

Longitudinal section Zone 123

Probable reserves : 225,700oz
 Indicated resources : 56,900oz
 Inferred resources : 104,100oz
 (as of December 31, 2011)

Schematic Section 12475E

Volcanics
 Conglomerate
 Graywacke

- ★ New hole - intercept $\geq 3g/t$ and/or metal factor ≥ 10
- ★ New hole - intercept $< 3g/t$ and/or metal factor < 10
- ▲ Previously released by Aurizon - intercept $\geq 3g/t$ and/or metal factor ≥ 10
- △ Previously released by Aurizon - intercept $< 3g/t$ and/or metal factor < 10
- Historical hole - intercept $\geq 3g/t$ and/or metal factor ≥ 10
- Historical hole - intercept $< 3g/t$ and/or metal factor < 10
- [2.4/15.0] = grams per tonne gold / metres (true width)
- Favorable Gold Corridor
- Resources Outline 123 Zone
- New Mineralized Lenses

Existing Infrastructure
 Proposed Development
 Metal Factor = grade x width

CASA BERARDI GOLD MINE
Follow Up Drilling Along the 123 Zone
