

**POKUKROM WEST GOLD ZONE**

**Table of Drill Intersections to May 24, 2011**

Intersections are calculated with a 0.2 g/t cut-off and a maximum of five-metres of dilution, unless otherwise indicated. Intersections containing high-grade intervals that have been cut to 30 g/t are stated in italics and grey shaded cells following the uncut intervals. Intervals over 20 gram-metres are in bold. Results reported today are highlighted in yellow.

| DHID        | From (metre) | To (metre) | Interval (metres) | Au (g/t)     | Gram-Metres  | Hole Length (metres) |
|-------------|--------------|------------|-------------------|--------------|--------------|----------------------|
| SPDD-083    | 4            | 44         | <b>40</b>         | <b>2.98</b>  | <b>119.2</b> | 96                   |
