pounds of molybdenum as unroasted molybdenum concentrate in 2017 primarily priced at the time of purchase at a set discount to the market price for roasted molybdenum concentrate.

Contingencies

Various legal and tax matters are outstanding from time to time due to the nature of the Company's operations. While the final outcome with respect to actions outstanding or pending at September 30, 2017 cannot be predicted with certainty, it is management's opinion that it is not, except as noted below, more likely than not that these actions will result in the outflow of resources to settle the obligation; therefore no amounts have been accrued.

Corporate**Ontario Court Proceedings Involving the Kyrgyz Republic and Kyrgyzaltyn**

Since 2011, there have been four applications commenced in the Ontario courts by different applicants against the Kyrgyz Republic and Kyrgyzaltyn, each seeking to enforce in Ontario international arbitral awards against the Kyrgyz Republic. None of these disputes relate directly to Centerra or the Kumtor Project. In each of these cases, the applicants have argued that the Kyrgyz Republic has an interest in the Centerra common shares held by Kyrgyzaltyn, a state controlled entity, and therefore that such applicant(s) are entitled to seize such number of common shares and/or such amount of dividends as necessary to satisfy their respective arbitral awards against the Kyrgyz Republic. On July 11, 2016, the Ontario Superior Court of Justice released a decision on the common issue in these four applications - whether the Kyrgyz Republic has an exigible ownership interest in the Centerra common shares held by Kyrgyzaltyn. The Ontario Superior Court of Justice determined that the Kyrgyz Republic does not have any equitable or other right, property, interest or equity of redemption in the common shares held by Kyrgyzaltyn. As a result, on July 20, 2016, the Ontario Superior Court of Justice set aside previous injunctions which prevented Centerra from, among other things, paying any dividends to Kyrgyzaltyn. Accordingly, Centerra released to Kyrgyzaltyn approximately Cdn\$18.9 million which was previously held in trust for the benefit of two Ontario court proceedings.

Three of the applicants appealed the decision to the Ontario Court of Appeal which heard the case on December 4, 2016. The court issued its decision on January 3, 2017 which upheld the trial judge's decision. Two of the applicants applied to the Supreme Court of Canada for leave to appeal this decision, which application was refused on June 15, 2017.

18. Related party transactions**a. Kyrgyzaltyn**

Revenues from the Kumtor gold mine are subject to a management fee of \$1.00 per ounce based on sales volumes, payable to Kyrgyzaltyn, a shareholder of the Company and a state-owned entity of the Kyrgyz Republic.

Gold produced by the Kumtor mine is purchased at the mine site by Kyrgyzaltyn for processing at its refinery in the Kyrgyz Republic pursuant to the Sales Agreement. Amounts receivable from Kyrgyzaltyn arise from the sale of gold to Kyrgyzaltyn. Kyrgyzaltyn is required to pay for gold delivered within 12 days from the date of shipment. Default interest is accrued on any unpaid balance after the permitted payment period of 12 days. The obligations of Kyrgyzaltyn are partially secured by a pledge of 2,850,000 shares of Centerra owned by Kyrgyzaltyn.

19. Financial Instruments

The Company's financial instruments include cash and cash equivalents, short-term investments, restricted cash, amounts receivable (including embedded derivatives), derivative assets and liabilities, reclamation deposits, long-term receivables, other assets, accounts payable and accrued liabilities, debt, lease obligations and revenue-based taxes payable.

Derivative Instruments

The Company uses derivatives as part of its risk management program to mitigate exposures to various market risks including, commodity prices, currency exchange rates and the cost of fuel.

Gold, copper and fuel hedge contracts

During the first quarter 2017, the Company commenced a program to mitigate copper price risk by purchasing fixed price forward sales contracts and zero-cost collars to hedge a portion of its expected 2017 and 2018 copper price risk. As at September 30, 2017, the Company has in place 38,000 metric tonnes (83 million pounds) designated as cash flow hedges against forecasted production at the Company's Mount Milligan mine of which 6,000 metric tonnes are fixed price forwards and 32,000 metric tonnes are zero-cost collars.

During the second quarter 2017, the Company commenced a program to mitigate gold price risk by purchasing fixed price forward sales contracts and zero-cost collars to hedge a portion of expected 2017 and 2018 gold price risk. As at September 30, 2017, the Company has 156,000 ounces designated as cash flow hedges against forecasted production at the Company's Mount Milligan mine of which 62,000 ounces are fixed price forwards and 94,000 ounces are zero-cost collars.

Fuel hedging contracts consist of call options to purchase crude oil, which are designated as cash flow hedges against forecast fuel consumption at the Company's Kumtor Project. As at September 30, 2017, the Company has in place call options on 407,000 barrels of Brent crude oil (December 31, 2016 - 535,000 barrels).

Non-hedge gold, copper and currency contracts

Non-hedge gold contracts are not designated as hedging instruments and are entered into to manage the price risk associated with the provisional pricing of gold deliverables to Royal Gold. As at September 30, 2017, the Company had forward contracts outstanding for 25,000 ounces of gold (December 31, 2016 – 35,000 ounces).

Non-hedge copper contracts are not designated as hedging instruments and are entered in to manage the price risk associated with the provisional pricing of copper deliverables to Royal Gold. As at September 30, 2017, the Company has forward contracts outstanding for 2,000 metric tonnes (4.4 million pounds) of copper (December 31, 2016 – nil).

Non-hedge foreign currency contracts are used to mitigate the variability of non-US dollar denominated exposures that do not meet the strict hedge effectiveness criteria. As at September 30, 2017, the Company has nil non-hedge foreign currency contracts outstanding.

Provisionally-priced contracts

Certain copper-gold concentrate sales contracts provide for provisional pricing. These sales contain an embedded derivative related to the provisional pricing mechanism and are marked to market at the end of each reporting period. As at September 30, 2017, the Company's trade receivables with embedded derivatives has a fair value of \$15.2 million (December 31, 2016 - \$4.1 million), representing 14 million pounds of copper and 54,000 ounces of gold (December 31, 2016 – 6.5 million pounds of copper and 61,693 ounces of gold).

<i>Royal Gold deliverables</i>

Non-hedge copper	Forward contracts ⁽⁴⁾	Pounds	ND	4.4 million	-	-	4.4 million

ND = Contracts with floating terms that are not defined as at September 30, 2017.

⁽¹⁾ Under the option contract, the Company has the option buy or sell specified assets, typically metals or currency, at a specified price at a certain future date.

⁽²⁾ Under the forward contract, the Company will buy or sell specified assets, typically metals or currency, at a specified price to be settled at a certain future date.

⁽³⁾ Under the zero-cost collar, the Company can put the number of gold ounces or copper pounds to the counterparty at the minimum price, if the price were to fall below the minimum, and the counterparty has the option to require the Company to sell to it the number of gold ounces or copper pounds at the maximum price, if the price were to rise above the maximum.

⁽⁴⁾ Regarding sales to Royal Gold, the Company has entered into forward gold and copper contracts pursuant to which it purchases gold copper at an average price during a quotational period and sells gold or copper at a spot price. These derivative contracts are not designated as hedging instruments.

As noted above, the remaining facility gold hedging program in 2017 consists of 32,453 gold ounces, including 23,453 forward contracts at an average strike price of \$1,276 per ounce and 9,000 zero-cost collars at an average strike price range of \$1,225 to \$1,372 per ounce. The remaining facility copper hedging program in 2017 consists of 9.9 million pounds of copper, including 7.1 million forward contracts at an average strike price of \$2.73 per pound and 2.8 million pounds of zero-cost collars at an average strike price range of \$2.25 to \$3.21 per pound.

The gold hedging program is more heavily weighted to zero cost collars in 2018 and 2019 representing 55% and 100% of all hedges, respectively. This hedging strategy has also been adopted for copper hedges with 85% zero cost collars in 2018 and 100% in 2019.

Fair value measurement

All financial instruments measured at fair value are categorized into one of three hierarchy levels for which the financial instruments must be grouped based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's assumptions. These two types of inputs create the following fair value hierarchy:

Level 1: observable inputs such as quoted prices in active markets;

Level 2: inputs, other than the quoted market prices in active markets, which are observable, either directly and/or indirectly; and

Level 3: unobservable inputs for the asset or liability in which little or no market data exists, which therefore require an entity to develop its own assumptions.

The recorded value of short-term investments, amounts receivable, reclamation deposits, long-term receivables, accounts payable and accrued liabilities, lease obligations, debt and revenue-based taxes payable approximate their relative fair values.

The fair value of gold, copper, diesel and currency derivative instruments, classified within Level 2, is determined using derivative pricing models that utilize a variety of inputs that are a combination of quoted prices and market-corroborated inputs. The fair value of the Company's derivative contracts includes an adjustment for credit risk.

Forward commodity contracts and provisionally priced contracts, are classified within Level 2 because they are valued using a market-based-approach, other than observable quoted prices included within Level 1, other inputs from published market prices and contracted prices and terms.
