

Dr. Susan Wasserman, MSc, MD, FRCPC
Professor of Medicine
Division of Clinical Allergy and Immunology
McMaster University

Dr. Wasserman obtained her MSc and medical degree from McGill University in Montreal. She specialized in Internal Medicine, followed by subspecialty training in Allergy/Clinical Immunology. She then completed a fellowship at the Meakins Christie Laboratories at McGill University.

She is currently a Professor of Medicine, in the Division of Allergy/Clinical Immunology at McMaster University in Hamilton.

She is the Director of the Adverse Reactions Clinic at the Firestone Institute of Respiratory Health, St Joseph's Hospital in Hamilton, Ontario.

She is extensively involved in medical education in both academic and community settings, and has an active hospital based clinical practice in adult and pediatric allergy/ immunology.

Research interest and activities include clinical trials in a variety of therapeutic areas related to allergy, including allergic rhinitis and asthma, with a focus on peanut allergy and food related anaphylaxis.

She is the past President of the Ontario and Canadian Societies of Allergy and Clinical Immunology where activities included CME for physicians, allied health professionals and the community, as well as practice guidelines in areas such as anaphylaxis, rhinitis and immunotherapy.
