¹The Silver equivalent grades ("AgEq") in all tables within this release, have been calculated using metal prices of US\$25oz Silver; US\$1.00/lb Zinc; and US\$1.00/lb Lead. Metal recoveries are not considered in this calculation. Further drilling is required to provide a more accurate assessment of vein thickness and true width may vary.

AgEq amounts from previously reported holes 1-3 have been calculated using Silver, Zinc, and Lead prices consistent with other disclosures in this press release. As a result, AgEq amounts shown in this press release vary from the press release of August 11, 2011.
