

Figure 3. Aerial view of Roughrider uranium deposit. Outline of West Zone is from recent NI43-101 report (Keller et al. 2011). Outline of East Zone encompasses 2010 drill holes with uranium mineralization between L 100 W and 20 E (120 m strike). Outline of J-Zone is schematic and is from website of Fission Energy.

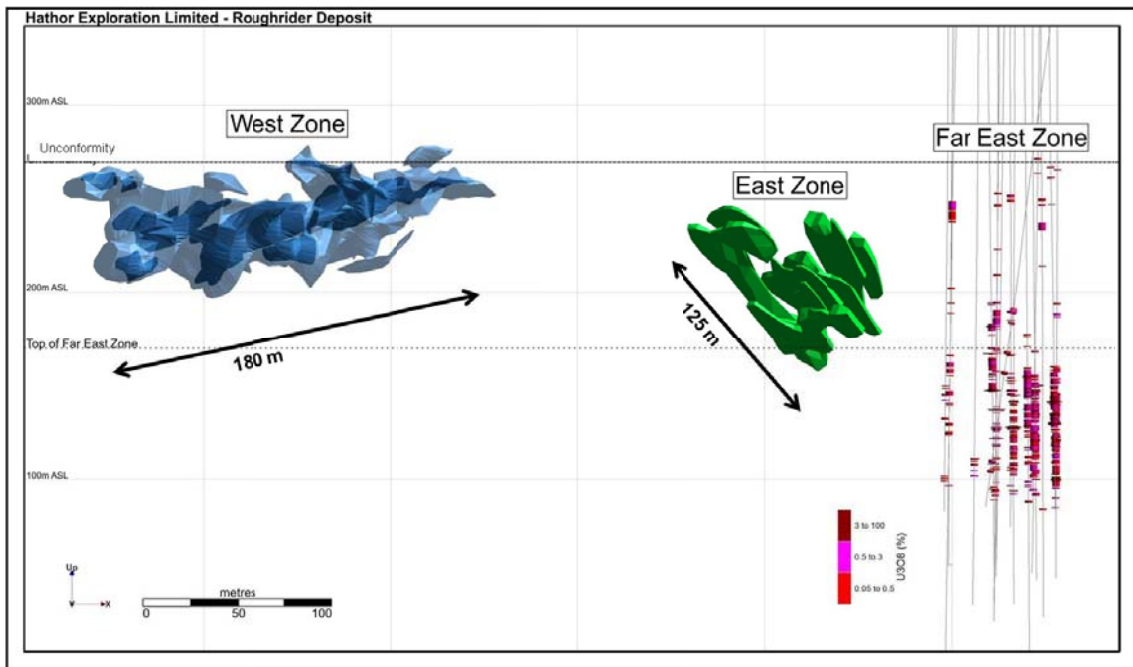

Figure 4. Three dimensional model for Roughrider Uranium Deposit, viewed north. Outline of West Zone is from recent NI43-101 report (Keller et al. 2011). Outline of East Zone is from recent mineral resource statement (May 17, 2011).
