Note: (m) = meters, % = percent, g/t = grams per tonne
(1) TPM is total precious metals (gold+platinum+palladium)

Table 2. Collar coordinates of MQ-13-028. The datum used to acquire the UTM coordinates is World Geodetic System 84 Universal Transverse Mercator Zone 22 North. Azimuth is degrees from true north. Elevation indicates meters above sea level.

Hole Number	UTM East	UTM North	Elevation (m)	Length (m)	Azimuth	Dip	Target
