Notes: Significant mineralized intervals are greater than 1.00 g/t Au

Individual assays are top cut to 60 g/t Au prior to composite calculation

Lower cut-off for higher grade sub-intervals is 7.0 g/t Au

True widths for mineralized zones are about 70% to 95% of stated down hole interval

This information should be read together with our news release of June 12th, 2009.

Ian Atkinson, a Certified Professional Geologist, is Centerra's qualified person for the purpose of National Instrument 43-101
