

Longitudinal section Zone 123

Probable reserves : 225,700oz
 Indicated resources : 56,900oz
 Inferred resources : 104,100oz
 (as of December 31, 2011)

Schematic Section 12150E

Volcanics
 Conglomerate
 Graywacke
 Graphitic Mudstone

- ★ New hole - intercept >3g/t and/or metal factor >10
- ★ New hole - intercept <3g/t and/or metal factor <10
- ▲ Previously released by Aurizon - intercept >3g/t and/or metal factor >10
- △ Previously released by Aurizon - intercept <3g/t and/or metal factor <10
- Historical hole - intercept >3g/t and/or metal factor >10

- Historical hole - intercept <3g/t and/or metal factor <10
- 2.4/15.0 =grams per tonne gold / metres (true width)
- Favorable Gold Corridor
- Resources Outline 123 Zone
- New Mineralized Lenses

- Existing Infrastructure
- Proposed Development
- Metal Factor = grade x width
