

Legend

Litho-tectonic elements

- Magnetic foliation
- Major shear
- Shear

Uranium targets

- Uranium anomaly from airborne radiometry
- Extent of regional uranium anomaly

Magnetic stratigraphy (approximate) Based on Wapanisk (33C/08) regional geology map

- AUSK 3P : Monzogranite : possible alternating AUSK 2
- AUSK 3M : Monzogranite : heavy magnetic foliation
- AUSK 3 : Monzogranite : some magnetic foliation
- AUSK 2 : Granodiorite and pegmatite
- AUSK 1 : Tonalite and pegmatite
- Intrusive unit?

- Lake

**Uranium Bay Resources : Uskawanis Lake project : Aeromagnetic and radiometric survey
Geophysical Interpretation Map**
