

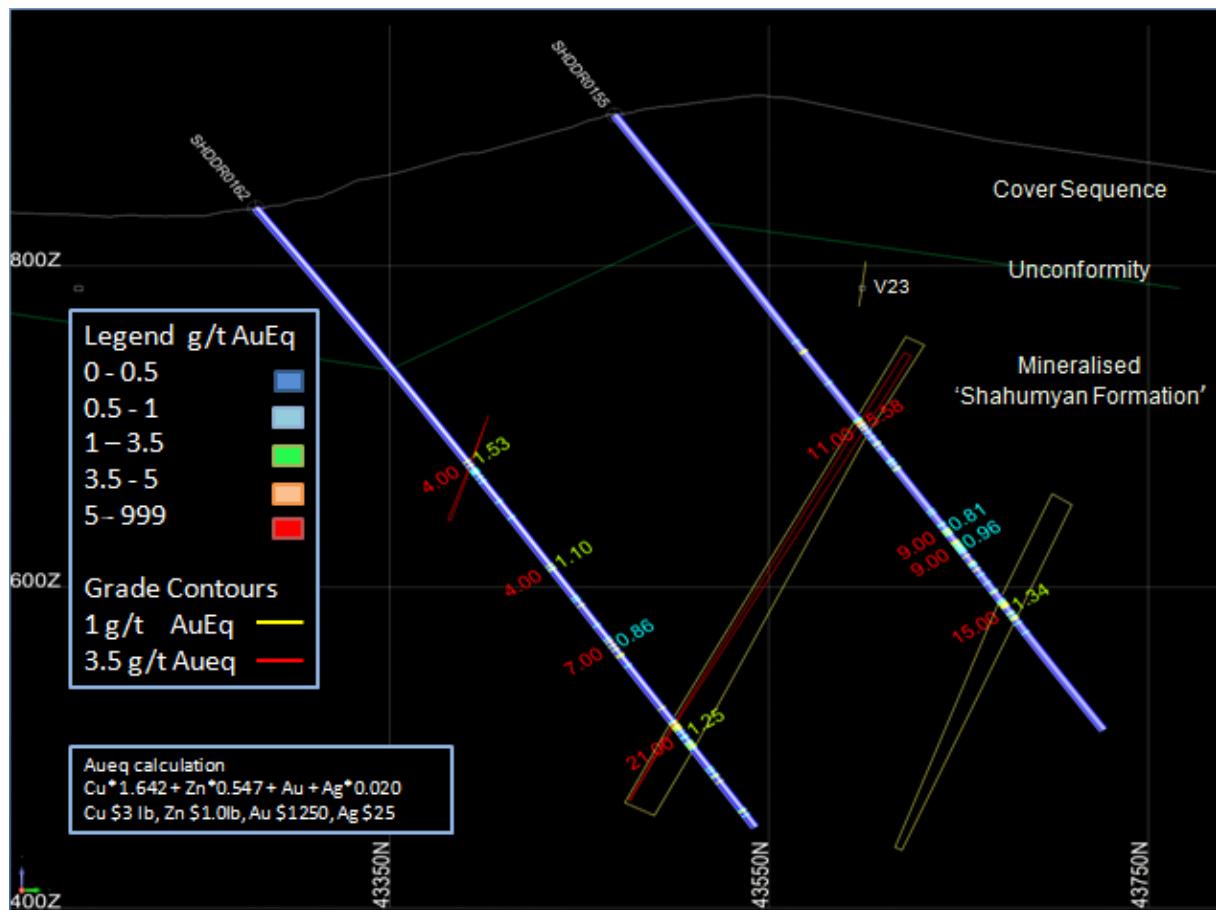

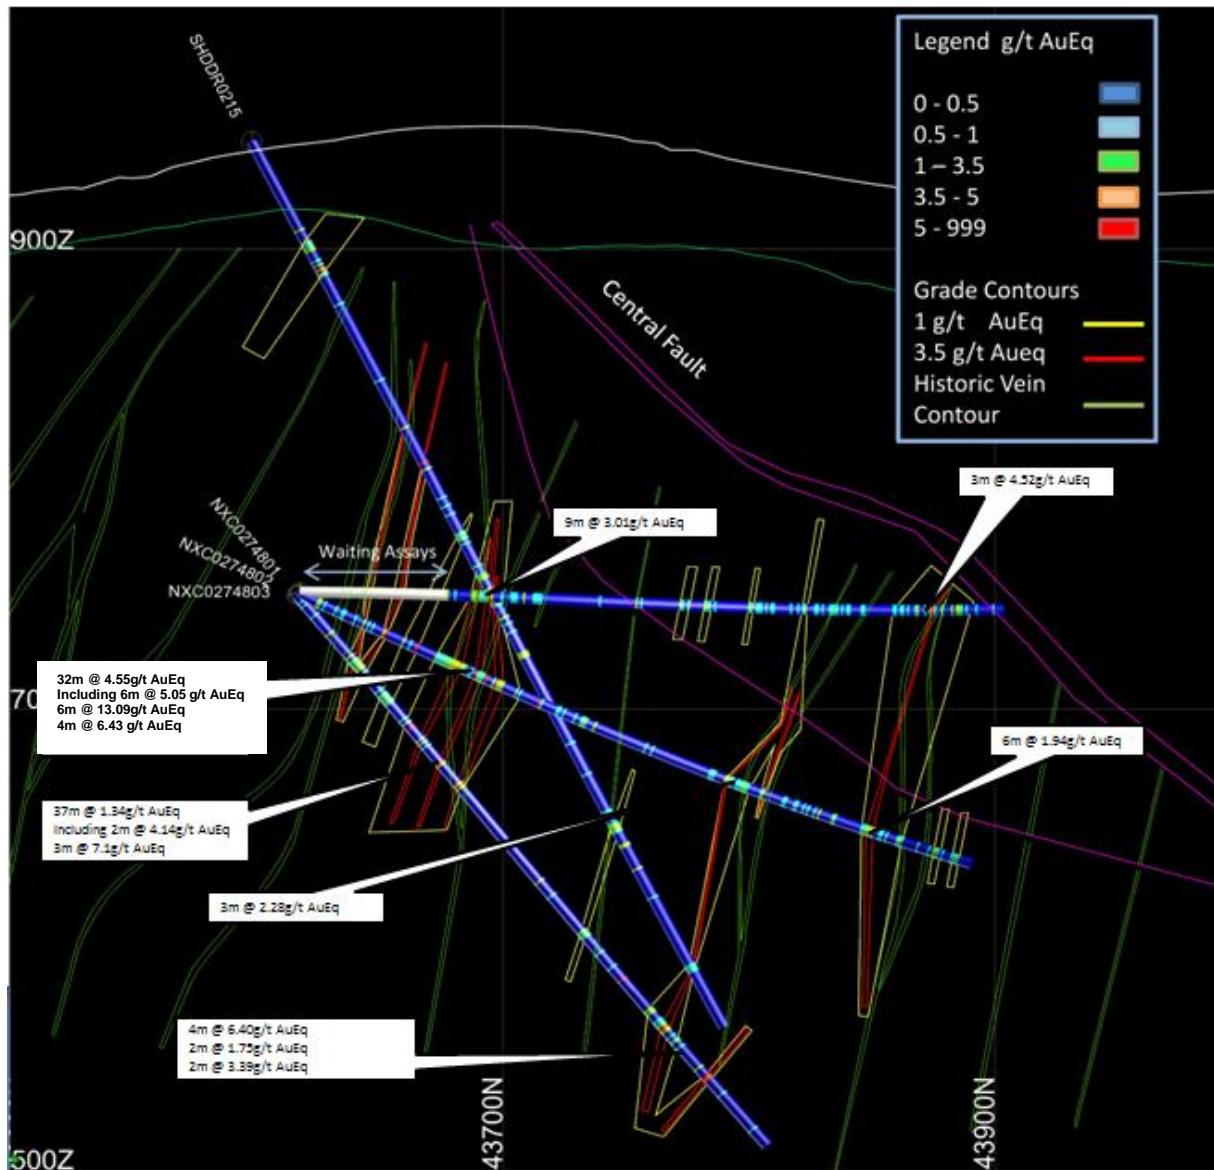

**Figure 1:** Complete Drill Hole Plan outlining Shahumyan East (yellow) and significant intercepts. The intervals are shown with the hole number followed by the interval in meters and gold equivalence in gram per tonnes. Hole with an asterix were drilled as part of the 2007 and 2008 drilling program.

**Figure 2:** Section through “Shahumyan East” showing multiple zones of polymetallic mineralisation with widths in meters (red) and grades in gold equivalence (coloured).

**Figure 3:** Underground drill section showing narrow, high-grade, polymetallic vein sets with mineralised envelopes >1g/t AuEq (yellow) and >3.5g/t AuEq (red) compared to the Former Soviet interpretation (green).

**Table 1:** All Open Pit Project drill intercepts for 2011.

Notes:

- i. Holes with an asterix were drilled as part of the 2007 and 2008 drilling campaign.
- ii. Holes with the prefix SHDDR are surface HQ open pit drilling while NXC holes are underground BQ drilling
- iii. All survey coordinates are transformed to AUSPOS.
- iv. Drill holes marked with an asterix were drilled during 2007 and 2008
