

Diamond drill holes location map for the Lac Lam  lee South Iron Project, Fermont (Quebec).

- Green dots represent the current drill holes reported in this news release (LS-12-21 to 29).
- Black dots are previously reported drill holes (from 2011, and LS-12-01 to 20).
- Blue dots are drill holes with assays pending (LS-12-30 to 38).
- Background colors depict the total field magnetic map with reds representing positive magnetic highs due to the magnetite bearing hematite-rich iron formations.
