

Figure 1. Starra 276 Long Section – showing current Mineral Resource envelope and location of recent drilling.

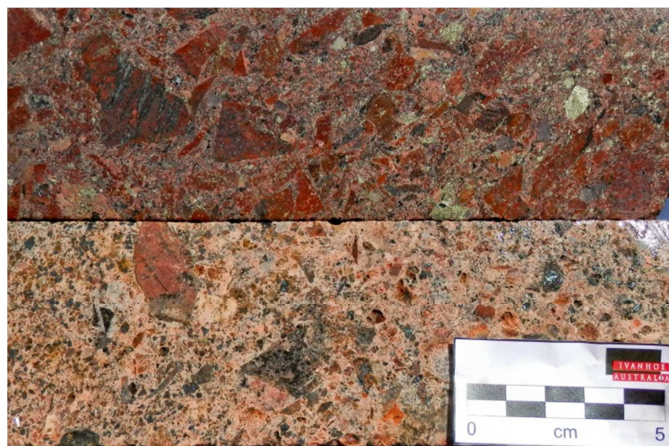

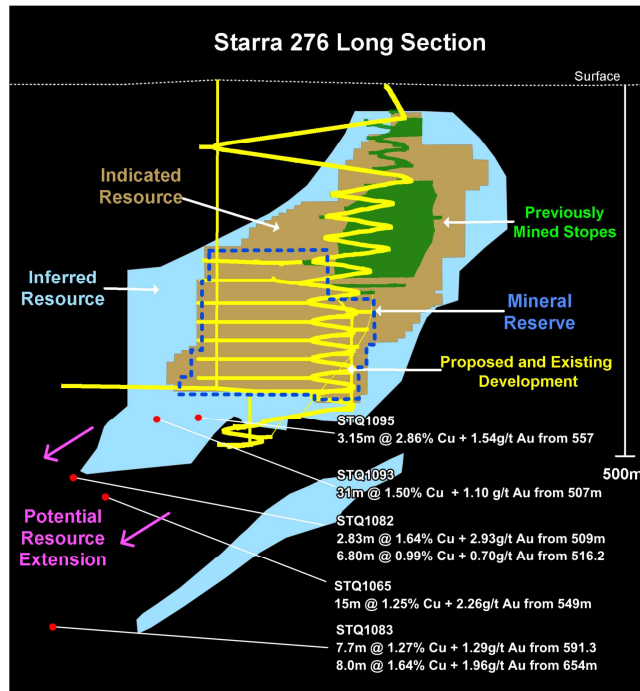

Figure 2: Amethyst Castle drill core showing similarity between core samples. The top core is from drill hole ACDD011 (59.5 m depth, assays pending, drilled Oct 2012) and the bottom core is from hole ACDD003 (46.5 m depth, grades above, drilled 2009). ACDD011 is 40 metres to the north along strike from ACDD003.
