

DENISON MINES CORP. PHOENIX A and B URANIUM DEPOSITS

Denison 60% Cameco 30% JCU 10%

- Only the highest grade intersections are shown where drill holes have more than one mineralized interval, except WR-454.
- Reported highlights from 2012 drill program using downhole probe equivalent grade and chemical assay.
- Grade x Thickness contours based on results to hole WR-482 of the 2012 summer program.
- To accompany press release dated October 4th, 2012
