**Figure 1. Stope Design at Kulthor**

## KULTHOR – Mine Stope Design

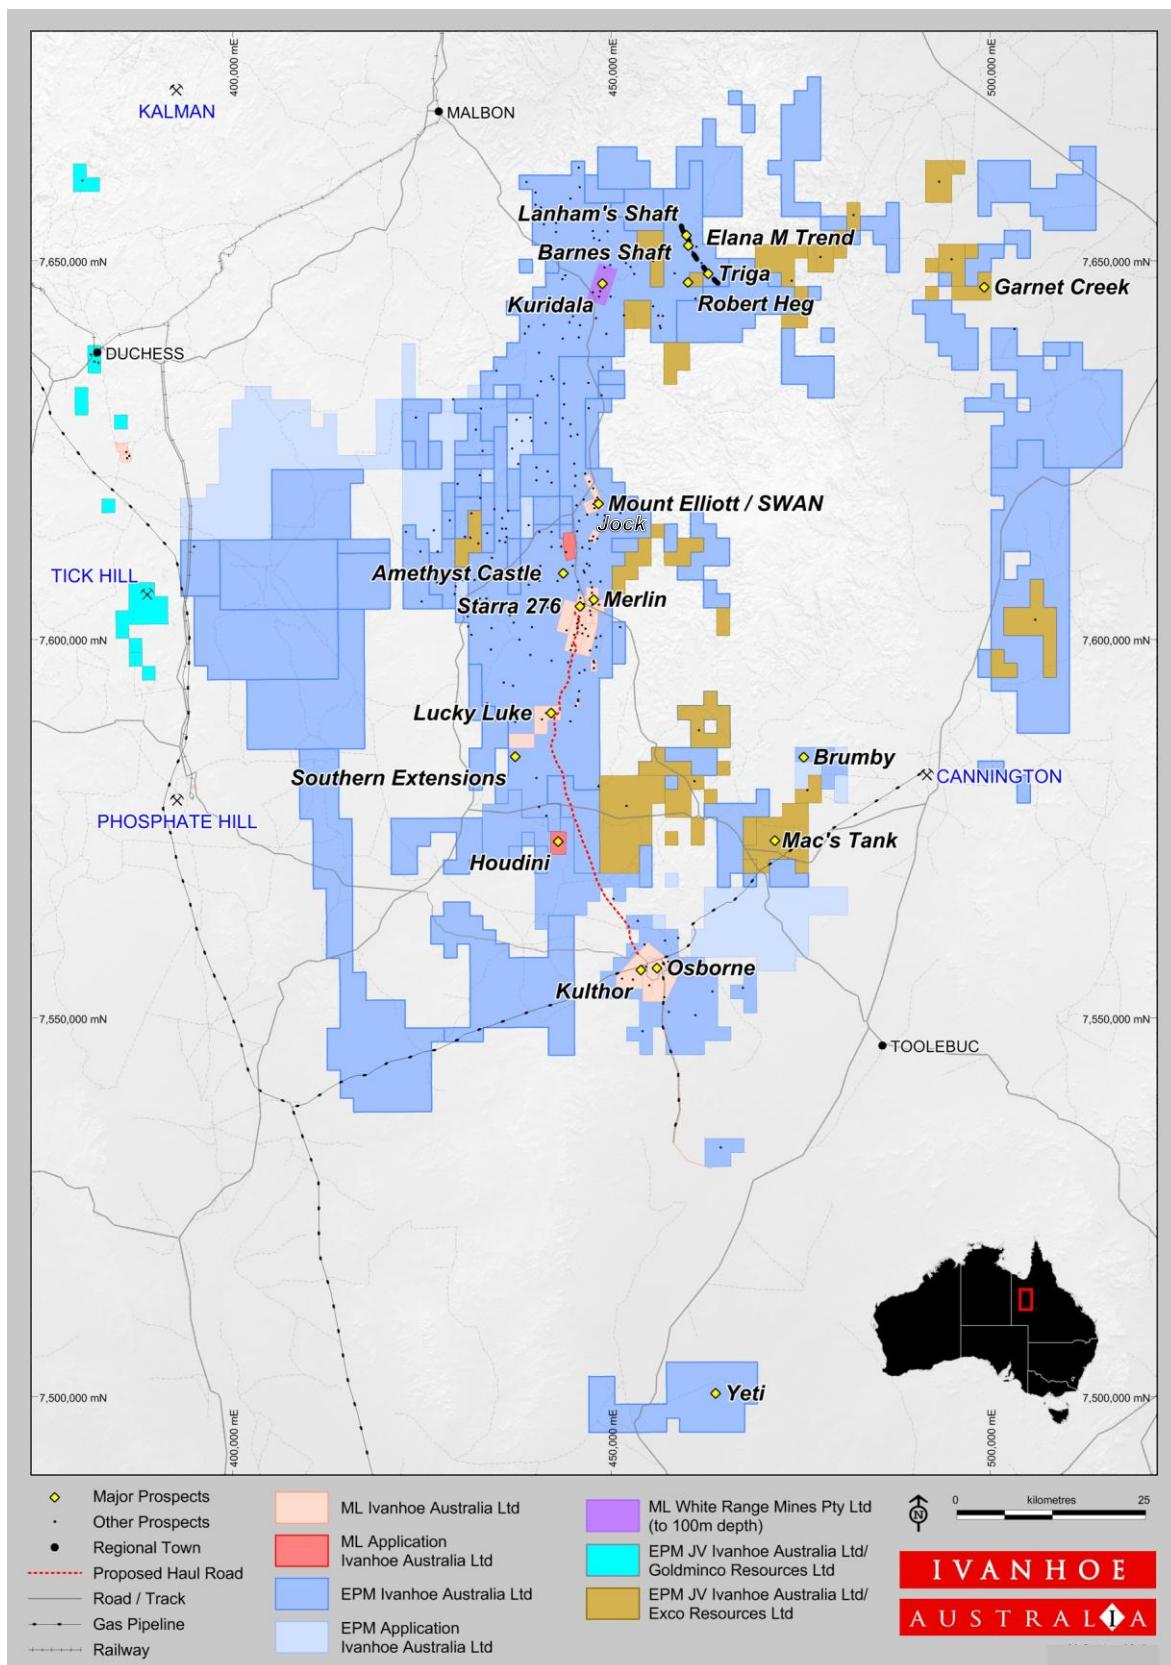

**Figure 2. 3DIP Image of Kulthor Area Showing Target Anomalies**

The two northern most indicated target areas have a coincident conductivity and chargeability high, which is similar to the response at the Kulthor deposit. These geophysical targets have had no prior drilling.

**Figure 3. Ivanhoe Australia Tenement Location Map**

**Table 3. Mount Elliott - SWAN Copper Intersections at 0.8% eCu Cut-off**

HoleID	From (m)	To (m)	Interval (m)	eCu (%)	Cu (%)	Au (g/t)	Ag (ppm)	Co (ppm)	Collar Coordinates (MEG)			Azi	Dip
