

**Table 1. Exploration campaigns from 1973 to 2015 on the Douay Gold Project.**

CAMPAIGNS	YEAR	COMPANY	CAMPAIGNS
1	1973	Inco	Airborne magnetic-electromagnetic survey
2	1976	Inco	Significant gold mineralization intersected in bedded chert-carbonates exhalative rocks leading to discovery of Main Zone
3	1976-1983	Inco	Extensive line cutting, IP, Mag and EM ground surveys; outlined 14 km of prospective strike length; diamond drilling on Main zone
4	1986-1987	Inco/Vior	Extension of Main Zone -500 m. depth; discovery of several other gold occurrences
5	1988	Inco/Vior	Drilling of 165 Reverse Circulation holes
6	1988-1991	Inco/Vior	Detailed Mag/IP surveys; diamond drilling following up geophysical/overburden anomalies with the discovery of Douay West in 1990; DDH 84603 was drilled to test an IP anomaly located on south flank of Mag high intersecting 7.2 g/t gold over 18.1 meters
7	1991	Inco/Vior	Diamond drilling, including definition of the Douay West and Main Zones
8	1992	Vior	Diamond drilling, including definition of the 531 Zone
9	1992-1994	SOQUEM option	Line cutting, IP and Mag surveys; diamond drilling with discovery of NW Zone
10	1995	Cambior option	Douay West in-fill/exploration diamond drilling; construction of access road, power line and collared shaft
11	1996-2000	Aurizon option	Diamond drilling of the Douay West Zone; surveying and cementing previous diamond drill holes at Douay West; installation of headframe, hoist, ore bin and dry
12	2005	Vior	In-fill/exploration drilling of the Douay West Zone; drilling of new Porphyry target with discovery of Adam-Porphyry Zone 10,105m on the Douay West, Main, Central and 531 Zone
13	2006-2007	Vior	Douay drilling campaign on the Douay West Zone
14	2009-2010	Vior	Drill hole review and reinterpretation of the Douay West mineralized zone
15	2011-2015	Aurvista	Drilling of the Porphyry target; resources modelling and estimates; PEA, preliminary engineering studies of Douay West pit
