

Figure 8

El Gallo Core Hole GAX-192

June 23, 2010

Sample Below From Hole GAX-192  
47.7 opt Ag / 3.9 ft (1,635 gpt / 1.2m)

Multi-stage siliceous breccia with hematitic matrix.  
This breccia type is commonly associated with  
strong silver mineralization at El Gallo.
