

# Backgrounder

## COMMUNITIES COMPONENT

The **Communities Component** of the Building Canada Fund-Quebec aims to finance infrastructure projects to be completed in Quebec municipalities that have fewer than 100,000 inhabitants. Costs are shared on a one-third basis among federal, provincial and municipal levels. Projects related to water quality, wastewater management and the support of local and regional development, are funded through the Communities Component.

## PROJECTS

List of projects funded by the federal and provincial governments through the Building Canada Fund-Quebec – Communities Component
