GRAYD RESOURCE CORPORATION

Target Areas North Half of Property

2008 Resource Area

▲ > Au 100 ppb

▲ > Au 300 ppb

Tarachi
Separate high-sulphidation system
1200m by 500m soil anomaly open to west
Chip samples to 12.8 g/t Au

1 km

Cieneguita North
Faulted extension to North Zone
500m by 400m with massive silica
Rock chips to 1.0 g/t Au

North Zone Resource

El Pilar
Similar geology as North Zone
Rock chips to 10.7 g/t

Cieneguita West
250+ m down-dip
extension to the North
Zone resource

La India
DDH-04-4 37.2m grading 1.0g/t Au
in oxide, Zone open

Armagosa
Similar geology to North Zone
650m by 900m with massive silica
Rock chips to 1.5 g/t Au

Tubos
Extension of Main Zone geology and alteration
Rock chips to 1.6 g/t Au from upper unit

Nopal
Extension of Main Zone Geology
Possible shallow buried zone

Main Zone Resource
