Valuation of Dominion Citrus Limited Excluding Dominion Farm		3,208,131	4,702,385	6,196,638

Note:

The above determined equity value consists of both common and preferred shares. While we have not attempted to separate the equity value into these two components, we note that the fair market value of the preferred shares is likely not appropriately represented by its book value given the fact that interest is not being paid out to the preferred shareholders on an ongoing basis and the timing of the redemption of the shares remains in doubt.

Notes

1. Based on Management's estimate. The forecast for the remaining nine months of 2014 reflect Management's forecast for the 2014 year less the actual results of the first quarter.
2. Depreciation has been forecast based on the average annual depreciation over the last number of fiscal years, as well as the depreciation estimated by Managemet in its fiscal 2014 forecast. We have assumed that depreciation in the terminal period will be equal to capital expenditures. We understand that depreciation for accounting purposes approximates CCA for tax purposes.
3. We understanding that the Company is in the midst of an appeal with the Canada Revenue Agency (CRA) which has proposed a negative adjustment to the Company's balance of net operating losses for tax purposes. It is the Company's position that its losses for tax purposes as at December 31, 2013 stood at approximately $5.48 million while CRA's position is that this balance stood at approximately $3.4 million. Based on discussions with Management it is our understanding that the outcome of this dispute is unclear at this time. We have calculated a tax continuity schedule under both scenarios assuming that the Company's net operating losses will be utilized over then next number of years during the discrete cash flow projection years, and have averaged the tax payable under the two scenarios.
4. Based on discussions with Management and a review of historical balances that indicated that trade working capital as a percentage of sales was only marginally greater than zero, we have estimated working capital based on the following assumptions:

Accounts receivable:	25 Days
Inventory:	7 Days
Accounts payable:	32 Days

In calculating the working capital balance change through December 31, 2014, we have used the following working capital balances as at the Valuation Date:

Accounts receivable:	5,326,638
Inventory:	1,613,990
Accounts payable*:	(6,037,417)
	903,211

*Excludes accrued payables relating to interest and legal settlement

5. Calculated based on the Gordon Growth Formula: 1/(Discount Rate - Terminal Growth Rate).
6. In selecting the discount rate range we considered the following factors, amongst others:
   - Dominion is active in a stable and mature business
   - Management has made signficant improvements to operations in the last number of years
   - Diverse customer and supplier base
   - Subject to operating and financial fluctuations stemming from the impact of extreme climate conditions
   - Subject to commodity pricing (produce, transport) and foreign currency fluctuations
   - Other rates of return avaiable in the market place
7. We have assumed that the entire cash balance is redundant to operations and the Company could draw on a line of credit to finance its operations if requied.
8. A former executive of the Company has commenced legal proceedings against Dominion claiming wrongful dismissal and the Company has counter-sued. We have valued this contingent liability / asset on an after tax basis, based on Management's estimate of the Company's exposure in connection with the action which is expected to range from a loss of $1.4 million to a gain of $2.5 million.
9. Based on discussions with Management it is our understanding that as at the Valuation Date the intercompany accounts on DCL's balance sheet included approximately $3.48 miilion in accrued interest relating to the notes held by Dominion Citrus Income Fund.

Notes

1. The book values of all assets and liabilities have been assumed to be represetantive of their respective fair market values, unless otherwise noted.

2. For the purposes of our analysis we have assumed that the entire cash amount on the Company's balance sheet as at the Valuation Date belonged to the corporate division, as each of the business segements would be able to finance its operations through an operating line backed by accounts receivable and inventory.
3. We have valued the Company's net operating losses based on their estimated utilization as detailed under the discounted cash flow methodology in Schedule 2. The value conclusion reflects an averaging of the present value of the tax benefits, in each year of realization, under the two net operating loss scenarios as described in the notes to Schedule 2.
4. A former executive of the Company has commenced legal proceedings against Dominion claiming wrongful dismissal. The Company has counter-sued. We have valued this contingent liability / asset on an after tax basis, based on Management's estimate of the Company's exposure in connection with the action which is expected to range from a loss of $1.4 million to a gain of $2.5 million.
5. The corporate overhead has been valued based on an annual expense level of approximately $0.95 million (as a privately held corporation) less taxes at a 26.5% tax rate. The after tax corporate expenditures have been capitalized using the Gordon Growth Model assuming a discount rate range of 13% - 15% and a long-term growth rate of 2.5%.
6. Based on discussions with Management it is our understanding that as at the Valuation Date the intercompany accounts on DCL's balance sheet included approximately $3.48 miilion in accrued interest relating to the notes held by Dominion Citrus Income Fund.

Notes:

1. Based on Management's Internal financial statements for the fiscal years ended December 31, 2010 through December 31, 2013.
3. Based on Management's forecast for fiscal 2014.
4. Based on discussions with Management, we understand that all intercompany transactions are required for operation and are executed at market rates.
5. Additional corporate costs reflect additional costs, beyond those allocated by the corporate entity to its operating units, that would be required to run the business unit on a stand-alone basis (as a privately held company). We have based our analysis on a detailed review of the corporate costs in each of the last three fiscal years and the budget year, as well as discussions we held with Management to understand the available resources and deficiencies at the business unit level. The additional annual corporate costs estimated to be required for the Dominion Citrus Distribution business unit were calculated as 65% of the cost of the corporate IT manager, plus $5,000 for human resources related activities, $2,500 for legal costs and $10,000 for other general and administrative costs.
6. In selecting the multiple range we considered the following factors, amongst others:
   - DCD's business is stable but low growth
   - Recession resistant business
   - ODCD's strategic presence at the food terminal location
   - High tangible asset value (Including the stall lease agreement)
   - Strong customer and supplier relationships due to staff and presence at the food terminal

Dominion Citrus Limited **Schedule 6.2**
Dominion Citrus Distribution Business Unit
Tangible Asset Backing
$CND

	Notes	Financial Position 31-Mar-14
Cash	Note 1	-
Accounts receivable		1,543,628
Inventory		373,091
Prepaid expenses		179,070
Supplier advances		24,840
Current Assets		**2,120,629**
Fixed Assets (Net)		299,215
Total Assets		**2,419,844**
Accounts payable & accrued liabilities		2,591,329
Total Liabilities		**2,591,329**
Total Equity		**(171,485)**
Value of Stalls		3,500,000
Tangible Asset Backing		**3,328,515**

	Low	High
Estimated Enterprise Value	**1,400,000**	**1,680,000**
Less: Tangible Asset Backing	(3,328,515)	(3,328,515)

Impact on Dominion Farm and Meschino Banana		Note 9			(6,337,000)	-
Net impact of Liquidation of the Dominion Citrus Distribution Business Unit					**(5,249,350)**	**1,087,650**

Notes

1. For the purposes of our analysis we have assumed that all the cash on the Company's balance sheet as at the Valuation Date belonged to corporate division, as each of the business segements would be able to finance its operations through an operating line backed by accounts receivable and inventory.
2. In the sale of the assets of the business units to be liquidated we assumed the following recovery rates: Receivables - 85% of carrying value, Inventory - 50% of carrying value, Prepaids - 0%, Fixed assets - 100% of carrying value.
3. Reflects the rights associated with a long-term lease agreement granting the Company the right to occupy two stalls at the Terminal. We understand that transactions involving stalls at the Ontario Food Terminal are infrequent and accordingly have valued the stalls based on the most recent transaction involving publicly available information which saw Dominion sell the rights to a renewable 99 year lease on two stalls at the Terminal for $3.5 million in 2009.
4. Two saleable business units, Dominion Farms and Meschino Banana, benefit greatly from the sale of their products through the Terminal. Meschino Banana sells the majority of its products from the Terminal and Dominion Farms generates approximately 20% of its revenues from the sale of produce out of the Terminal. Based on discussions with Management, neither business would be financially viable if it did not have the ability to sell out of the Terminal. Accordingly, we have treated the stalls as saleable assets but accounted for the determintal impact on the business of other busines sunits in note nine below.
5. Transaction costs relating to both the sale of individual assets and business units have been estimated at 5% of market value.
6. We have assumed that no capital gains will be realized on the disposition of capital property and all proceeds of disposition will be taxed as income at the prevailing Ontario corporate tax rates.
7. Liabilities relating to the business unit have been assumed to be repaid in a liquidation scenario.
8. Severance for the business unit being liquidated has been calculated on an after-tax basis assuming an average of four months of severance on a gross payroll of $2.7 million.
9. We have incorporated the negative impact of the liquidation of the Dominion Citrus Distribution business unit on Dominion Farm and Meschino Banana on the low end of our value range as on the high end of our range we have assumed that the lost sales of these business units could be replaced in the marketplace at similar margins. The impact on the Meschino Banana and Dominion Farms at the low end of our value range has been calculated as follows:

	Dominion Farm	Meschino Banana	Total Impact
Lost Revenues	**$ 2,800,000**	**$ 4,000,000**	**$ 6,800,000**
Margin on Revenues (%)	29.0%	15.5%	21.1%
Lost Gross Margin	**$ 812,000**	**$ 620,000**	**$ 1,432,000**
Multiple	4.75	4.00	4.43
Lost Value	**$ 3,857,000**	**$ 2,480,000**	**$ 6,337,000**

Equity Value - Rounded			**7,860,000**		**8,740,000**	

Notes:

1. Based on Management's Internal financial statements for the fiscal years ended December 31, 2010 through December 31, 2013.
2. Based on Management's forecast for fiscal 2014.
3. Based on discussions with Management, we understand that all intercompany transactions are required for operation and are executed at market rates.
4. Additional corporate costs reflect additional costs, beyond those allocated by the corporate entity to its operating units, that would be required to run the business unit on a stand-alone basis (as a privately held company). We have based our analysis on a detailed review of the corporate costs in each of the last three fiscal years and the budget year, as well as discussions we held with Management to understand the available resources and deficiencies at the business unit level. The additional annual corporate costs estimated to be required for the Dominion Farm business unit were calculated as 14% of the cost of the corporate IT manager, $20,000 to augment the financial capabilities of the unit by transforming the current financial position into a more senior role, plus $5,000 for human resources related activities, $2,500 for legal costs and $10,000 for other general and administrative costs.
5. In selecting the multiple range we considered the following factors, amongst others:
   - Strong and incentivized management
   - Dependency on the personal goodwill of Tony that may not be transferable
   - Good customer diversification while serving many national grocery chains
   - Recession resistant business (carrot and onion sales)
   - Strong supplier relationships with farms in the Holland Marsh area
   - Alternative supply sources with strong relationships with some international suppliers
   - Currently operating near capacity at a 32,000 square foot landlocked facility
   - Stable but highly competitive business, although some local competitors have recently exited the market

2. Based on Management's forecast for fiscal 2014.
3. Based on discussions with Management, we understand that all intercompany transactions are required for operation and are executed at market rates.
4. Additional corporate costs reflect additional costs, beyond those allocated by the corporate entity to its operating units, that would be required to run the business unit on a stand-alone basis (as a privately held company). We have based our analysis on a detailed review of the corporate costs in each of the last three fiscal years and the budget year, as well as discussions we held with Management to understand the available resources and deficiencies at the business unit level. The additional annual corporate costs estimated to be required for the Country Fresh business unit were calculated as 8% of the cost of the corporate IT manager, an additional senior salesperson for $75,000, $20,000 to augment the financial capabilities of the unit by transforming the current financial position into a more senior role, plus $5,000 for human resources related activities, $2,500 for legal costs and $10,000 for other general and administrative costs.
5. In selecting the multiple range we considered the following factors, amongst others:
   - Dependence on a few main lines of business (McDonalds tomatoes, Fisher Capespan, Moroccan program)
   - Low tangbile asset backing
   - Limited value addd - Storing, sorting and restacking
   - Not as dependent on OFT - Except for clementines, most business done out of Etobicoke facility
   - McDonalds business appears to be long-term and has some commercial goodwill
   - Low margin and a small critical mass
   - Growth constrained by the size of the facility (7,000 sqft). Difficult to contemplate expansion with only three customers and very seasonal business and capacity utilization

Equity Value - Rounded			**1,320,000**		**1,740,000**	

<u>Notes:</u>

1. Based on Management's Internal financial statements for the fiscal years ended December 31, 2010 through December 31, 2013.
2. Based on Management's forecast for fiscal 2014.
3. Based on discussions with Management, we understand that all intercompany transactions are required for operation and are executed at market rates.
4. Additional corporate costs reflect additional costs, beyond those allocated by the corporate entity to its operating units, that would be required to run the business unit on a stand-alone basis (as a privately held company). We have based our analysis on a detailed review of the corporate costs in each of the last three fiscal years and the budget year as well as discussions we held with Management to understand the available resources and deficiencies at each business unit. The additional annual corporate costs estimated to be required for the Meschino Banana business unit were calculated as 8% of the cost of the corporate IT manager, plus $5,000 for human resources related activities, $2,500 for legal costs and $10,000 for other general and administrative costs.
5. In selecting the multiple range we considered the following factors, amongst others:
   - 65% of sales are banana related
   - Not unionized
   - Some dependency on OFT for storefront (pallets within the stalls)
   - Competitive business
   - Strong player in the market place. Ripening function requires skill
   - some capacity constraints. 8,000 sqft facility with eight ripening rooms

Dominion Citrus Limited **Schedule 9.2**

1. Based on Management's Internal financial statements for the fiscal years ended December 31, 2010 through December 31, 2013.
2. Based on Management's forecast for fiscal 2014.
3. Based on discussions with Management, we understand that all intercompany transactions are required for operation and are executed at market rates.
4. It is our understanding that Bo Fruits operates on its own and has all the staff and other resources required to run the business unit on a completely autonomous basis.
5. In selecting the multiple range we considered the following factors, amongst others:
   - Strong and incentivized management
   - Small critical mass
   - Niche position, selling to smaller retailers
   - Higher margins on small quantities of high quality produce
   - Strong tangible asset backing. Own facility and two trucks
   - Possible dependency on certain members of the management team

Notes

1. The impact on the future cash flows attributable to DCL were Dominion Farms to be sold to an arm's length party were calculated taking into consideration two scenarios. Under one scenario we assumed that distribution revenues of DCD from sale of product purchased from Dominion Farm would continue or could be replaced by other customers. Under a second scenario we assumed that given the maturity of the industry and that in order to recover these revenues DCD would need to take business away from its competitors, were a loss of business to occur, the loss in business would not be recoverable. Given the uncertainty surrounding such an event We have averaged out the two scenario in calculating the overall impact on the cash flows of DCL.
2. The impact on the overall EBITDA of DCL has been calculated as follows:

		2014 Budget	Q1 Actual			2014 Budget	Q1 Actual
DF	Sales	11,550,102	4,816,321	**DCD**	Sales	36,127,340	9,936,449

	Margin - $	**4,172,957**	**1,498,659**		**Margin - $**	**4,038,428**	**1,050,038**
	Margin - %	***36.1%***	***31.1%***		**Margin - %**	***11.2%***	***10.6%***

	2011	2012	2013	Avg	2014 Budget
DF Sales to DCD - Last 3 Years:	3,471,679	2,832,333	3,187,378	3,163,797	3,249,898

		2014 Budget	Q1 Actual	Q2 - Q4 Estimate
DCD Sales to Dominion Farm Replaced:				
	Dominion Farm Operating Profit	(1,500,100)	(735,800)	(764,300)
	Dominion Farm Depreciation	(176,512)	(42,240)	(134,272)
	Dominion Farm EBITDA Loss	**(1,676,612)**	**(778,040)**	**(898,572)**
DCD Sales to Dominion Farm Not Replaced:				
	Operating Profit	(1,500,100)	(735,800)	(764,300)
	Dominion Farm Depreciation	(176,512)	(42,240)	(134,272)
	Dominion Farm EBITDA Loss	(1,676,612)	(778,040)	(898,572)
Loss of DCD Profit on DF Product (2014 Budget)	Loss of Sales (2014 Budget)	(3,249,898)	(681,181)	(2,568,717)
	Margin Loss - %*	11.2%	11.2%	11.2%
	Margin Loss - $	(363,284)	(76,145)	(287,139)
	Add: Reduction in Fixed Overhead**	-	-	-
	OFT EBITDA Loss	(363,284)	(76,145)	(287,139)
	Total EBITDA Loss	**(2,039,895)**	**(854,185)**	**(1,185,711)**
AVERAGE EBITDA Loss:		**(1,858,253)**	**(816,112)**	**(1,042,141)**

*Excludes costs directly relating to the Moroccan program and F/X charges
** Assumed to be negligible given that the loss to the OTF represents less than 10% of its annual business.

3. As the 2014 EBITDA loss is assumed to reflect annual EBITDA losses going forward given that the 2014 budget for Dominion Farm approximates its long-term maintainable EBITDA potential the estimate for the 2014 sales to DCD approximate their three year historical average.
4. Depreciation in the terminal period is expected to equal the projected capital expenditures in the same period. Depreciation in years 2015 to 2017 is expected to increase gradually from current levels as forecast in the 2014 budget to the expected depreciation in the terminal period.
5. For simplicity, the lost EBIT has been assumed to be incremental to the baseline business and has therefore been taxed at the prevailing Ontario corporate tax rates without consideration of the impact of the lost EBIT on the timing of the utilization of the existing tax pools.
6. Capital expenditures reflect capital expenditures of Dominion Farm no longer expected to be incurred by the consolidated DCL. Capital expenditures have been forecast to remain consistent with the 2014 budgeted capital expenditure levels.
7. Changes in working capital requirements have been calculated using the methodology noted in Schedule 2 off an opening working capital balance for DCL excluding Dominion Farm of approximately $930,000 as at the Valuation Date.
8. Calculated based on the Gordon Growth Formula: 1/(Discount Rate - Terminal Growth Rate).
9. The rationale behind the discount rate selection was discussed in Schedule 1. The risk inherent in the lost cash lows, which reflect an average of two plausible scenarios is not dissimilar from the risk of the business as a whole as reflected in Schedule 1.
