### NON IFRS MEASURES

#### C1 cost of production

C1 cost of production = cost of production excluding product distribution costs, sales royalties and depreciation and amortisation before adjustment for impairment. C1 cost, which is a non-IFRS measure, is a widely used 'industry standard' term. We use this measure as a meaningful way to compare our performance from period to period. We believe that, in addition to conventional measures prepared in accordance with IFRS, certain investors use this information to evaluate our performance. C1 cost information (unaudited) has been extracted from the financial statements. For an analysis of total cost of sales refer to Note 11 to the financial statements. Refer to page 8 for reconciliation.

#### EBITDA

The Company's Earnings Before Interest, Tax, Depreciation and Amortisation (EBITDA) represents profit before finance costs, taxation, depreciation and amortisation, impairments, foreign exchange gains/losses, restructure costs and other income. As the mining industry is a capital-intensive industry, capital expenditures, the level of gearing and finance costs may have a significant impact on the net profit of companies with similar operating results. Therefore, the Company believes EBITDA may be helpful in analysing the operating results of a mining company like itself. Although EBITDA is widely used in the mining industry as a benchmark to reflect operating performance, financing capability and liquidity, it is not regarded as a measure of operating performance and liquidity under IFRS. Refer to page 7 for reconciliation.

## **Management Discussion and Analysis** For the Three Months Ended 30 September 2015 (All figures are in US dollars unless otherwise indicated)

Revenue decreased by 6%, due to a 36% decrease in sales volume, which was partially offset by a 47% increase in realised sales price. There were no sales from KM (2014: 0.100Mlb). The last of KM finished goods were sold in December 2014.

Gross Profit in 2015 of US\$11.3M is higher than the gross profit in 2014 of US\$1.4M due to a 47% increase in realised sales price and a 32% decrease in total cost of sales.

Loss after Tax Attributable to the Members of the Parent for 2015 of US\$16.4M is lower than the loss of US\$38.8M in 2014, and is predominantly due to the US\$9.9M increase in gross profit, a lower tax expense of US\$10.8M (2014: US\$22.0M) which has arisen as a result of deferred tax recognised on foreign exchange temporary differences in Namibia and a decrease in both KM care and maintenance expenses of US\$2.5M and LHM fixed costs during plant shutdown of US\$1.9M.

### Three Year Trend

Revenue has decreased by 47% since 2013 due to a 52% decrease in sales volume which was partially offset by an 11% increase in realised sales price. Gross profit in 2015 of US\$11.3M is a turnaround from a US\$14.9M gross loss in 2013 due to there being no impairment of inventory, stores and consumables in 2015 (2013: US\$12.0M impairment of KM inventory, stores and consumables). In addition, the gross loss in 2013 included a gross loss before impairments from KM of US\$5.4M.

# PALADIN ENERGY LTD

## **Management Discussion and Analysis** For the Three Months Ended 30 September 2015 (All figures are in US dollars unless otherwise indicated)

The unit C1 cost of production for LHM decreased 16% over the last year, from US\$33.0/lb in the September 2014 quarter to US\$27.8/lb in the September 2015 quarter, due to a combination of a weaker Namibian dollar and cost saving initiatives.

The further optimisation of the BRP described in the June quarterly report was completed during this quarter and has lifted BRP performance to greater than 200% of design (in terms of sodium bicarbonate recycled and caustic savings).

Further associated innovations remain either in the implementation or design phase and scheduled for both FY16 and FY17.

Total revenue for the quarter ended September 2015 was lower than the comparative quarter, due to lower sales volumes which was partially offset by higher realised uranium prices. Total revenue for the quarter ended June 2015 was higher than the comparative quarter, due to higher realised uranium prices. Total revenues for the quarters ended March 2015 and December 2014 were lower than the comparative quarters, due mainly to lower sales volumes. Additionally, KM is now in care and maintenance with production ceasing on 6 May 2014.

**Certain Balance Sheet items are set out below:**

### **SUMMARISED STATEMENT OF FINANCIAL POSITION**

	<b>30 SEPT 2015 UNAUDITED US\$M</b>	<b>30 JUNE 2015 AUDITED US\$M</b>	<b>30 JUNE 2014 AUDITED US\$M</b>
Cash and cash equivalents	108.4	183.7	88.8

Interest bearing loans and borrowings	520.2	534.5	725.6
Total long-term liabilities	851.0	859.3	1,049.1
<b>Net Assets</b>	<b>159.1</b>	<b>198.3</b>	<b>432.4</b>

Cash and Cash Equivalents have decreased by US\$75.3M, mainly as a result of payments to suppliers and employees of US\$47.3M, the repurchase of US\$20M April 2017 Convertible Bonds for US\$18.0M (excluding accrued interest), payments for plant and equipment of US\$0.9M, exploration and evaluation project expenditure of US\$3.7M and net interest paid of US\$5.7M.

Inventories have increased by US\$13.5M, predominantly due to an increase in the number of pounds of finished goods at 30 September 2015 as LHM produced 1.083Mlb and sold 0.800Mlb during the quarter.

Interest Bearing Loans and Borrowings have decreased by US\$14.3M, primarily as a result of the repurchase of US\$20M of the US\$274M April 2017 Convertible Bonds, which has been partially offset by the non-cash accretion of the convertible bonds of US\$3.5M.

Segment Assets: Namibian assets have increased predominantly due to an increase in inventory and trade and other receivables which was partially offset by a decrease in cash. Malawian assets have decreased predominantly as a result of a decrease in cash. KM is on care and maintenance. The Exploration segment assets have decreased predominantly as a result of a decrease in the US dollar value of exploration assets, which is due to the weakening of the Australian and Canadian dollar currencies against the US dollar. In the Unallocated portion, assets decreased primarily due to a decrease in cash and cash equivalents, which included the repurchase of US\$20M of the US\$274M Convertible Bonds due in April 2017 for US\$18.5M (including accrued interest), restructure costs of US\$4.3M and US\$5.3M convertible bond interest.

### **LIQUIDITY AND CAPITAL RESOURCES**

The Group's principal source of liquidity as at 30 September 2015, was cash of US\$108.4M (30 June 2015: US\$183.7M). Any cash available to be invested is held with Australian banks with a minimum AA- Standard & Poor's credit rating over a range of maturities. Of this, US\$101.2M is held in US dollars.

Net Cash Outflow from Operating Activities was US\$52.3M in 2015 (2014: outflow US\$9.5M), primarily due to payments to suppliers and employees of US\$47.3M (2014: US\$66.8M) and net interest paid of US\$5.7M (2014: US\$0.2M), which were partially offset by receipts from customers of US\$0.8M (2014: US\$57.8M).

Net Cash Outflow from Investing Activities was US\$4.2M in 2015 and is due primarily to plant and equipment acquisitions of US\$0.9M at LHM, as well as capitalised exploration expenditure of US\$3.3M (including US\$1.2M for the acquisition of the Carely Bore Uranium Deposit). The net cash outflow of US\$7.1M in 2014 was due primarily to plant and equipment acquisitions of US\$5.5M, predominantly the nano-filtration equipment and spiral heat exchangers at LHM, as well as capitalised exploration expenditure of US\$1.6M.

Net Cash Outflow from Financing Activities of US\$18.0M in 2015 is attributable to the repurchase of US\$20M April 2017 Convertible Bonds for US\$18.0M (excluding accrued interest). The net inflow in 2014 of US\$137.9M is attributable to the proceeds received from the sale of a 25% interest in LHM for US\$170M, which has been partially offset by a US\$30.8M repayment of the LHM project finance and US\$1.3M in syndicated loan facility establishment costs.

### **GOING CONCERN**

As at 30 September 2015, the Group had a net working capital surplus of US\$206.7M (30 June 2015: US\$231.8M), including cash on hand of US\$108.4M (30 June 2015: US\$183.7M). Included within this cash on hand is US\$31.1M (30 June 2015: US\$31.2M), which is restricted for use in respect of the LHM syndicated loan facility and supplier guarantees provided by LHM.

The amount outstanding at 30 September 2015 on the syndicated loan facility was US\$60.9M.

Repayment obligations during the next twelve months to 30 September 2016 in respect of interest bearing loans and borrowings are summarised as follows:

- secured bank loan principal repayments of US\$9.1M for syndicated loan facility; and
- interest payments of US\$28.5M for syndicated loan facility and 2012 (due 2017) and 2015 (due 2020) unsecured convertible bonds.

At the date of this unaudited report, the Directors are satisfied there are reasonable grounds to believe that, having regard to the Group's position and its available financing options, the Group will be able to meet its obligations as and when they fall due.

### **CRITICAL ACCOUNTING ESTIMATES**

The preparation of the Unaudited Financial Report requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Significant areas requiring the use of management estimates relate to the determination of the following: carrying value or impairment of inventories, financial investments, property, plant and equipment, intangibles, mineral properties and deferred tax assets; carrying value of rehabilitation, mine closure, sales contracts provisions and deferred tax liabilities; and the calculation of share-based payments.

### **FINANCIAL INSTRUMENTS**

At 30 September 2015, the Group has exposure to interest rate risk, which is the risk that the Group's financial position will be adversely affected by movements in interest rates that will increase the cost of floating rate project finance debt or opportunity losses that may arise on fixed rate convertible bonds in a falling interest rate environment. deposits is not considered to be a material risk due to the historically low US dollar interest rates of these financial instruments.

The Group has no significant monetary foreign currency assets or liabilities apart from Namibian Dollar cash, receivables, payables and provisions and Australian dollar cash and payables and Canadian Dollar payables.

The Group currently does not engage in any hedging or derivative transactions to manage uranium price movements, interest rate or foreign currency risks.

The Group's credit risk is the risk that a contracting entity will not complete its obligation under a financial instrument that will result in a financial loss to the Group. The carrying amount of financial assets represents the maximum credit exposure. The Group trades only with recognised, credit worthy third parties. In addition, receivable balances are monitored on an ongoing basis with the result that the Group's exposure to bad debts is not material.

The Group's treasury function is responsible for the Group's capital management, including management of the long-term debt and cash as part of the capital structure. This involves the use of corporate forecasting models which enable analysis of the Group's financial position, including cash flow forecasts, to determine the future capital management requirements. To ensure sufficient funding for operational expenditure and growth activities, a range of assumptions are modelled so as to provide the flexibility in determining the Group's optimal future capital structure.

**Identification of reportable segments**

The Company has identified its operating segments to be Exploration, Namibia and Malawi, on the basis of the nature of the activity and geographical location and different regulatory environments. The main segment activity in Namibia and Malawi<sup>(1)</sup> is the production and sale of uranium from the mines located in these geographic regions. The Exploration segment is focused on developing exploration and evaluation projects in Australia, Niger and Canada. Unallocated portion covers the Company's sales and marketing, treasury, corporate and administration.

Discrete financial information about each of these operating segments is reported to the Group's executive management team (chief operating decision makers) on at least a monthly basis.

The accounting policies used by the Group in reporting segments internally are the same as those contained in the accounts and in the prior period.

Inter-entity sales are priced with reference to the spot rate.

Corporate charges comprise non-segmental expenses such as corporate office expenses. A proportion of the corporate charges are allocated to Namibia and Malawi on the basis of timesheet allocations with the balance remaining in Unallocated.

The Group's customers are major utilities and other entities located mainly in USA, Australia, China, Taiwan and UK. These revenues are attributed to the geographic location of the mines being the reporting segments Namibia and Malawi.

(1) Currently on care and maintenance due to low uranium price. Production ceased on 6 May 2014.

*Secured bank loans*

Langer Heinrich Mine, Namibia - US\$70M Syndicated Loan Facility.  
 The Borrower - Paladin Finance Pty Ltd ("PFPL"). The facility is secured by a Share Pledge Agreement from PFPL over its 75% interest in LHMHL. The facility has a financial covenant holiday for the first four 6-monthly calculations periods commencing 31 December 2014. The first debt covenant ratios calculation date is 31 December 2016. The facility is provided by Nedbank Capital, a division of Nedbank Limited, Nedbank Namibia Limited, along with the Standard Bank of South Africa Limited and Standard Bank Namibia Limited. The facility is repayable on a semi-annual basis over the term of the loan (five and a half years) commencing 31 December 2014 with seven instalments of US\$4.454M and 3 instalments of US\$9.545M and one of US\$9.550M and bears interest at the LIBOR plus 5.50%. Under the terms of the facility, 50% of any distributions from LHU to PFPL are repayable to the financiers.

At 30 September 2015, US\$60.9M (30 June 2015: US\$60.9M) was outstanding under the syndicated loan facility.

Transaction costs relating to the establishment of the facility have been included as part of interest bearing loans and borrowings.

**NOTE 7. OTHER INTEREST BEARING LOANS AND BORROWINGS - CNNC**

<b>Non Current</b>	<b>Maturity</b>		
Intercompany loan assigned to CNNC	2016 to 2021	99.5	98.7
		<b>99.5</b>	<b>98.7</b>

As part of the sale of a 25% interest in the Langer Heinrich mining operation, US\$96M (representing 25%) of the intercompany shareholder loans owing by LHU to PFPL were assigned to CNNC under the same interest rate (LIBOR plus a margin between 2% and 4.25%) and conditions as those presently existing.

Pursuant to the intercompany shareholder loan agreements, repayment dates range from 2016 to 2021, however, repayment is dependent on LHU generating sufficient free cash flows to repay the loans and the loans have not been guaranteed by Paladin Energy Ltd (Paladin). If LHU does not have sufficient funds to repay the intercompany shareholder loans, neither CNNC nor PFPL can demand repayment and repayment of the loans will be deferred.

All loan repayments from LHU will be paid on a pro rata basis against the outstanding balances, (i.e. 75% to PFPL and 25% to CNNC).

On consolidation, PFPL's 75% share of the LHU intercompany shareholder loans are eliminated against the intercompany shareholder loans receivable recorded in PFPL and therefore, they do not appear on Paladin's unaudited consolidated statement of financial position. As a result of the consolidation of 100% of LHU's assets and liabilities, LHU's liability of US\$99.5M to CNNC is recognised on the unaudited consolidated statement of financial position.

**NOTE 9. FINANCIAL INSTRUMENTS (continued)**

**Fair value hierarchy**

The Group uses various methods in estimating the fair value of a financial instrument. The methods comprise:

Level 1 – the fair value is calculated using quoted prices in active markets.

Level 2 – the fair value is estimated using inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3 – the fair value is estimated using inputs for the asset or liability that are not based on observable market data.

The fair value of the financial instruments as well as the methods used to estimate the fair value are summarised in the table below:

The Group classifies its investments and other financial assets in the following categories: loans and receivables, held-to-maturity investments, available-for-sale financial assets and financial assets held for trading. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition.

	Quarter ended 30 September 2015			Total	Year ended 30 June 2015			Total
	Quoted market price (Level 1)	Valuation technique-observable inputs (Level 2)	Valuation technique-non market observable inputs (Level 3)		Quoted market price (Level 1)	Valuation technique-observable inputs (Level 2)	Valuation technique-non market observable inputs (Level 3)

<b>Financial assets measured at fair value</b>

	<u>2.4</u>	<u>-</u>	<u>-</u>	<u>2.4</u>	<u>2.6</u>	<u>-</u>	<u>-</u>	<u>2.6</u>
<b>Financial liabilities for which fair values are disclosed</b>								
Interest bearing loans and borrowings								
Floating rate borrowings <sup>(1)</sup>	-	60.9	-	60.9	-	60.9	-	60.9
Debt component of convertible bonds <sup>(2)</sup>	-	366.0	-	366.0	-	401.1	-	401.1
	<u>-</u>	<u>426.9</u>	<u>-</u>	<u>426.9</u>	<u>-</u>	<u>462.0</u>	<u>-</u>	<u>462.0</u>

(1) The fair value has been determined by discounting the future cash flows using market rates currently available for debt on similar terms, credit risk and remaining maturities.

(2) The fair value has been determined using a valuation technique based on the quoted market price of the bonds less the estimated fair value of the equity component attributable to the conversion feature, which was valued using an option pricing model. The estimated fair value of the equity component was not considered material at 30 September 2015.

Quoted market price represents the fair value determined based on quoted prices on active markets as at the reporting date without any deduction for transaction costs. The fair value of the listed equity investments are based on quoted market prices.

**NOTE 9. FINANCIAL INSTRUMENTS (continued)**

**Fair value hierarchy (continued)**

For financial instruments not quoted in active markets, the Group uses valuation techniques such as present value techniques, comparison to similar instruments for which market observable prices exist and other relevant models used by market participants. These valuation techniques use both observable and unobservable market inputs.

For financial instruments that are recognised at fair value on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Total prepayment of US\$200M under a six-year off-take agreement with EdF, a major electricity generator and distribution company in France, to deliver a total of 13.73Mlb U<sub>3</sub>O<sub>8</sub> in the period from 2019 to 2024. Uranium delivered under the off-take agreement will be sold to EdF at market prices prevailing at the time of delivery bounded by escalating floor and ceiling prices.

To secure the Company's obligation to deliver product representing the prepayment amount, EdF holds security over 60.1% of the Group's Michelin project in Canada. The percentage of Michelin secured will be reduced by joint agreement as the value of that project is enhanced by the Group's ongoing work. The Michelin security can also be replaced by other appropriate security if required.

These include commitments relating to tenement lease rentals and the minimum expenditure requirements of the Namibian, Malawian, Canadian, Western Australian, South Australian, Northern Territorian and Queensland Mines Departments attaching to the tenements and are subject to re-negotiation upon expiry of the exploration leases or when application for a mining licence is made.

These are necessary in order to maintain the tenements in which the Group and other parties are involved. All parties are committed to meet the conditions under which the tenements were granted in accordance with the relevant mining legislation in Namibia, Malawi, Australia and Canada.

**(b) Operating Lease Commitments**

The Group has entered into various property leases relating to rental of offices and residential accommodation.

These non-cancellable leases have remaining terms of between 1 month and 12 months. All leases include a clause to enable upward revision of rental charge on an annual basis according to prevailing market conditions.

Future minimum rentals payable under non-cancellable operating leases as at 30 September are as follows:

<b>Total other commitments</b>	<b>17.1</b>	<b>17.2</b>

**(d) Acquisition Costs**

In relation to the Manyingee Uranium Project, the re-negotiated acquisition terms provide for a payment of A\$0.75M / (US\$0.52M) (30 June 2015: A\$0.75M (US\$0.57M)) by the Group to the vendors when all project development approvals are obtained.

**(e) Bank Guarantees**

As at 30 September 2015 the Group has outstanding US\$423,917 / (A\$607,651) (30 June 2015: US\$378,192 / A\$494,021) as a current guarantee provided by a bank for the corporate office lease, a US\$120,341 / (A\$172,500) (30 June 2015: US\$143,538 / A\$187,500) guarantee for tenements, a US\$89,736 / (A\$128,630) (30 June 2015: US\$86,988 / A\$113,630) guarantee for corporate credit cards and a US\$10M (30 June 2015: US\$10M) KM environmental performance guarantee.

**(f) Contingent Liability**

A dispute has arisen between a Group company and a contractor in relation to the contract for the Stage 3 expansion at LHM. The contractor is seeking payment of the disputed sum of N\$151.1M (30 June 2015: N\$151.1M), which is approximately US\$10.8M (30 June 2015: US\$12.0M). The Group denies the claim and will vigorously defend it. The Group is also counter claiming damages from the contractor and cross-claiming from another contractor. The precise quantum of the counter-claim and cross claim has not yet been established, however the merits of the Company's defences against the claims are considered to be good, and it is expected that in the final result the Company's quantum is likely to exceed any residual entitlement that may be due on the contractors' claims.

**NOTE 24. EVENTS AFTER THE REPORTING PERIOD**

Since 30 September 2015, the Directors are not aware of any other matter or circumstance not otherwise dealt with in this unaudited report, that has significantly or may significantly affect the operations of the Group, the results of those operations or the state of affairs of the Group in subsequent periods.
